RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." Steamer Railroads are distinguished by a "1."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

Asterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, August 9, 1873.

Stock Exchange and Money Market.

Money has been quoted remarkably easy throughout the week on the basis of 2½@4 per cent on call, and 5½@8 per cent per annum, in the discount form, with far more liberal offerings at the ruling figures, than have been needed to meet the views of responsible borrowers for either speculative or mercantile purposes. The accumulation of capital seeking employment through private channels has been quite marked. The latest city bank return was a comparatively steady one, and the probability is that Money will continue cheap on call, and at moderate rates on business paper and time loans for three or four weeks to come. It did so last year through the month of August, although in the first ten days of the month the importers took nearly $9,000,000 in Gold Notes from the banks to pay into the Custom-house. It has also been urged that the apprehension of very dear money through the fall months is diminished by the action of the Secretary of the Treasury in selling gold freely through the summer months, to meet the currency wants of the Treasury, reserving its currency balances, as far as practicable, and his reserve of greenbacks for the emergencies of trade and the movement of the cotton and other crops later in the season. A recent dispatch from Washington intimates that the administration will not suffer the government to be made a party to any undue pressure upon the money market, directly or by passive indifference, in the next three or four months. The Treasury will be directed by the president to employ, not hastily or expansively, but judiciously and in good season, its currency resources until the meeting of Congress, leaving to that body the revision of the Free Banking laws, or the provision for the elasticity of the greenback circulation, as the more permanent measure of security against money panics. The U. S. Sub Treasury, last week, added materially to both its coin and currency reserves. The city banks last week reported a loss of over a quarter of a million in their deposit line, with a slight gain in their legal tender, and a decrease of nearly a million in their specie reserves. They reduced their loan and discount averages more than half a million, and their circulation slightly.

The city banks gained slightly on their obligatory reserve, the last statement showing that they had $13,803,475 more than the 25 per cent reserve which the national banks are required by law to keep on hand. The U. S. Sub-Treasury, last week, enlarged its coin balance nearly three millions and augmented its currency reserve nearly a million and a half. Its currency reserves at the close of the week were $29,597,749; and its coin board, $43,603,184.

The clearances of the city banks averaged through the week about 77⅞ millions a day, and amounted in the aggregate, for the whole week, to $465,712,370, as against $517,225,953 the preceding week. The U. S. Sub-Treasury at this point enlarged its currency balance $1,415,650 and its coin reserve $2,987,721 as the result of the week's business.

The cash balances in the U. S. Treasury Department on Tuesday were: Currency, $9,037,962; special deposits of legal tenders for the redemption of certificates of deposit, $33,930,000; coin, $80,039,728; coin certificates, outstanding, $42,853,000; outstanding legal tenders, $356,000,000.

The specie reserve of the city banks according to the latest return is $30,272,200, against $23,925,900 same time last year. The city bank deposits are now $238,840,900 against $241,528,000, week ending Aug. 3, 1872. The legal tender reserve amounts to $50,038,500, against $55 051,700 same time last year. The circulation now stands at $27,188,000 against $27,337,200 same time las year. The loans are now $289,986 200 against $295,428,200 at this date last year.

The coin reserve of the city banks is now about 80¼ millions, as against about 15 millions Feb. 21, 1873, and about 25¾ millions on the 20th of last July; the legal tender reserve is a little over 50 millions against about 84⅞ millions April 5th, 1873, and 55½ millions on the statement of June 15th, 1872; and the deposits are now about 238⅞ millions, against 186⅞ on the 12th of April, 1873, and 247½ millions on the 20th of July 1872.

Government revenues have been moderate since our last. The excises yielded within the week about two millions, and thus far in the current fiscal year commencing with July 1, 1873, $9,759,798. The customs at the port of New York, for the week, were $2,850,728, and at the outports, about $950,000 more, in coin or coin certificates.

The U. S. Sub-Treasury office last week received $3,903,295 of currency, and $6,050,484 of gold, the latter including $2,977,000 from customs; and disbursed $2,487,616 of currency and $3,062,764 of gold, the latter embracing $1,988,905 of coin interest.

Under the Treasury programme for August, Government proposes to sell at least six million of Gold, as follows: Thursday, August 7, $1,500,000; Thursday, August 14, $1,500,000; Thursday, August 21, $1,500,000; Thursday, August 28, $1,500,000. And to buy in $500,000 of Five Twenties on Wednesday, August 13th.

There has been a comparatively steady movement in the Gold line. The price has varied little, though the operators for a rise have been working confidently to advance the quotation. The speculative demand has been less active. The customs inquiry has been fair. The export drain has been moderate. The range of the price during the week has been from 115¼@116⅞, and the quotation on Wednesday was 115⅝ against 115⅞ on Wednesday of the preceding week. The specie outflow last week, was $710,542. The Gold Exchange Bank clearances have averaged about 46⅝ millions per day during the week.

The Treasury held, on Aug. 1, 1872, Gold balances to the amount of $69,319,689. On Aug. 1, this year, $80,144,186. The Gold Notes Circulation of the Treasury last year was $31,690,380. The present Gold Notes Circulation is $42,831,000. Of the later, the New York Banks hold $30,272,000; last year, $23,925,000. In other hands, at present, $12,559,000; last year, $7,765,000. The excess of Gold balances in the Treasury, after providing for the whole of the Gold Notes Circulation, is now $37,313,000. Last year, $37,629,000. The price of Gold, Aug. 1, both years, 115⅜@115⅛ per cent. Last year, Aug. 31, 112¾ per cent.

The customs demand for Gold last week, averaged $496,166 a day. The arrivals of specie from Europe, Havana and other foreign ports during the week were $15,822 and thus far in 1873, have been $2,097,012, against $2,790,522 in 1872. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1873, has been $75,169,160 against $87,972,783 during the same time in 1872.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1873, $49,111,429, against $54,251,256 during the same time in 1872.

The export drain of specie was $710,542 last week, against $1,653,259 same week preceding year. The shipments since January 1, 1873, have been $37,905,169 against $54,284,883 during the same portion of 1872.

Foreign Exchange has been in moderately active demand and generally steady as to price. Bankers' sixty day bills on London closed on Wednesday at 108¾@109; sight bills on London, at 109⅜@109⅝. The week's exports of Domestic Produce have been to the currency value of $6,096,224.

Government securities have been quite actively

sought after, but the scant offerings of all issues, and the very full prices ruling have been against free dealings. The public debt statement of Aug. 1, shows a further liquidation of $370,519.

U. S. sixes of 1881 closed on Wednesday of this week at 119¾@120; U. S. Five-Twenties of 1862, 117¼@117⅛; U. S. Five-Twenties of 1864 at 117⅝@117⅞; U. S. Five-Twenties of 1865 119¼@119½; U. S. Five-Twenties of 1865 consolidated 117⅝@117⅞; U. S. Five-Twenties of 1867, 119@119¼; U. S. Five-Twenties of 1868, 118½@118¾; U. S. Ten-forties at 115½@115¾; U. S Fives of 1881 (Funding Loan) 114⅝@114⅞; Six per cent. currency Sixes from 114⅛@114⅜.

The Railway and Miscellaneous share speculation has been fairly active, and prices have been generally quoted stronger, though variable.

State bonds have been in moderate demand and quoted, as a rule, steady.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	July 23.	July 30.	Aug. 6.
Consols	92¾	92⅛	92⅞
U. S. 5-20s, 1865	93⅞	94¼	94¼
" 1867	93¾	94⅛	94¼
" 10-40s	91	91¼	91¼
New Fives of 1881	90¼	90⅝	90¾
Erie	46⅞	46⅛	46⅞
Ill. Central	83	....	84

Railway Mortgage Loans have been in good investment demand at generally firm prices. Central Pacific Sixes have been in more request at from 100¼@100½ ex the July three per cent coupon. The Chesapeake and Ohio Seven per cent gold bonds have been more sought after at 90, and interest. Chesapeake and Ohio Sixes have been in demand at 88½ and interest. Western Pacific Sixes at 92½@92¾. The Northern Pacific 7-30 Loan has been of ready sale at par and interest.

The Metal trade has been on a moderate scale. Copper has been quoted firm on a fairly active basis; 650,000 lbs. sold at 27c.@27¼c., on the spot, and 28c. for forward delivery. Iron has been rather quiet but held with confidence; 500 tons Scotch Pig, sold at $45 for Eglinton; $46 for Glengarnock, and 52 for Coltness. We now quote: Eglinton Pig at $45; Glengarnock, at $46; No. 1 American Pig at $45@$48; No. 2 do. at $43@$45; English rails at $65@$68, gold; American Rails, at works, at $75@$78; Old Rails $47@48 Pig Lead is in moderate demand with foreign quoted at 6½c. @6⅝c., gold, for ordinary, on sales of 100 tons. Spelter has been inactive at 7½c.@7⅝c. gold. Pig-tin has been in very limited demand, with Straits quoted at 31½c.@31⅝c., with English at 29¼c., and Banca, at 35c., gold. Sales, 5 tons English, to arrive, (August shipments,) at 28⅞c., gold. Tin Plates quiet but quoted firm; sales, 300 boxes Charcoal Plates at $11, and 750 boxes Coke at $8 75@$9, gold. Charcoal Plates quoted here at $10 87½@$11 37½; Charcoal Terne, $9 75@$10 20; Coke Terne, $7 75@$8 50, gold, per box. Zinc dull and wholly nominal.

General business has been fairly active, since our last. Cotton, Breadstuffs and petroleum have been quoted lower, Provisions irregular, Tobacco and Wool firm. Middling upland Cotton left off tamely at 20⅛c. per lb. The receipts at all the ports, since Sept. 1, have been 3,556,963 bales, against 2,670,279 bales same time in the preceding year; exports 2,613,705 bales against 1,938,888 bales in the previous year; stock at the ports at latest dates, 167,417 bales against 106,034 bales same date in 1871.

Foreign goods have been more sought after and held with more firmness. The week's imports of foreign goods and merchandise amounted to $5,412,088 including $2,309,919 of dry goods.

Ocean freights have been fairly active, and rates have been quoted firmer, with the main inquiry for Grain room on berth and charter.

At the Live Stock Markets, Beeves have been in fair demand at from 7@13 cts. Veals at 5@8½ cts.; Sheep at from 3¾@6¼ cts.; Spring Lambs 5@9 cts.; Swine at 5⅛@5¼ cts. per lb., all live weight. The week's receipts were 9,576 Beeves, 2,642 Veal Calves, 23,701 Sheep and Lambs, and 25,387 Swine.

☞ The New Jersey Steel and Iron Company, Trenton, N. J., has one of the largest rolling mills in the country, covering four and a half acres of ground. There are 13 puddling and six heating furnaces; two steam hammers, of 4½ tons each; two dandy furnaces, for re-heating old rails; 28 engines, and two turbine water wheels. One of the features here is the manufacture of silicon steel headed rails, made from codorus ore, and similar to those made at Elmira. The company has made over 80,000. It also makes girders, beams, &c., and general merchant iron and steel. It has one of the Siemens-Martin furnaces, the first ever built in this country. It employs about 120 men.

☞ Mr. ALFRED R. FISKE, who for many years filled the position of Superintendent of the Northern Central Railway Company with such acceptability to the traveling public, shippers and the corporation which he served, will, in a few days assume the management of the extensive iron establishment of Atkins & Bro., at Pottsville, Pa. These works consist of a rolling mill, which turns out one hundred tons of railroad iron per week, and three blast furnaces. The firm mine all their coal, two-thirds of their ore, and quarry all their stone. They employ between 400 and 500 hands.

☞ The Richmond *Dispatch* says that the increase of the live stock business from the West has been such that the Chesapeake and Ohio Railroad will after next week run a special train for this business, leaving Huntington every Thursday morning, arriving at Richmond every Saturday, stopping at Ronceverte to feed and water. This will tend to make Monday a regular market day for Richmond, and draw together buyers from all parts of the South, as well as Baltimore and other points.

☞ The contract for laying the iron on the Nashua and Rochester Railroad, between Rochester and Epping, N. H., has been awarded to Wal-Hurlburt, of Underhill, Vt. The work is proceeding rapidly, and the cars are expected to be running from Rochester to Epping in a few weeks. A junction with the Concord and Portsmouth Road will be formed at the Epping station.

☞ The Miller Platform is to be applied to all the cars of the Maine Central Railroad. This will involve an expenditure to the road of nearly $4000, and is brought about at the suggestion of the general manager of the Eastern, Mr. Hatch, who is determined that the equipment of the road shall be first class. The cars will be equipped at the shops in Augusta.

☞ The West Point Tunnel has been driven 130 feet from the south end, and 100 feet from the north end. Night gangs are to be put on soon, and the work pushed as fast as possible.

Knoblauch & Lichtenstein,

No. 37 Broad-st., New York.

OFFER FOR SALE

$200,000

7 Per Cent. First Mortgage Bonds,

30 YEARS TO RUN,

OF THE

CENTRAL R. R. EXTENSION COMPANY

OF LONG ISLAND,

At 90 and Accrued Interest in Currency

The road runs from Farmingdale, the present terminus of the Central Railroad, to Babylon on the South Shore of the Island. According to contract, the road will be finished by July 15th, ready for this summer's travel.

These Bonds being a *home security*, and among the best ever offered in this market, we take special pleasure in recommending them.

Pamphlets or further particulars will be promptly furnished on application.

☞ The railroad from Marshall to Dallas, Texas, was completed on the 30th ult., meeting sixty miles east of Dallas and sixty-four miles west of Longview. Through trains will soon be put on from Shreveport to Dallas, distance one hundred and ninety miles, running time twelve hours. Shreveport gives a barbecue in honor of the event.

☞ The work on the new railroad from Camden (N. J.) to Mount Ephraim via Gloucester City, it is stated will be commenced at an early day, and prosecuted rapidly to completion, probably by the 1st of January next. It will begin at Kaighn's Point and run along Ferry road to Broadway, thence to Gloucester and then to Mt. Ephraim.

☞ It is stated that the Bethlehem (Pa.) Iron Company has for some time been receiving iron ore from Africa. It is of the hematite and magnetic qualities mixed, and is mined at Elmokeh, Algiers, and shipped from the seaport town of Borah in the same province, to Philadelphia, and from there to Bethlehem.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending July 26, at 442,052 tons, and for the coal year 10,558,105 tons, against 10,378,129 tons to corresponding time last year, being an increase of 179,985 tons. The bituminous tonnage for the week is 78,568 tons, and for the year 1,728,731 tons, giving a total of all kinds for the week of 530,620 tons, and for the year of 12,287,836 tons, against 11,914,509 to same time last year, being an increase of 373,327 tons.

☞ The earnings of the Erie Railway Company for the week ending July 23, 1873, were $456,230, and since July 1, $1,239,493—an increase over the corresponding period of the previous year of $110,498.

☞ The estimated earnings of the Kansas Pacific Railway for the week ending July 22, are: freight, $48,025 60; passengers, $25,311 46—total, $73,337 06.

☞ BANKING HOUSE OF FISK & HATCH,
No. 5 NASSAU-ST., NEW YORK, Aug. 8, 1873.

We recommend to our friends and customers for investment of surplus Capital, or in exchange for Government Bonds:

THE CHESAPEAKE AND OHIO SEVEN PER CENT. GOLD BONDS; principal and interest payable in gold coin, in New York; interest payable Jan. 1 and July 1; coupon or registered. Price **90** and accrued interest.

THE CHESAPEAKE AND OHIO RAILROAD IS A COMPLETED TRUNK LINE, BETWEEN THE ATLANTIC SEABOARD AND THE GREAT WEST, 420 miles in length, extending from tide-water, at Richmond, to Huntington, the most favorable point of railroad connection with the Ohio River, and developing the richest IRON, COAL, AND TIMBER REGIONS IN THE UNITED STATES.

ITS FREIGHT TRAFFIC AND PASSENGER TRAVEL are already large and remunerative, and they are increasing with a rapidity which shows the Chesapeake and Ohio to be one of the most valuable and successful railroads in the country.

These facts, together with the THOROUGH CONSTRUCTION AND SUPERIOR CHARACTER OF THE ROAD ITSELF, its ADVANTAGES FOR ECONOMICAL AND PROFITABLE OPERATION, AND THE UNQUESTIONABLE SECURITY OF THE BONDS OF THE COMPANY, ENABLE US to recommend them with the utmost confidence.

Pamphlets containing full information concerning the Road, and the country it traverses, will be furnished upon application.

We also have on hand for sale the CHESAPEAKE AND OHIO SIX PER CENT. GOLD BONDS at 88¼, and accrued interest. Interest payable May and November. Denominations $100, $500, and $1,000—coupon or registered.

We continue to deal in GOVERNMENT SECURITIES, and CENTRAL PACIFIC, and WESTERN PACIFIC BONDS; buy and sell Stocks and Bonds at the Stock Exchange on commission, for cash; make Collections, receive Deposits, on which we allow interest at the rate of Four per Cent., and do a general banking business.

FISK & HATCH.

☞ At a meeting of the stockholders of the Vermont Valley Railroad, at Bellows Falls, Vt., on the 21st of July, the following board of directors was elected: Governeur Morris of Morrisania, New York, W. P. Burrill, Hartford, Conn., D. L. Harris, Springfield, Mass., Frederick Billings, Woodstock, Vt., S. M. Waite, William H. Rockwell, jr., and F. A. Nash, Brattleboro. Subsequently Mr. Morris was elected president, Mr. Waite vice-president, Mr. Nash clerk and treasurer, and Messrs. Field and Tyler of Brattleboro solicitors.

☞ The Milwaukee and Fond du Lac Railroad, which was completed on the 26th ult., forms the connecting link between the Chicago and Northwestern Railroad at Fond du Lac and Milwaukee, and most of the trains will be run over this route to Chicago, instead of *via* Janesville.

☞ The gross earnings of the Wicomico and Pocomoke (Md.) Railroad for the year ending April 30, 1873, were $33,966 42, the expenses $19,766 55, and net earnings $14,190 57.

Journal of Railroad Law.

RAILROAD COMPANIES—CONTRIBUTORY NEGLIGENCE IN RESPECT TO FIRE COMMUNICATED BY A LOCOMOTIVE TO ADJACENT PROPERTY.

The facts in the recent case of The Chicago and Northwestern Railway Co. *vs.* Simonson, (54 Ill., 504), are fully and clearly stated in the following opinion by—

BREESE, J.—This was an action on the case brought to the Whiteside Circuit Court by Frederick Simonson, to recover of the defendant railwaycompany, damages occasioned to the property of the plaintiff, by reason of the escape of fire from their locomotives, while running on their track across the lands of the plaintiff.

There was a verdict and judgment for the plaintiff, to reverse which the defendants appeal, assigning, among other things, as error, giving the instructions asked by the plaintiff. It is to this point only we have directed our attention.

The instructions complained of are the following:

"If the jury believe, from the evidence that any one or more of the fires which are complained of by the plaintiff in the case, were caused by, or originated from, the carelessness of the defendants' servants, or the defect in the construction of the defendants' engine, or from the carelessness of the defendants in permitting dry grass and leaves, and other combustible matter to accumulate on the side of their said railway track, and adjoining the premises of the plaintiff, so that fire, first falling from defendants' engine, caught said dry grass or dry leaves, or other combustible matter, and thence communicated with the premises of the plaintiff, and assess his damages at such a sum as they believe from the evidence, he has sustained from such careless or negligent acts.

"If the jury believe, from the evidence, that any one or more of the fires that are complained of by the plaintiff, were caused by, or originated from the carelessness of the defendants' servants, in the management of the locomotive by said defendants' servants, or from their permitting dry grass and other combustible material to accumulate on the land of the defendants, on the sides of their said railroad track, adjoining the premises of the plaintiff, they will find the issues for the plaintiff, and assess his damages at such a sum as they believe, from the evidence he has sustained."

The objection to these instructions, and each of them, is obvious. They leave out of the case the question of contributory negligence on the part of the plaintiff, in disregard of the rule established in Illinois Central R. R Co *v.* Mills, 42 Ill. 407, and O. and M. R. R. Co. *v.* Shanefelt, 47 ib. 497, and Illinois Central R. R. Co. v. Frazier ib. 505.

It was declared by a majority of the court, in Shamefelt's case, that land owners contiguous to railroads were as much bound, in law, to keep their lands free from an accumulation of dry grass and weeds as railroad companies were, so when a fire is ignited on a company's right of way, and is communicated to fields adjoining, the negligence of such owner will be held to have contributed to the loss, and unless it appears the negligence of the company was greater than that of such land owner, the latter can not recover from injuries thus arising.

These instructions wholly ignore the doctrine, which must be regarded as the established doctrine of this court, and the defect is not supplied by any other instruction given in the cause.

In this case, however, it appears the fire from the engine was communicated to the wood lands of the plaintiff, as well as to his cultivated land.

On another trial, this fact will be considered by the court in its instructions, as abating that degree of diligence required of the land owner, for it is well known, it is almost impossible for such to keep his timber land clear of leaves, which are constantly falling, and soon become dry and inflammable.

As the instructions ignore, wholly, the doctrine of contributory negligence, the judgment for that reason must be reversed, and the cause remanded.

Judgment reversed.

Atchison, Topeka and Santa Fe Railroad.

The board of directors submit to the stockholders the following report of the company's affairs, and of its operations for the year ending March 31, 1873:—

The year ending March 31, 1873, has been an important one in the affairs of your road. The charter was granted March 3, 1863. The route prescribed was from Atchison on the Missouri River to the western boundary of the State of Kansas, in the direction of Santa Fe, New Mexico, a distance estimated at five hundred miles. The time for completion was limited to ten years, which expired March 3, 1873. Five years and six months were allowed to pass without commencing operations. In September, 1868, the charter was transferred to new parties. In 1869, twenty-eight miles were built; in 1870, thirty four miles; in 1871, seventy-five miles. The western boundary of Kansas not having been established, we estimated the remainder to be built at about three hundred and forty-three miles. The time for the completion of the road and telegraph was limited, and only one year remained. The consequence, if it should not be completed within the time, would be the loss of a large part of our land grant. The advancing cost of materials and rates for money, and the fact that five millions of dollars would have to be raised, presented serious difficulties and embarassments. An effort was made in Congress to get the time for completing the road extended for two years; but in view of the delay, and the uncertainty of favorable action during the exciting presidental contest, it was determined by your board to complete the road before March 3, 1873, the time prescribed in the act of Congress making the grant of lands. The directors, on the 22d March, 1872, voted to proceed immediately with the building of the whole line. The means were provided and the work completed; but the advanced cost of materials, the tightness of the money market, and the unprecedented but indispensable rapidity with which the work had to be performed, increased somewhat the cost of construction above what was expected and estimated. The cars were run over the entire line from the Missouri River to Colorado, about four hundred and seventy miles, on the 28th day of December, 1872. Thus about three hundred and sixty miles were constructed in less than nine months. Moreover, the road is remarkably well built, much better than the majority of western roads, and in general construction will bear comparison with the best roads either East or West. It runs, for the greater part, in the valley of the Arkansas River, and is of easy grades and curves, as exhibited in the report of the general superintendent.

While it could not reasonably be expected that a large amount of business would immediately be done upon a road so rapidly built beyond the limits of settlement and production, we are gratified in being able to say to you that the business upon it, for so new a road, and in so new a country, is almost unprecedent. The earnings for the portion operated, ending March 31, 1873, being an average of about two hundred and eighty-three miles, were over three thousand and four hundred dollars per mile, not including anything for the transportation of the very large amount of material required in construction; which transportation necessarily interfered with the business of the road, in requiring the use of engines and cars, which otherwise would have been employed so as to increase the earnings for the year. In addition to this, you can readily see that the aggregate cost of operating was greatly increased, and the net earnings thereby diminished. Except for this cause, we believe that the road could have been operated for about fifty per cent of its gross receipts, instead of over sixty-two per cent, as appears in the superintendent's report.

The following statement, taken from the treasurer's report, shows the financial condition of the company:

Construction		$20,593,232 78
Equipment		1,214,207 15
Surplus materials, iron, ties &c., on hand		208,296 26
Surplus bonds at market value—

Average number of miles operated....	123.37	282.97

The land secured to the company by the building of the road is 6,400 acres per mile, or 8,005,870 acres, an area larger than the State of Connecticut, and two-thirds as large as the State of Massachusetts. The average quality of the land is not excelled by any in the State or country. The greater part of it lies in the valley of the Arkansas River which contains the only belt of arable land extending the whole distance between the Missouri River and the Rocky Mountains. Many thousands of Texas cattle are every year prepared for market upon the rich and abundant grasses of this region; and, as the country farther east is occupied by settlement, we believe that this number will increase, and will furnish for all time a most important portion of the business of the road. Settlements are already being made, and farms opened, very far toward the western portion of our grant. It has only required an outlet by rail to give great and immediate value to this remarkable country.

The land mortgage of $3,500,000 is only at the rate of about one dollar and twenty-five cents per acre, or one half the government price to purchasers for the intervening lands. There have been sold, during the year ending March 31, 1873, seventy thousand fifty-eight and forty four one-hundredths acres, at an average of a little over six dollars per acre. The aggregate sales up to that date amount to one hundred and forty-seven thousand three hundred and ninety seven and twenty-nine one hundredths acres, the gross proceeds of which, including the interest added to the time of payment, amounts to the sum of $1,229,320 62.

Profit and loss, being discount on pur- of $20,000 bonds.....	3,021 30
	$277,171 92

The current expenses of 1873 were increased $30,000 by the payment of land office or entry fees; leaving the expenses of the department for the year, $43,770 82.

We expect that our sales for the current year will reach about a million of dollars, and that this amount will be largely increased when the government land is exhausted, and our general land manager shall have completed his arrangements for securing foreign and domestic immigration.

Before the opening of our line to the Missouri River from Atchison, we were dependent upon the Kansas Pacific Railroad for an eastern outlet. Now, at Atchison, we make good connections with the following roads: Hannibal and St Joseph; Kansas City, St. Joseph and Council Bluffs, and by the last-named road with the Chicago, Burlington and Quincy; also with the Chicago, Rock Island and Pacific,—four important Chicago lines. We also connect at Atchison with the Wathina and Doniphan road from Atchison to St. Joseph, on the west side of the river, furnishing us a more valuable outlet to the East over the railroad bridge just completed at St. Joseph. We also have connection at Atchison with St. Louis via the Missouri Pacific Railroad, and by the St Louis, Kansas City and Northern Railway, which is reached via Winthrop and Harlem over the K. C., St. J., and C. B. R. R. We also have connection with the Atchison and Nebraska Railroad running from Atchison northwest to Lincoln in Nebraska. We thus have eight connecting lines, and receive at least three fourths of our eastern business at Atchison. It is hoped at no distant day a bridge will be built there.

We have reason to expect that the cattle trade, the earnings from which are an important item of our receipts, will steadily increase; and we shall have to provide additional rolling stock for its accommodation. During the past year we shipped about ninety thousand head of Texas cattle alone.

We believe that your road, at no distant day, will form an important part of a great line between the Atlantic and Pacific, passing through a most valuable and productive mining and agricultural region; how soon we shall realize this hope must depend more or less upon the general financial condition of the country.

Sleeping Cars on European Railways.

American sleeping cars or coaches have been introduced on European railroad lines. Mr. Pullman started the movement on the Midland Railway of England. This has been followed by the organization of a company which has obtained valuable concessions from several of the most important continental lines, and has actually sleeping cars running on some roads already. Sleeping cars are now attached to all the through trains from Ostend to Berlin; from Ostend to Cologne; from Vienna to Munich, and Paris to Vienna. A large number of additional cars are now building for other routes, and it is believed that it will not be long before they will be in use all over the continent. It is reported in this connection that contracts have been made with the several railway lines, constituting the following routes on the continent: From Calais and Bologne to Paris; from Calais to Berlin, via Brussels; from Paris to Cologne; from Paris to Brussels; from Paris to Vienna, via Strasbourg; from Ostend to Berlin, via Brussels; from Ostend to Cologne. By the terms of these contracts the company are to own and manage the sleeping carriages, placing a conductor on each, for which they are authorized to collect a small fare from each passenger. The railway companies have the carriages, keep the outside in order, care for the running-gear, and furnish oil, fuel, and lights, receiving the ordinary fare from each passenger. The prices charged in these carriages for the use of the car from Paris to Vienna, during the day time and two nights are sixteen shillings, and from Ostend to Berlin, ten shillings. These charges are moderate, and will insure the constant use and occupancy of all this class of cars or coaches. At the same time the public will have accommodations which up to this time have been denied them on the best lines of Europe. America leads the world in all matters of practical importance.

New Haven, Middletown and Willimantic Railroad.

The Middletown (Ct.) *Constitution* gives the following statement as to the present condition of the Air Line Railroad:

July 1, 1871, the directors of the Air Line road issued $500,000 second mortgage bonds, convertible into stock at the option of the holders. The directors executed a mortgage deed to O. Vincent Coffin and William R. Galpin as trustees. These gentlemen took possession of the road and all its equipments last spring and still hold them at the present time. They did not deem it best to interfere with the work on the road or the officers or parties to the contracts already made, so long as work was progressing, and therefore the old officers have remained in charge of the unfinished section. No other parties in interest can obtain possession of the road, except the first mortgage bondholders, and they cannot under five years. The road is completed to Willimantic, its entire length, and nearly all of it ballasted. Some one hundred thousand dollars are required to build depots, fences and furnish additional rolling stock for the road. The town of Middletown guaranteed two hundred thousand dollars' worth of these bonds. Its interests will be well looked after and protected by Messrs. Coffin and Galpin. The directors of the road held a meeting Wednesday to see what could be done. A crowd of laborers on the road besieged the office all day for their pay. Some $4000 or $5000 is now due them.

☞ The grading on the Southern Maryland Railroad has been completed from Brandywine, in Prince George's county, to St. Joseph's church, St. Mary's county, and the work of laying rails will be commenced soon. It is now promised that the road will be in running order next Spring.

☞ The Calumet and Hecla Mining Company has declared a dividend of $5 per share, payable August 15.

DREDGING MACHINES AND SCOWS
FOR SALE.

One (Osgood Pattern) Second Hand. Price $10,000.
One, Almost New. Price $22 000.
Two Large Dumping Scows, $3,500 Each.
Apply to
A W. LADD,
5 and 7 Dey Street.

Second Hand Locomotive For Sale.

ONE SECOND HAND ANTHRACITE COAL BURNING LOCOMOTIVE for Sale, weighing 28 tons, eight-wheel connected with cylinders 16 inches by 20 inches. Engine can be seen on application to A. WILHELM, President of Cornwall Railroad, at Lebanon, Pa. 3m26

RAILROAD IRON.

THE undersigned, agents for the manufacturers are prepared to make **CONTRACTS FOR RAILS** delivered free on board at ports in England, or exship at ports in the United States.

FOR SALE.

Four new passenger Coaches for sale; two 60 passenger each, price $5,250; two 76 passenger-price $7,000 each, now ready for lettering. Also a 30 ton new Locomotive ready for use.

Apply to
A. W. LADD
35tf 5 and 7 DEY STREET NEW YORK.

LANSDELL'S
Patent Steam Railroad Water Station.

DISPENSES WITH **Tanks, Tank Houses, Stationary Power,** AND **Attendance.**

CAN NOT **FREEZE** IN ANY **CLIMATE,** UNDER ANY **CIRCUMSTANCES.**

COSTS LESS Than One Half the Price of a FROST PROOF TANK.

The Engineer in charge of the Locomotive attaches the Hose A to a steam valve in the boiler. Steam passed through the pipe D and slip joint F into the globe H, producing a vacuum; the water is then lifted through the pipes I I and forced through the column E and hose C into the tender, filling any ordinary tender in about three minutes. When steam is shut off all the water in the pipes returns into the well, and any condensed steam passes off through the drip valve G, leaving nothing to freeze. The handle B serves to turn the discharge pipe and hose in any direction. The water delivered into the tender is warm, thus utilizing the steam used. The discharge tubes, represented above made of hose, can be made of iron if preferred.

LENG & OGDEN,
IRON AND STEEL DEALERS & IMPORTERS,
No. 4 FLETCHER STREET, NEW YORK.

A. W. LADD,
NO. 5 DEY STREET, NEW YORK,

Will cut to order for Bridge and Railroad Builders, WHITE PINE, GEORGIA and FLORIDA PINE, HEMLOCK and OAK TIMBER.

Agent for ROBERT BROWN, Telegraph Contractor.

Telegraph Lines of any length built with Brooks' Patent Paraffine or Glass Insulation and American Compound or English Galvanized Wire at the lowest rates and shortest notice. Also, Wire Fence for Railroads.

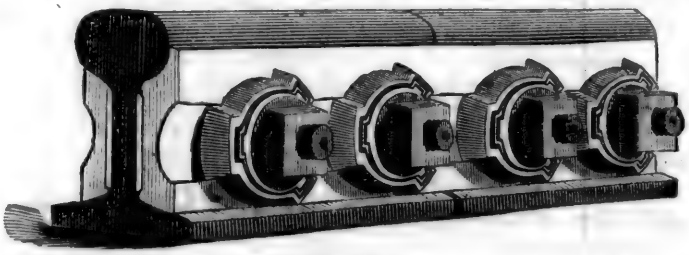
THE LOCK-NUT & BOLT COMPANY OF NEW YORK,

No. 61 Broadway, New York.

Manufacturers of all kinds of **BOLTS** for FISH-BARS, BRIDGES, CARS, MACHINERY, &c., with the "CUMMING NUT-LOCK," the only method of locking a nut to the bolt.

PATENTED June 16, 1868.

IMPROVED August 23, 1870.



Unequalled for Cheapness, Simplicity and Effectiveness.

DESCRIPTION.—A pointed copper key is placed in a groove cut in the threaded part of the bolt, *over which* the nut is screwed to its position, cutting its own thread in the copper, thereby taking up all the slack between the bolt and the nut. By riveting up against the face of the nut the projecting portion of the copper key, the nut is firmly locked in its position, but can be readily adjusted or removed with a wrench without injury to either bolt or nut.

Severely tested for over *four years*, they have *never failed*, and are *now in use on over fifty Railroads*, giving perfect satisfaction. We solicit a trial *anywhere*.

Licenses Granted to R. R. Companies, Car Builders and others.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

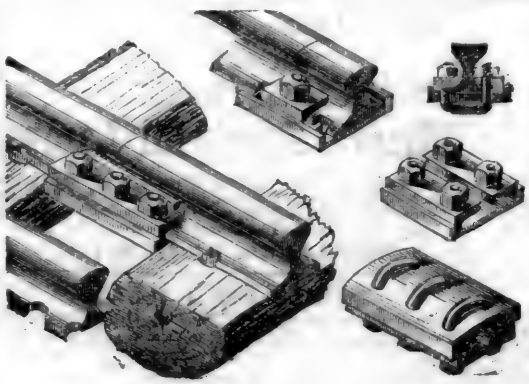
The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.



That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

FISHER'S PATENT

Wrought Iron

RAIL JOINTS,

MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

American Railroad Journal.

New York, Saturday, August 16, 1873.

Chesapeake and Ohio Railroad.

A correspondent of the *Evening Post*, writing from Huntingdon, West Virginia, the western terminus of the Chesapeake and Ohio Railroad, says:

This road was formed by a consolidation of the roads, properties and franchises of the Virginia Central Railroad Company and the Covington and Ohio Railroad Company, authorized in 1866. Its charter privileges cover the line from tide water on the James River to the Ohio River at or near the mouth of the Big Sandy River, a distance of 427 miles.

On the 1st day of April, 1873, the rails of the two great divisions were united, and the whole road was opened for traffic.

Continuous railroad communication between the western terminus of the road and Cincinnati will soon be completed by way of the Louisville, Cincinnati and Lexington Railroad, and the Elizabethtown, Lexington and Big Sandy Railroad, of which General John C. Breckinridge is vice-president. The latter road, it is expected, will be finished during the coming year, when there will be a very direct all-rail line between Richmond and Louisville, 640 miles, with a branch line to Cincinnati, and extension by way of Louisville to St. Louis and the far West.

The road is of the standard gauge, fifty-six and a half inches, and in its construction the most modern and approved plans and materials have been adopted. Iron bridges have been erected in the portion recently built. Steel rails have been laid on a large part of the western division, over which a heavy mineral traffic passes, and solid embankments have been built in place of temporary trestle work. No care or expense has been spared in its construction to render it a thoroughly first-class and substantial railroad.

Extension of the Northern Pacific Railroad into Superior.

Inasmuch as many inquiries are made relative to the arrangement lately concluded between the Superior and St. Croix Railroad Company and the Northern Pacific Company, it is proper to state that the agreement of June 27th ult. provides that right of way, wharf frontage and depot grounds shall be furnished to the Northern Pacific free of cost; in other words, the town of Superior agrees to supply the requisite grounds at its own expense. So soon as the deeds are delivered, the Northern Pacific Railroad will commence and construct the railroad bridge from Rice's Point to Conner's Point, in Wisconsin, and the road thence along the Bay of Superior to Nemadji river, all to be finished within eight months.

Much of this distance lies in the water, and involves costly bridging and piling for track, the drawings and specifications of which have been prepared, and proposals for the great bridge over the St. Louis River are about to be issued.

Walbridge, Bro. & Sargent, having assigned the Kokomo contract to the Northern Pacific, the latter company assumes the construction of that road (from Superior west 23¼ miles to the N. P. junction) within eighteen months; otherwise incurs the forfeiture of the important subsidy to the road offered in bonds by Douglas county.

Right of way along Superior Bay for the most part has been obtained, and proceedings to condemn depot grounds commenced.

The roads will be constructed under the charter of the Superior and St. Croix Railroad Company, incorporated by the State of Wisconsin, but the majority of whose Directors is composed of members from the Northern Pacific Board.

The present organization of the Superior and St. Croix Company is: Frederick Billings, President; Thos. H. Canfield, Vice-President; H. Hayes, Secretary and Treasurer; Executive Committee, Geo. W. Cass, Thos. H. Canfield, Chas. B. Wright. —*Superior Times*, July 26.

☞ Articles for the consolidation of the Chicago and Atlantic Railway Company with the Baltimore, Pittsburg and Continental Railway Company, have been filed with the Secretary of State of Ohio.

Bridge at Minnehaha Falls.

The proposed suspension bridge to connect the Ramsey and Hennepin shores near the Falls of Minnehaha, is thus described by the St. Paul (Minn.) *Pioneer*:

The bridge will be composed of two spans of 360 feet each, supported in the middle by a tower 148 feet in height. The shore piers or towers are each fifty feet high, and the entire plan appears to be designed with a view to symmetry and durability. The bluffs of the Mississippi at the point selected are high, and the channel is unusually narrow, the entire length of the bridge between the shore towers being only 720 feet. The plans are drawn by Thomas M. Griffith, an experienced engineer, of Lewiston, New York, and according to the estimates of CLARKE, REEVES & Co., of the Phœnixville Bridge Works, Philadelphia, the structure can be built at a total cost of $94,436 45. Their estimate embraces an immense amount of material required in the construction of a suspension bridge, such as pine and oak timber and iron in the platforms, suspending rods, wrapping-wires, street rails, cable-wire and anchorage iron and plates. The anchors or piers, and the entire frame work of the proposed bridge, seem to be devised on a plan which must insure immense strength, while it preserves the beauty in all its several parts.

Another New Bridge.

The success which has attended the Union bridge enterprise has revived the project for the construction of a bridge over the Monongahela river at the Point. The failure of the Tripartite Bridge Company to go on with the structure they contemplated has not proved a dampener by any means, and it is now probable that instead of one costly structure with arms reaching from Allegheny and Sawmill run to the center of the river and connecting at that point to one running out from the point, there will be two distinct bridges. Surveys have already been made for the structure over the Monongahela river, and the estimates will be completed in a short time. This new structure will come under the Act of Congress which requires bridges over navigable rivers to have a channel span of not less than five hundred feet and to be constructed ninety feet above low water. Those who are moving in the enterprise are exceedingly anxious for its success, and will doubtless make arrangements to comply strictly with the law, so as to avoid trouble and delay which might be encountered. The Pittsburg terminus will be near the new Union Bridge, and the South Side terminus will probably be near Painter & Co.'s rolling mill.—*Pittsburg Chronicle, Aug. 9.*

Baltimore, Washington and Alexandria Branch.

The Washington City and Point Lookout Railroad Company are actively engaged in building the Baltimore, Washington and Alexandria branch of its road. This branch starts from a point just on the borders of the District of Columbia line, opposite Alexandria, passes along the borders of the river, through Uniontown and the eastern part of the District, crossing the Baltimore and Potomac road, thence to Hyattsville, Maryland, where a junction is formed with the track of the Baltimore and Ohio Railroad. For a week past contracts for a large portion of the work have been let, and it is probable that the branch road will be completed within four months. The following are some of the contracts given out: To Goodlow Brothers, of Virginia, for one pile bridge opposite Alexandria; to J. H. Cofrode & Company, of Philadelphia, for bridges across the Eastern branch, Beaver dam, and Spa branch; also to the same firm for a trestle work and a Howe truss bridge across the Baltimore and Potomac Railroad. This bridge will be 50 feet span and 30 feet high. The grading of the road from Hyattsville to the District line has been let to Latchford, Hale & Co. Mr. James Fitzpatrick has been awarded the contract for sections three and four within the District of Columbia boundaries. Three thousand tons of rail have been purchased for the branch road and main stem of the Abbott Iron Works, of Baltimore, and is now being delivered along the line of both roads. Engineer Beverly Randolph, son of the chief engineer of the Baltimore and Ohio Railroad, has started, with a full force of assistants, to locate the main stem of the road from the District line through Forrestville, Prince George's county, to Point Lookout, and it is intended to let out by contract during the present month all that portion of the main stem that is not graded.

Michigan Central Railroad.

The earnings of this road for the years ending May 31, 1872 and 1873, have been as follows:

	1872.	1873.
From passengers	$1,687,256 49	$1,785,716 33
" freight	3,379,625 54	3,852,938 41
" mails	48,865 56	48 865 56
" miscellaneous	197,326 44	188,796 77
	$5,313,074 03	$5,876,312 07
Expenses, viz:		
Repairs of road	$570,045 77	$414,977 90
" buildings	215,095 19	171,476 95
" loco'tives	273,102 73	325,849 02
" cars	603,387 53	641,608 96
Locomotive service	212,956 99	236,739 70
Train "	222,209 28	241,114 15
Station "	728,175 14	781,875 48
Fuel	569,808 78	648,093 04
Oil and waste	81 202 22	86,630 26
Stationery, etc	41,174 87	48,472 98
Taxes	48,087 62	126,209 94
Telegraph	65,773 82	50,599 64
Miscellaneous	88 328 73	102,595 24
	$3,719,348 67	$3,876,243 26
Net earnings	$1,593,725 86	$2,000,068 81

Compared with the previous year the gross earnings of 1873 show an increase of $563,238 04, with an increase in expenses of $156,894 59—making the increase in net earnings $406,343 45.

The earnings from passengers show an increase of $98,459 84, and the earnings from freight an increase of $473,307 87, with a decrease in mails and miscellaneous of $8,529 67.

Passengers earnings per mile were $6,287 73, freight, $13,566 67, miscellaneous, $836 84—total $20,691 24, an increase compared with the previous year of $1,983 24.

The expenses of operating the road (not including taxes) were $3,750,033 32, or 63.8 per cent. In 1872, they were 68.8 per cent. The expenses, including taxes, the past year were 65.96 per cent, against 70 per cent in 1872.

The following is a comparative statement of the earnings of the entire line, including branches, for the fiscal years ending May 31—

	1872.	1873.
Passengers	$2 114,066 44	$2,367,181 67
Freight	4,046,198 76	4,652,873 82
Miscellaneous	281,147 36	282,062 57
	$6,441,412 56	$7,302 118 06
Operating expenses	$4,377,614 39	$4,840,564 87
Taxes	70 189 07	146,370 59
	$4,447,803 46	$4,986,935 46
Net earnings	$1,993,609 10	$2,315,182 60

—showing an increase in gross earnings of $860,705 50, and in net earnings of $321,573 50.

The ratio of expenses to earnings in 1872 is 70.64, against 68.29 in 1873; exclusive of taxes, 67.96 in 1872, against 66.29 in 1873. The president in his report says:

The extent of road which has been worked, has not materially differed from that of last year. The Jackson, Lansing and Saginaw Road has been extended during the year, though but little of the extension has been for any time in use. It is now just being opened for use to Otsego Lake, which is its present northern terminus.

Of this increase, $563,238 04 have been upon the main line, and $297,367 52 upon the branch lines.

The increase in passengers has been	$253,115 28
And in freight	606,775 06
In miscellaneous it has been only	915 12
The increase in passenger earnings upon the main line has been	98,459 84
And upon the branch lines	154,655 39

The statements show a steady and healthy increase of business, which though not by any means so much as in other circumstances would have been the case, is perhaps all that ought to have been expected, if the difficulties we had to encounter during the whole year, but more especially in the winter, are duly considered.

The expenses of operation, exclusive of taxes have been	$4,840,564 87
Including taxes paid	4,986,935 46
Exceeding that of last year by	539,132 00
Leaving of net earnings above those of last year	321,573 50

The ratio of expenses to earnings, including taxes, has been 68.29 per cent, and exclusive of taxes, 66.29 per cent of the gross earnings.

The net earnings for the year have been $2,315,182 60.

The operating expenses of the main line have been, including taxes, 65.96 per cent of the gross earnings of the line, showing a decrease in those expenses of 4.04 per cent.

The increase of the earnings from the whole property of the company has been 13.30 per cent above that of last year. The increase of the earnings of the main line have been 10.60 per cent above those of last year. The increase of passenger business has been 11.37 per cent, and has been general on both main line and branches. The tonnage of the freight is very nearly equally divided between through and local. The through has been 48.54 of the whole, and the local 51.46. The increase in the whole tonnage during the year, has been 14.41 per cent. The reduction in local rates from causes hereinafter mentioned, has been, during the last six years, 31.42 per cent.

During the last year the reduction in local rates has been a quarter of a cent per ton per mile, and the effect upon earnings has been such, that, though the local tonnage has increased above that of last year, 95,800 tons, the local earnings have increased only $947 11.

All who read the Annual Report of the two last years were made aware of the necessity of very large expenditures for improvements, in order to put the road and its appointments in a condition to meet the demands of business pressing upon it. These improvements have been going on during the year, and are still in progress. There has been graded for double track 81¼ miles:—From Detroit to Ypsilanti, on the eastern section of the road, in addition to work before done, 23¾ miles; from Niles to Lake, on the western division, 57¾ miles. It was the purpose to have laid the track the whole distance during the year, but the wear of iron on the main track was so rapid, and it was so inexpedient to relay it with the iron rail, that more of the steel rail was absorbed there than had been anticipated.

The result has been that only 44 miles of the double track has been laid, while 97 miles of the main track have been relaid with steel, making in all, of track laid with steel rail during the year 141 miles.

There are now, in all, 192 miles of steel rail in the main line, exclusive of the double track, which is beginning, as is seen, to have a very sensible effect upon the expense of working the road. As stated in the Report of last year, it is believed that with a completed steel track this expense may be reduced to sixty per cent of the earnings.

The cost of the double track, including rails and the grading of the 81 miles, bridging, ballasting, etc., has been		$988,284 11
The cost of single track, including steel rails		1,166,153 60
		$2,154,437 71
There have been laid of side tracks, 28.13 miles, at a cost of		314,081 72
Side tracks at Chicago in the yards		8,339 16
At Jackson and Michigan City in engine house, machine shop and passenger-house		19,040 00
		$2,495,898 59
At Jackson, where so many divisions of the road centre, the machine shops have been completed, and are now just put into use. Also a round house with 52 stalls, the whole on a sale adequate to the present and probable future demands of the road. A new passenger house has been built there, suitable to the wants at that place. A new passenger house at Buchanan. A new engine house at Michigan City, with 22 stalls. At Chicago, a freight and office building, 50 ft. by 106, and three stories high. All these buildings are first-class, of stone or brick, with slate roofs. At Chicago also, a freight house has been built, of a more temporary character, but of brick, 80 ft. by 496. All costing during the year		326,121 08
Coal sheds and shutes have been erected at Jackson, Michigan City and Lawton, made necessary by the large substitution of coal instead of wood for fuel. And water tanks and works for the additional supply of water at various points, have been provided, at a cost of		29,545 39
On the Grand River Valley Division, a passenger, and grain and freight house at Eaton Rapids	$10,806 40	
And at Grand Rapids on station grounds, there have been expended	5,450 82	
		16,259 72

The necessity for enlarging the station grounds at Chicago has compelled the purchase of additional lands there, and of leasing still more at an annual rent. Lands purchased cost	60,108 58
At Detroit, also, there has been added to station grounds, land costing	106,236 00
Lands have also been bought at the Junction three miles from Detroit, for the erection of car shops and round house. The land purchased comprise nearly 100 acres and have cost, during the year	28,928 39
The construction of shops for repairing cars is now in progress upon these grounds, and by the close of this season it is hoped they may be in readiness, and all shops removed from the station grounds, which are all needed for station purposes.	
In the operating department the power of the road has been increased by 48 locomotives, at a cost of	700,000 00
Four first-class passenger coaches, with twelve wheels; ten of same description with eight wheels; sixteen second class; twelve baggage cars; twenty-five accommodation cars, and 1,235 cars of all kinds for freight purposes have been added to the rolling stock. Of these, 612 were box merchandise, and 623 were platform cars. The aggregate cost has been	1,251,282 04
On the works at the junction, viz: car shops and round house, and on the foundation of a new grain house at Detroit, there have been expended	51,743 46
These are the main items of expenditure for construction during the year, and amount to	$5,066,133 25

It is not necessary perhaps at once to complete the double track of the road for the whole distance between Detroit and Chicago, but it will be required at an early day. Including the air line it has now 145 miles double tracked, and there are to go down immediately 23 miles more, making of double track which will soon be complete, 168 miles. This is judiciously distributed, and with ample sidings elsewhere, will for the present enable the road to meet the demands upon it so far as track is concerned.

The sidings, including all upon the line and at stations, amount to 114 miles, of which forty-six have been put down in the last two years.

There should be added to the rolling stock of this company yet enough to fill up its quota in each of the through freight lines, so that it may not be compelled to pay for the use of cars running over the road as it now does. This will require about 400 additional merchandise cars.

The passenger stock of the road should be also increased. The whole track of the main line must be soon completed with steel rails. The bridge at Niles also requires to be rebuilt. Altogether there will still be necessary a very considerable expenditure the present year, but mainly for steel rail, the bridge and buildings stated to be in progress, and rolling stock, as above stated.

Stockholders may well inquire why these so large expenditures have become so suddenly required to restore and maintain the value of their property, and also if it is likely to accomplish the end aimed at. The necessity for the expenditure will be made strikingly apparent.

Allusion has been made in the reports of this company for two or three years past to the rapid construction of railroads which might affect its local traffic by competition at its local points. The effect of the intense competition for through business is probably understood by all stockholders. At Kalamazoo the road is crossed by a branch of the Pennsylvania system of roads, running far north into the State. Also by a branch of the Lake Shore and Michigan Southern to Grand Rapids. At Battle Creek it is intersected by the Peninsular road connecting with the Pittsburg and Fort Wayne, and also with the Detroit, Lansing and Lake Michigan at Lansing. At Albion and at Jackson it is intersected or reached by two other branches of the Lake Shore and Michigan Southern road. At Wayne it is crossed by the Flint and Pere Marquette. At all the important points on the main line, and at several points on the other division lines, full competition is established, and substantially the rates at all local points is as fully fixed by competition as are the through rates. The result has been everywhere a reduction of rates, and for the information of stockholders we place before them the earnings from freight, both local and through, for the years running from 1865 to 1873, inclusive of both years, stating the number of tons carried in each year, and the number of tons carried one mile in each year, and the gross earnings therefrom, and the rate of freight per ton per mile which has ruled each year:—

	Tons of freight moved.	Tons moved one mile.	Freight earnings.	Earnings per ton per mile.
1865.	485,275	72,937,319	$2,233,529 47	3.06
1866.	533,451	84,897,713	2,208,591 82	2.60
1867.	578,177	91,950,418	2,285,521 69	2.49
1868.	628,586	101,264,251	2,480,974 16	2.45
1869.	802,835	131,827,774	2,755,200 48	2.09
1870.	823,770	132,903,174	2,634,438 87	1.98
1871.	1,105,875	190,606,687	3,072,557 58	1.61
1872.	1,238,313	216,739,727	3,379,625 54	1.56
1873.	1,416,792	246,078,512	3,852,933 41	1.57

It will be noticed how gradually, but certainly, rates have been sinking from 3.06 per ton per mile in 1865 to 1.56 in 1872 with slight increase in 1873. It follows that we are doing all freight business, including local as well as through, on an average, at very nearly half what the rates were eight years ago. To illustrate the effect of this take the year 1868 as an example. This is only five years ago, and then the rates had declined from 3.06 per ton per mile in 1865 to 2.45 in that year.

The gross earnings from freight in that year were $2,480,974. In that year the surplus to be divided among stockholders after paying expenses and interest was $944,828. Now had the company been compelled to do that business that year at the rates of last year, viz., 1.56 per ton per mile, the gross receipts from freights would have been $1,579,722, instead of $2,480,974, and the difference would have been $901,251, which is very nearly the total surplus of that year credited to income account. If we had also been compelled to do the through passenger business of that year at present rates, which is about four-fifths of the then rate, there would have been a deficit in earnings even to pay interest on the debt of the company.

At that time the road was tasked to its full capacity to do its business. It has not increased its power for ten years, and its rolling stock but little. The through freight line had just been organized. The next year both power and cars were inadequate to the business, and the value of it could not be increased, with the road and its appointments maintained only up to their then standard. The result would have been an annual deficit for the last two or three years, but increasing with each year, and the company would have been bankrupt.

Now reverse the case and take the business of 1872. The freight earnings of that year were $3,379,625, with the rate per ton per mile of 1.56. Had we been able to realized the sum of 2.45 per ton per mile, the rate of 1868, the earnings from that business would have been $5,310,123, or $1,930,497 more than was realized at present rates.

On the business of the present year, which is a large increase over that of last year, the difference is still more striking. In the last year the gross earnings from freight were $3,852,933 41. The rate per ton per mile was 1.57. At the same rate as in 1868 the earnings would have been $6,028,923 54, which is $2,175,990 13 more than was actually realized. That amount has been saved to the producer in a single year by the competition which has sprung up only within the last five years. The only comfort there is in it to railway managers, is in the fact, that the rate per mile was not reduced during the last year, indicating that competition for the present has done its worst. In fact it is difficult to conceive that business can be done cheaper with any reasonably adequate profit to the railroad companies.

The corollary to be drawn from all this is as clear and certain as it can possibly be, that to have remained stationary for the past five years would have been equivalent to bankruptcy, and that within the period of eight years past, to enable the road to earn even as much as it did five years ago, it must do very much more than double the business, because rates are only half as much as in 1865. But to earn only that would not avail, because to put the road in a condition to do double the business, all its capacity of power, rolling stock, tracks and station grounds must be enlarged up to the point which will enable the road to do double the business, and even then we should be earning no more money than we were in 1865. The earnings therefore must be so much more than double, as will pay the increased cost of operation, and the interest on the additional capital, required to bring the road and all its appointments up to that degree of ability which shall enable it to do certainly three or four, or more, times the business of 1865. Much, however, it should be said in this account, may be credited to the increased economy in the management of so large a business over a perfect and ample track of steel rail, ample station grounds, convenient and adequate repair shops, both for locomotives and cars.

There remains no doubt, however, that all that has yet been done in bringing the road up to the necessities of the case, and preparing it for the increased volume of business which must pass over it, is even yet inadequate. Very much the largest share of the evident and imperative necessities have been accomplished, and to some extent the benefits have begun to be realized in the augmented business. It will require much less, however, to double the present volume than it has needed to reach it, and it does not admit of a doubt that the path of safety is to aim at that result and be prepared for it. The present low rates will never be higher, and there is this compensation in them, viz: that they turn and will continue to turn a world of business over the railroads, and those which shall be able to take it, and handle it with economy, may be and probably will yet be, as prosperous in the future as in the past.

But it is clear that to accomplish this involves double and perfect track, and more than double power, and equipment, and all else in proportion. Though it has not all been accomplished in the past two or three years on the Michigan Central a very long step has been taken towards it. Both power and rolling stock have been much more than doubled; the capacity of the track has been more than in proportion increased, and the business in the last five years much more than doubled, and in the last eight trebled. The increased earnings during the year on the same extent of road have been, as above stated, $860,705 50.

This result, however, is by no means adequate to the necessities of the case, and the increase might as well have been nearly double as to have been what it was, but for causes which may have been alluded to in former reports, but now more fully stated. While this company has observed the tendency of rates, and appreciated the imperative necessity of enlarging the capacity of the road for the necessary increase in the volume of business, required to maintain and augment its revenues, it has had no ability to control the connecting road east of it, and over which all our through business so far as it could move at all, must pass.—We refer to the Great Western Road of Canada, [illegible] be impossible to make our

stockholders appreciate or know the efforts made by the officers of this company, to induce the managers of that road in time to take such action as would enable it to receive and carry forward easily the business we should deliver to it. Certainly no means in our power have been unused. All efforts in the past have, until recently, been unavailing, and yet it is not too much to say that, during the whole of the past year, it has been clogged up with business. With the exception of work upon its loop line it has done almost nothing. While its clear duty was to provide ample sidings for the passage of trains everywhere, it has been choked at almost every point. While its power and rolling stock should have been not only ample to move rapidly the through business which we gave it, but also the business of Michigan and the other roads centering at Detroit, it has been worked with half the number of locomotives and a thousand less cars than have been found insufficient upon your road. It undertakes to do the ferry business at Detroit, but the means have been wholly inadequate, even before the winter set in. During several months, the cars could not be taken across as rapidly as was requisite, and for that period, all the time, large numbers of loaded cars, often as many as from seven hundred to one thousand, were waiting in our yards to be moved across. When winter came on—and it was the most severe by far ever known at Detroit—the difficulty was still greater, though could the freight have crossed it could not have been got over that road. For about three months, when business pressed most, this company was compelled to refuse freight from its western terminus to go through, and for two thirds of that time there were from two thousand to three thousand cars waiting the passage of the river, and when they finally passed, it was near a month before they could be got back to commence earning money upon your road. The result was to our business both unavoidable and disastrous, as it was also equally to the Great Western.

This company probably lost during the winter, from this cause alone, business amounting to about half a million of dollars, and that company nearly as much; and each company during the whole year has, including the winter loss, suffered very largely more than that, from the inability of the Great Western to meet the demands upon it, and carry the business of its road without delay, while the cost of doing it has also been to both companies very greatly enhanced.

The Great Western road is managed by a board of directors and by stockholders living in England. They are conservative and very slow to appreciate the rapid changes in this country. They cannot easily be made to understand that a great line of railroad like theirs and ours, might be totally ruined by remaining stationary in its appointments for only the four or five years past, and that not to make progress was certainly to have retrograded in earnings just as fast as rates have declined. They have not been able to realize that the increase in the volume of the business should be really in a threefold or larger proportion to the decrease in the rates of freight, in order that the revenues of the road may be maintained. It has seemed to be a satisfaction to them that they had all they could possibly do which seemed to them all that was desired. It has been only by the overwhelming pressure of business, and possibly the fear of rival roads, that the officers of that company and its stockholders have come to realize the necessity resting upon them, if they would save the value of their property. This it is believed they now do; and it gives your board and the managers of your road unqualified satisfaction, to be able to say, that company is beginning, though but beginning, to make adequate provision for present and coming business.

It is announced, and is no doubt true, that contracts are let for their double track from Detroit to Glencoe, the point where their loop line diverges to Buffalo, and the work is in progress, to be finished in time for the winter business. This will give that company two tracks from Detroit, to connect with the New York Central and Erie Railroads. They have contracted for locomotives enough to make their whole number 207, for freight cars enough to make with their present stock 4,754 for business purposes; also a new ferry-boat of large dimensions, ample new sidings for all purposes, and with enlarged shops and stations, &c., all to be ready before winter, and have provided and obtained the money therefor. These are estimated to cost $5,216,000, and with the cost of the loop line included, $9,716,000 expended, in bringing that road up to the necessary standard to meet the pressing business which has been so long crowding it. These things should have been done before and will probably, so far as power and stock is concerned, be inadequate now when done.

It is, however, so large an effort in the right direction, and evinces so clear a conviction at last of the importance of the exigency, that it is regarded as a policy now settled, that that road shall progress, and be made adequate to all the necessities of business, both now and in the future. It is doubtless the only policy which can by possibility maintain the value of the property.

The Great Western road is the most convenient outlet and inlet for the business of the whole State of Michigan, which very largely centres at Detroit. Its clear duty and interest is to command it, and not allow it to be driven off upon other lines. Yet, while it does this, it is also the most convenient connecting road for all the business of this company to and from the Great West. It should be provided with both power and cars largely in excess of those necessary for the business of this company. All its present provisions of cars and power, therefore, are likely to fall much short of the necessities to be imposed upon it in the future.

The International Bridge across the Niagara River near Buffalo, built by the Grand Trunk Company, is approaching completion, and will doubtless be ready for business before winter. The St. Clair River at Sarnia, at the outlet of Lake Huron, runs with a very rapid current, and never freezes. The Grand Trunk road starting from the Detroit Station grounds of this company and running to Buffalo, crosses the St. Clair River close to the foot of Lake Huron at the point where it is always open, and with the bridge at Buffalo will give this company an outlet for its business, even in the severest winter, which will be always open. The board, therefore, feels that to the extent of the capacity of that road this company will find relief when all other avenues fail, and that probably never again will it suffer so greatly as in the past three winters, and especially in the last.

With one open road always, with the enlarged means of the Great Western Company and another powerful ferry at Detroit, it is hoped that the business of the company may not again be interrupted until better and safer means of crossing the river by a bridge shall be secured.

The Canada Southern road, it is understood, will be completed to Detroit this season, and may also become a very important relief to the business of this company. All these increased means of business east of Detroit, create the conviction that there can be no such almost total stoppage of business in the future as in the past, and that it will move by one avenue or the other, if not by all, during the severest winter.

This company now operates as branches, under leases, the following roads:

	Miles.
The Kalamazoo and South Haven	40
The Jackson Lansing and Saginaw, just now open to Otsego Lake, and to within sixty-five miles of the Straits	212
The Grand River Valley Road	94
The Niles and South Bend	10

The rent paid for the Kalamazoo and South Haven Road is the interest on its bonds only. For the Grand River Valley Road it pays by way of rent, the interest on its bonds and five per cent. on its stock, $492,000. For the Jackson, Lansing and Saginaw it pays by way of rent the interest on its bonds, and after this year $70,000, of which, however, some more than a third belongs to this company, which holds rather more than a third of all the capital stock of that company.

That company has a land grant of 600,000 acres, largely pine-timber lands given it to help construct the road. Of this some more than a third is the property of this company in virtue of the stock so held by it. It is difficult to say what this land is worth, but it is safe to say it is of great value.

These roads are all tributary to the main line of the company.

Their gross earnings for the last year were	$1,138,821 14
The amount of business they furnish the main line is	387,517 59
The amount of the gross business of these roads and the earnings upon the main line upon the business furnished by them is	$1,526,338 73

Or about 21.33 per cent of the whole business of the company.

The Jackson, Lansing and Saginaw Road will necessarily be extended to the Straits. It is probable that soon, and it may be within a year and a half, the Mackinac and Marquette Railroad will be built, and the Jackson, Lansing and Saginaw extended to meet it. This latter road would then become a thoroughfare for both travel and freight, and an important road in all respects, and is likely to become a very valuable property independent of its land grant. It is in this connection that the Detroit and Bay City Railroad becomes very valuable to the interests of this company.

It will own north of Wenona, opposite Bay City, and from that point to the Straits of Mackinac, 175 miles of road. It runs through a country mostly timbered with both pine and hard wood. A large portion of its business will pass in and out by Detroit.

From the Straits to Marquette, a distance of about 140 miles, the State of Michigan has granted 1,000,000 acres of land to aid in constructing the proposed road between those two points. This may perhaps secure its completion before the close of next year. It will connect the road of this company, by way of the Straits, directly with the mineral regions of Lake Superior, and will make it the direct route between the east and south-east and that very valuable country.

The local business of the road north of Bay City for 175 miles must also find its way in and out largely through Detroit. It will therefore be of very great importance to this company that the lines between Detroit and Bay City, the outlet and the inlet for so long a line of local business, as well as of through travel and freight, should be owned and managed by it. This will enable it to control its own business and rates, and work with a vigor and promptness which would be impossible if its business there must go over the roads of one or two other companies, in its way to and from Detroit.

These considerations have induced the Board to aid the Detroit and Bay City Road to some extent, with a view of controlling it, but without incurring any large obligations. There were subscribed along the line of that road, to aid in building it, $300,000, and a first mortgage bond was placed upon it to the amount of $20,000 per mile at eight per cent. With these the road has been built in a very substantial manner. It is just now about being opened for use to Bay City. This, with our line north of Bay City, will make very nearly an air-line from our own station grounds to the Straits of Mackinac, and will be the short route for all business to and from the upper Peninsula of Michigan; and our own local business, as well as all through business upon our northern line, will start from and come upon our own station grounds in Detroit.

By the terms of the construction contract, the contractor was to have the bonds, local aid, and $11,000 of stock per mile for building the road,

and ironing it, and building station houses and all appurtenances. The managers of this company, acting in its interests, and upon the request and by agreement with the contractor, undertook to place the bonds and furnish rolling stock, and operate and manage the road, in consideration of the transfer of the stock to this company; and this has been done with no other obligation whatever on the part of the company, except that it took itself, and has sold with its guarantee, 274 of the bonds.

Two-thirds of the whole stock of that company are the property of the Michigan Central Road, and this company controls, operates and manages it, running its own equipment over it, and charging a reasonable price for the use thereof.

The importance of controlling this road, however, was so great, in connection with the road north of Saginaw Valley, and the business of this company there to and from the West, that the Board would have failed in its duty to the stockholders had it not acceded to the easy terms upon which it could be controlled, and more especially when there was a near prospect of the whole route from Detroit to Marquette becoming a large and valuable through as well as local route. There is no obligation in any form to guarantee other than above stated any bonds or income or rent. The Board, however, anticipate that the road presently will earn enough to pay its interest, and soon will earn enough to pay for the use of rolling stock in addition, and that with the connections made with Marquette, it will become a valuable property in all respects. None who are familiar with the management of railways will fail to appreciate the importance to us of controlling the link which shall connect so long a line of road belonging to this company in the north with its own business station at Detroit, and giving it the command of the business of the whole line.

The Board regret to state, that the work upon the small tunnel under the Detroit River, undertaken in part as a drainage sewer for the main tunnel, but also to test the nature of the earth under the river, has developed such difficulties, as to compel them reluctantly to abandon that work.

It is not necessary to describe those difficulties. Suffice it to say that the work of completing the small or drainage tunnel was originally estimated to require six months. At the end of two years, the chief engineer states, that it may possibly require six years to complete it. Fortunately he would not allow any expenditure upon the main tunnel, until he was made certain of its feasibility, by that experiment. No large amount of money has been, therefore, expended in the work. It became certain, that it would be several years before the main tunnel could be commenced, and a much longer time before it could be finished, if it were by possibility feasible at all. It was also clear that with the difficulties developed, it would involve a very much larger amount of money than could be commanded for that work. The only alternative is a bridge. At the last session of Congress a resolution was passed directing the Secretary of War to appoint a Commission of Engineers, to investigate and report, as to the feasibility of a bridge or bridges across the river. That Commission is now engaged in its duties, under an order of the Secretary, and will report at the next Congress. The necessity is so great, and it is so important for all interests in the West, that they should be built, that it is believed the report will be favorable. In that case within a year, a bridge at Detroit could be built, and all winter difficulties by the most convenient railway route, would be at an end.

In concluding this report the Board may remark, that the last few years have made a great revolution in the business of railroads in this country. Continuous lines have become practically one road. All through business is done in through or line cars. The grain of the country is now moved half the year, mainly by rail, and largely at all times. That business is without limit, and is far beyond the ability of all railroads now built or likely to be built. It must be done at low rates, but present rates command it. With ample power and rolling stock—perfect and permanent double steel track—there seems to be, in the judgment of the Board, no good reason why the increasing volume of business may not much more than make up for the decreased rates. The revolution has been so sudden, and great also, that the difficulty has been to prepare the roads for it, and enable them to meet the emergency. No effort to accomplish this for the road of this company has been spared by the Board, and on the whole, though there have been, and still are, great difficulties in bringing all parts of the line between Chicago and the Bridge, up to the requirements of the business of the country, yet upon the whole the effort is about to be successful, and there is no good reason why in the future the road may not be as prosperous as in the past.

The total number of passengers carried during the year was 852,352, of whom 148,245 were through, and 704,107 way. Total number of tons of freight moved, 1,416,792. Tons carried one mile, 246,878,512.

The company have 210 locomotives. Miles run by locomotives with passenger trains, 1,030,894; with freight trains, 1,584,274; working trains, 376,246; switching trains, 1,101,457—total, 3,992,871.

The cars are classified as follows: 68 12-wheel and 10 8-wheel day coaches, 36 12 wheel and 4 8-wheel second class, 3 railway postal, 42 baggage and mail, 92 conductors, 503 stock, 1,847 merchandise, 475 Blue Line, 21 refrigerator, 1,338 platform, 2 derrick, 2 pile driver, 175 hand, and 113 rubble cars.

INCOME ACCOUNT.

Balance from previous year		$899,889 95
Receipts of road from June 1, 1872 to June 1, 1873		5,832,067 29
		$6,731,957 24
Dividend 5 per cent in cash, payable July 5, 1872		$899,345 00
Dividend 4 per cent in stock, payable Jan. 27, 1873		719 656 00
Expenses, including taxes		3 876,243 26
Interest account		140,952 36
Loss in operating Branch roads		370,794 21
Balance to new account		724,965 91
		$6,731,957 24

From the report of the treasurer we learn that the bonded debt has been decreased during the past year by the retiring of the sterling bonds maturing July 1, 1872, amounting to $467,488 89, and by the conversion of $31,500 of the bonds of 1882 into stock. An increase in the bonded debt has arisen from the issuing of $7,000,000 of the seven per cent bonds of 1902, so that the bonded debt now amounts to $9,735,000.

The sum invested in the sinking funds of the company amounts to $1,630,054 03, which deducted from above leaves $8,104,945 97 as net bonded debt of the main line.

The capital stock has been increased by the amount of the dividend of January 27, 1873, and conversions of bonds, and now amounts to $18,738,204.

Construction account now amounts to $24,536,880 92.

All the interest on the $7,000,000 seven per cent bonds has thus far been charged to construction account, there having been very little benefit received during the year, from the expenditure.

TRIAL BALANCE, June 2, 1873.

President.—JAMES F. JOY.

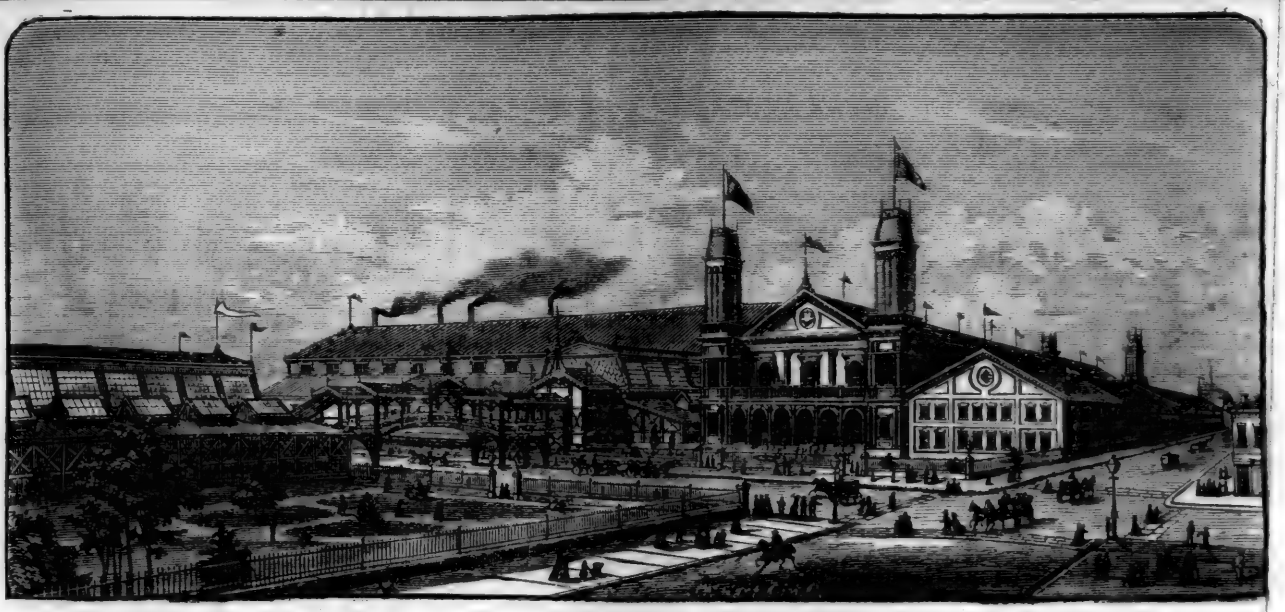
Vice President.—H. H. HUNNEWELL.

Directors.—James F. Joy, John W. Brooks, Nathaniel Thayer, H. H. Hunnewell, George F. Talman, Moses Taylor, Sidney Bartlett, John Jacob Astor, Erastus Corning.

Treasurer.—ISAAC LIVERMORE.

Vice-Treas. and Clerk.—JOSHUA CRANE.

General Superintendent.—H. E. SARGENT.



Auditor.—WILLIAM BOOTT.

☞ Articles of association were filed in the office of the Secretary of State at Trenton, N. J., on the 5th inst., organizing a new railroad company to construct a road from some point in the township of South Amboy, Middlesex county, to a point in Mansfield or Bordentown, in Burlington county, a distance of thirty-four miles, running through Middlesex, Mercer, Monmouth and Burlington. The capital stock is $500,000, divided into five thousand shares.

☞ The Millersburg *Farmer* has information that the Cleveland, Mt. Vernon and Columbus Railroad "will be opened to Columbus by the first of September, and that an express and mail train will be run each way, leaving Cleveland in the morning and Columbus in the afternoon."

Cincinnati Industrial Exposition Buildings, 1873.

We present our readers above with a view of the buildings of the CINCINNATI INDUSTRIAL EXPOSITION, in which the Fourth Annual Exposition is to be held from September 3 to October 4, 1873.

This great Exhibition, which is the foremost among similar enterprises in this country, is already well known to many of our readers, but we give some details which are of general interest.

The buildings are situated in the heart of the city, and are five in number, including the Art Hall, which is connected with the rest by a bridge across Elm street, shown at the left of the picture. They furnish to exhibitors nearly eight acres of space, the Power Hall alone comprising over an acre of every variety of machinery in motion. The Exposition is divided into sixteen departments, and each of the great halls is filled with the myriad products of American industrial enterprise, displayed in the most attractive forms and with endless profusion. It may be justly termed a popular school of art and industry, teaching by object lessons of the most vivid and attractive description.

Its immense popularity is partly due to the central location of Cincinnati, but mainly to the liberal character of its management, which is in the hands of the three commercial associations of the city. There being no stockholding interest, all its revenues are directly expended in increasing its popular attractions, while the high character and impartiality of its awards has made them eagerly sought after by exhibitors from every part of the Union. The national character of the Exposition is indicated by the half-fare arrangements which last year extended over 15,000 miles of railway, or nearly one-third the entire mileage of the United States; and by the attendance of over 600,000 visitors. A large increase is expected this year, under the newly adopted system of school excursions at reduced rates of admission.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of July, were :

ENTERED FOR CONSUMPTION.

	1872.	1873.

Total entered warehouse.	$30,549,205	$24,184,890
Add entered for consump.	55,328,221	48,453,382
Total entered at the port..	$85,877,426	$72,638,272

Timber for Ties.

The question of timber supply for the use of the railroads of the country is fast getting to be a pressing one. Already wood has become dearer than coal for locomotive purposes on most of the great roads. But the most important decrease feared is in timber suitable for ties—oak and locust. On this point the St. Louis *Democrat* says :

The locust is considered the most durable, but the best of either must be renewed every eight years. For every 1,000 miles of railroad there must be a 125 miles of ties cut every year. Mr. Talmage, Superintendent of the Atlantic and Pacific Road, has been considering this matter, and has ordered an immense area along the line of his road to be immediately planted with locusts, either from the seed or from young trees. He intends to make this a permanent part of the business of the road and its employes in sections of country in which it is possible; and he believes that other lines will have to start 'locust farms' before long also.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending August 2, at 427,781 tons, and for the coal year 10,776,712 tons, against 10,572,948 tons to corresponding time last year, being an increase of 203,764 tons. The bituminous tonnage for the week is 21,620 tons, and for the year 1,750,351 tons, giving a total of all kinds for the week of 448,301 tons, and for the year of 12,736,137 tons, against 12,362,818 to same time last year, being an increase of 373,319 tons.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "$."

American Railroad Journal.

Saturday, August 16, 1873.

Stock Exchange and Money Market.

Money has been in more active request, and rather firmer in price, with call loans quoted at from 3@5, and strictly choice to very good discounts at 5½@8 per cent per annum. At these figures, the wants of all responsible borrowers have been quite promptly met, both at bank and through private channels, the available supply having been ample for all present requirements. The city banks, though reporting some loss of reserves, were free in their offerings of aid to their regular customers, and on their loan and discount averages, they reported an increase of $771,900. They closed the week with $12,735,650 more of lawful money than the requisite 25 per cent. reserve. The corresponding week last year they held $6,534,800, and in 1871 $14,869,477. The specie held last week was $29,820,000, in 1872 $18,199,000, and in 1871 $12,361,749. Last week the legal tenders in the banks amounted to $49,002,800, in 1872 $54,570,600, and in 1871 $72,390,400. The U. S. Sub Treasury, last week, added liberally to its currency reserve while reducing its coin hoard. The city banks last week reported a loss of nearly 1¾ millions in their deposit line with a decrease of more than a million in their legal tender, and of nearly a million in their specie reserves. They enlarged their loan and discount averages nearly ¾ths of a million, and their circulation slightly.

The city banks have been losing ground on their obligatory reserve, the last statement showing that they had $12,758,400 more than the 25 per cent reserve which the national banks are required by law to keep on hand. The U. S. Sub-Treasury, last week, reduced its coin balance about 1⅛th million, and enlarged its currency reserve nearly 1⅜ million. Its currency reserves at the close of the week were $30,907,913; and its coin hoard, $42,421,627.

The clearances of the city banks averaged through the week about 70⅛ millions a day, and amounted in the aggregate, for the whole week, to $420,989,757, as against $465,712,370 the preceding week. The U. S. Sub-Treasury at this point enlarged its currency balance $1,310,164 and reduced its coin reserve $1,181,557 as the result of the week's business.

The cash balances in the U. S. Treasury Department on Tuesday were: Currency, $10,327,831; special deposits of legal tenders for the redemption of certificates of deposit, $34,670,000; coin, $81,641,512; coin certificates, outstanding, $44,026,000; outstanding legal tenders, $356,000,000.

The specie reserve of the city banks according to the latest return is $29,820,000, against $18,199,000 same time last year. The city bank deposits are now $237,123,100 against $237,668,200, week ending Aug. 10, 1872. The legal tender reserve amounts to $49,002,300, against $54,570,600 same time last year. The circulation now stands at $27,223,500 against $27,313,000 same time last year. The loans are now $290,758,100 against $299,386,500 at this date last year.

The coin reserve of the city banks is now about 29⅞ millions, as against about 15 millions Feb. 21, 1873, and about 25¾ millions on the 20th of last July; the legal tender reserve is a little over 49 millions against about 34⅞ millions April 5th, 1873, and 55½ millions on the statement of June 15th, 1872; and the deposits are now about 287⅛ millions, against 186⅞ on the 12th of April, 1873, and 247½ millions on the 20th of July 1872.

Government revenues have been up to a fair average, since our last. The excises yielded within the week about 2⅛ millions, and thus far in the current fiscal year commencing with July 1, 1873, $11,829,998. The customs at the port of New York, for the week, were $2,773,720, and at the outports, about $925,000 more, in coin or coin certificates.

The U. S. Sub-Treasury office last week received $3,756,634 of currency, and $4,492,253 of gold, the latter including $2,885,000 from customs; and disbursed $2,446,470 of currency and $5,673,810 of gold, the latter embracing $1,496,405 of coin interest.

Under the Treasury programme for August, Government proposes to sell Gold, as follows: Thursday, August 21, $1,500,000; Thursday, August 28, $1,500,000.

The Gold speculation has been of minor interest and attractiveness, during the week, and the price has shown less firmness, closing with rather a downward tendency. The customs call has been moderate for the season, and the export drain light. The range of the price during the week has been from 115⅛@115⅝, and the quotation on Wednesday was 115⅛ against 115⅜ on Wednesday of the preceding week. The specie outflow last week, was $723,405. The Gold Exchange Bank clearances have averaged about 41½ million per day during the week.

The customs demand for Gold last week, averaged $480,834 a day. The arrivals of specie from Europe, Havana and other foreign ports during the week were $79,139 and thus far in 1873, have been $2,176,151, against $2,797,422 in 1872. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1873, has been $78,057,060 against $92,691,278 during the same time in 1872.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1873, $50,608,129, against $55,778,110 during the same time in 1872.

The export drain of specie was $723,405 last week, against $377,226 same week preceding year. The shipments since January 1, 1873, have been $38,628,574 against $54,661,509 during the same portion of 1872.

Foreign Exchange has been in less demand and at the close weaker in price, with a freer offering noted of prime bills. Bankers' sixty day bills on London closed on Wednesday at 108⅛@108⅜; sight bills on London, at 109¼@109⅝. The week's exports of Domestic Produce have to the currency value of $5,276,814.

Government securities have been in very good demand, throughout the week, at generally buoyant prices, though toward the close, values showed rather less firmness, influenced mainly by the depression in Gold.

On Wednesday, Government bought in only $15,500 Five Twenties at $115 12 out of an aggregate offering of but $25,500 at $115 12@$5 24.

U. S. sixes of 1881 closed on Wednesday of this week at 119⅞@120⅛; U. S. Five-Twenties of 1862, 117¼@117½; U. S. Five-Twenties of 1864 at 117⅜@117⅝; U. S. Five-Twenties of 1865 118⅞@119⅛; U. S. Five-Twenties of 1865 consolidated 117⅜@117⅝; U. S. Five-Twenties of 1867, 119¼@119⅜; U. S. Five-Twenties of 1868, 118@118¼; U. S. Ten-forties at 115⅜@115⅝; U. S. Fives of 1881 (Funding Loan) 114⅝@114⅞; Six per cent. currency Sixes from 113½@114.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	July 30.	Aug. 6.	Aug. 13.
Consols	92⅛	92⅞	92⅞
U. S. 5-20s, 1865	94¼	94¼	94⅝
" 1867	94⅛	94¼	95
" 10-40s	91¼	91¼	92
New Fives of 1881	90⅝	90¾	90⅞
Erie	46⅛	46⅞	47¼
Ill. Central	....	84	86

The Railway and Miscellaneous share speculation has been less active, and prices have been variable, closing, however, somewhat steadier.

State bonds have been in fair request at generally steady prices.

There has been a more satisfactory investment inquiry noted for Railway Mortgage Loans at generally full prices. Central Pacific Sixes have been in good request at from 100⅛@100¼. The earnings of the Central Pacific Railroad in July were

$1,211,765, and thus far in 1873, $7,532,553, against $6,781,126 same time in 1872. The Chesapeake and Ohio Seven per cent gold bonds have been more freely purchased at 90, and interest. Chesapeake and Ohio Sixes have been in good demand at 88½ and interest. Western Pacific Sixes at 92½@92¾. The Northern Pacific 7-30 Loan has been selling quite freely at par and interest.

There has been rather more animation in general business. Hardware has attracted more attention. Groceries have been in better request. Metals have been irregular. Copper has been in fair demand with sales reported of 150,000 lbs. at 27¼c.@27½c. Iron has been quoted easier and irregular, with rather more doing; sales, 250 tons Scotch Pig, at our quotations; 800 tons Nos. 1 and 2 American do. at $46@$42. We quote: Eglinton Pig at $44; Glengarnock, at $45; No. 1 American Pig at $44@$46; No. 2 do. at $38@$42; English rails at $64@$65, gold; American Rails, at works, at $74@$78; Old Rails $46@47; Wrought Scrap, $42@$44. Pig Lead has been in rather better demand with foreign quoted at 6½c.@6⅝c., gold, for ordinary, on sales of 75 tons at 6½c., gold. Spelter quiet at 7½c.@7⅝c., gold; sales, 50 tons. Pig-tin has been inactive, with Straits quoted at 31¼c.@31½c., with English at 29c., and to arrive 28½c., and Banca, at 34¾c., gold. Tin Plates quiet; sales, 250 boxes Charcoal at $11, gold; Charcoal Plates quoted here at $10 87½@$11 25; Charcoal Terne, $8 75@$10 25; Coke, at $8 50@$9; Coke Terne, $7 75@$8 50, gold, per box. Zinc nominal.

In domestic produce a livelier movement has been noted, with Breadstuffs quoted much stronger in price. Cotton, Hay, Petroleum, and Naval Stores, cheaper; Provisions, unsettled. Middling upland Cotton left off tamely at 19¾c. per lb. The receipts at all the ports, since Sept. 1, have been 3,568,454 bales, against 2,671,791 bales same time in the preceding year; exports 2,624,168 bales against 1,936,760 bales in the previous year; stock at the ports at latest dates, 150,960 bales against 90,660 bales same date in 1871.

Foreign goods have been quite active, and quoted steadier in price. The week's imports of foreign goods and merchandise amounted to $6,985,841 including $2,814,907 of dry goods.

Ocean freights have been more active, and rates have been quoted much firmer, with the main inquiry for Grain and Petroleum room.

At the Live Stock Markets, Beeves have been in good demand at from 7@13 cts. Veals at 5@8½ cts.; Sheep at from 4¼@6½ cts.; Spring Lambs 5½@9 cts.; Swine at 5¼@5½ cts. per lb., all live weight. The week's receipts were 9,835 Beeves, 3,370 Veal Calves, 27,726 Sheep and Lambs, and 30,506 Swine.

☞ The Chicago, Burlington and Quincy Railroad Company has declared a dividend of five dollars per share, payable September 15, 1873, to stockholders of record the 23d instant, after which date the transfer books to remain closed till September 18.

Milwaukee and St. Paul Railway.

We recently had occasion to pass over the line of road from Milwaukee to St. Paul, and had an opportunity to notice the amount of travel on the Mississippi river division of the road. At St. Paul it is admitted that the Milwaukee road takes at least three passengers to one taken by the West Wisconsin and Chicago and Northwestern. The river division, which passes through Hastings, Reed's Landing, Winona, etc., is a delightful summer route. When this division was added to the lines of the Milwaukee and St. Paul Railway, it was really a great acquisition, as the grades are very light and the route uncommonly attractive to travelers; and in fact with the river division in the possession of the Milwaukee and St. Paul Railway Company, no other line can compete with it for the travel to St. Paul and Minneapolis. On all the lines of the Milwaukee and St. Paul Railway Company, Manager Merrill has infused his indomitable energy and his known determination to have every thing just right; the cars are maintained in that neat and seemly condition which add so much to the pleasure of the traveler. Some portions of this line from Milwaukee to St. Paul require to be relaid with new iron, as the track is at places irregular, and we have no doubt that the company will during the current year do all that is required in this direction, inasmuch as all new extensions are stopped.—*Mil. Wis.*

Illinois Central Railroad.

The statement of this Company for the month of July, 1873, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	2,234.81	for	$18,381 15
Acres Interest Fund Lands Sold	.....	for	.....
Acres Free Lands Sold	40.00	for	640 00
Total sales during the m'th of July, 1873	2,274.81	for	$19,021 15
To which add Town Lot Sales	.....	for	.....
Total of all	2,274.81	for	$19,021 15
Cash collected in July, 1873			$36,545 05

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois. 707 Miles.	In Iowa. 402 Miles.	Total. 1,109 Miles.
Freight	$353,319 00	$81,848 00	$435,167 00
Passengers	111,199 25	39,476 15	150,675 40
Mails	6,375 00	3,059 24	9,434 24
Other sources	75,125 00	2,515 76	77,640 76
Tot'l July '73	$546,018 25	$126,899 15	$672,917 40
Total actual earn'gs, July, 1872	$499,069 36	$110,776 97	$609,846 33

☞ During the month of July last the total value of the exports from the port of Philadelphia was $3,387,784 against $2,218,910 in July of 1872. Of the shipments last month $2,648,487 were in foreign vessels and $739,297 in American vessels. The same month last year $1,784,207 was in foreign vessels and $484,703 in American vessels. The total exports from the port for the seven months of the calendar year were of the value of $15,443,863, against $10,556,667 in corresponding time last year, an increase of $4,887,196.

☞ At a meeting of the directors of the Atlantic and Pacific Railroad Company, held in this city on the 9th inst., Thomas A. Scott, of Pennsylvania, was elected president; Andrew Pierce, Jr., vice president and general manager, and General Clinton B. Fisk, of St. Louis, treasurer. John Edgar Thomson, Thomas A. Scott, Alfred L. Dennis and David Salomon, of the Pennsylvania Railroad, were elected directors.

Lynchburg and Danville Railroad.

The Chatham (Va.) *Tribune* states that the grading of the last twenty miles of the Lynchburg and Danville Railroad was completed on the 30th ult., by the contractors, Messrs. Lyons and Fitzpatrick. The work on this contract was very heavy, including considerable cutting and blasting. The other contracts, which were lighter, were concluded several months ago. Messrs. Lyons and Fitzpatrick, with their mules, carts and implements, passed in procession through Chatham on the 31st, the former en route for Maryland and the latter for North Carolina, where each have entered new contracts. Their work on the Lynchburg and Danville road is regarded as complete in all its details. The pillars and abutments constructed by them for the railroad bridge over the Cherrystone creek, near Chatham, are also spoken of as composing a fine specimen of masonry.

☞ Work upon the Martinsburg and Potomac Railroad is being pushed forward rapidly, and it is confidently expected that the road will be open for travel by the 1st of September next. It has already been leased by the Cumberland Valley Railroad Company, and will be in operation by it, so that the whole line of road extending from Harrisburg to Martinsburg, a distance of about ninety-eight miles, will be under one management.

☞ The improvements on the canal at Sault Ste. Marie have finally been decided upon, and the contract has been let to Messrs Boyle & Roach, of Cincinnati, for $300,000. The lock will be make 450 feet in length, 80 feet in width, and 15 feet deep. The canal will be closed on the 16th of November, and the contractors promise to have the work completed before the opening of navigation in the spring of 1874.

☞ The two railroad companies known as the Camden and Medford, and Manchester and Camden roads, have been consolidated. The roads will now be built and operated under one management, and run in connection with the one now being laid from Keyport on the Raritan Bay, by way of Farmingdale to Camden.

☞ The directors of the Lewiston and Auburn (Me.) Railroad have been over the line, and express satisfaction with the manner in which the work is going forward. The Grading is nearly completed to the Little River, and will be all done in a few weeks. The directors say the road will be ready for running before winter.

☞ The earnings of the Erie Railway Company for the week ending July 31, 1873, were $445,891, and since July 1, $1,685,384—an increase over the corresponding period of the previous year of $166,473.

☞ The estimated earnings of the Kansas Pacific Railway for the week ending July 31, are: freight, $68,242 56; passengers, $41,836 87—total, $110,079 43.

☞ The earnings of the Michigan Central Railroad and branches in June, 1873, were $608,955 09, against $505,814 29 in June, 1872—an increase of $103,640 80.

☞ The contractors on the Baltimore and Drum Point Railroad, it is said, have greatly increased their working force, and are now making very favorable progress in grading the road.

☞ BANKING HOUSE OF FISK & HATCH,
NEW YORK, Aug. 11, 1873.

The **SEVEN PER CENT. BONDS OF THE CHESAPEAKE AND OHIO RAILROAD COMPANY** are issued in the denominations of $1,000 each, interest payable July and January, both principal and interest payable in United States Gold Coin, in the City of New York. The price of these bonds for the present is 90 and accrued interest—that is, a $1,000 bond would cost to-day $907 86. At the present price of gold the income derived is equal to nearly nine per cent. in currency. With the rapidly increasing business of the road, its commanding importance as another great east and west trunk line, its complete roadway of 420 miles, the princely wealth of **iron, coal, salt, and timber,** along its route, its tapping at its Western terminus on the Ohio River, over 12,000 miles of water navigation, it Eastern terminus resting on the tide waters of the Atlantic Ocean, and the fact that the other great parallel trunk lines are being compelled to lay additional tracks to meet the enormous and steadily augmenting traffic between the East and West—all warrant us in our belief that the securities of the Chesapeake and Ohio are destined to attain a high rank in the markets of the world. At present, Government bonds are so high, and really desirable permanent investment securities at a reasonable price so difficult to be obtained, it is very gratifying to us to have these bonds for our friends and customers.

We also have a small amount of the **OLD SIX PER CENT. GOLD BONDS OF THE CHESAPEAKE AND OHIO;** the price of these is 88½ and accrued interest. They are issued in denominations of $100, $500, and $1,000, interest payable May and November. Underlying as they do a property that has cost nearly $38,000,000, and which is constantly increasing in value, they need no recommendation. The small remaining balance will soon be absorbed.

$100 bond will cost to-day $90 18
500 bond will cost to day 450 88
1,000 bond will cost to day 901 77

We also buy and sell the **Central and Western Pacific Gold Bonds** at the market price.

The Central Pacific Company has now over 1,200 miles of completed road, and its earnings this year will reach upward of $13,000,000. Their securities should rank with those of the Government itself.

We also continue to deal in Government Bonds, execute orders at the Stock Exchange for investment Stocks and Bonds, receive deposits on which we allow interest at the rate of four per cent. per annum, and conduct a general banking business.

FISK & HATCH.

☞ The earnings of the Central Pacific Railroad for the month of July, 1873, were $1,211,765, against $1,272,510 in July, 1872, and $869,296 in July, 1871. For the first seven months of 1873 the earnings have been $7,532,553, against $6,781,126 for the first seven months of 1872, and $4,914,179 for the first seven months of 1871—an increase this year over 1872 of $751,427, and over 1871 of $2,618,374.

Journal of Railroad Law.

RAILROAD COMPANIES—MEASURE OF DAMAGES FOR INJURIES RESULTING FROM NEGLIGENCE OF DEFENDANT—PROPER TIME TO LEAVE A RAILROAD TRAIN.

The facts in the recent case of The Toledo, Wabash and Western Railway Co. *vs.* Baddeley, (54 Ill., 19), are fully and clearly stated in the following opinion by—

BREESE, C. J.—This was an action on the case against a railroad company to recover damages for an injury to the plaintiff, a passenger on the train, occasioned by the negligence of the company, and a verdict for plaintiff of $10,000, one-half of which was remitted by the plaintiff, and judgment entered for $5,000.

The defendants bring the record here, by writ of error, assigning various errors.

The first relates to the refusal of the court to exclude the deposition of the plaintiff, for the reason it was taken before a notary public. This is not a valid objection to the deposition, inasmuch as, by the third section of Ch. 76, entitled "oaths and affirmations," express power is given to notaries public "to take affidavits and depositions concerning any matter or thing, process or proceeding, depending or to be commenced in any court or before any justice of the peace, or on any occasion wherein such affidavits or depositions are authorized or required by law to be taken." R. S., 393.

That this power is plenary, so far as notaries public are concerned, cannot be questioned; and the practice has been uniform and unchallenged throughout the States to take depositions before such an officer.

Another reason for excluding this deposition was urged, that the notice to take it did not show that the witness was a resident of a different county from that in which the court was held.

The notice, as appears by the record, has the venue, Ford county, that being the county in which the suit was pending and to be tried, and notifies defendants that the deposition will be taken at the residence of the plaintiff in Champaign City, Illinois, on a day named. This is a sufficient compliance with the statute, as it gives "time and place." As the action was brought in Champaign County, the inference would be fair, that was the county of plaintiff's residence, and it is a county different from the one where the suit was pending.

The objections to particular interrogatories, and the answers thereto, were properly disposed of by the court; and here we may say, it is not the proper practice to make objections to depositions on the trial of a cause, as these appear to have been made. They should be made and disposed of before the trial, in order, if defective, the party taking them may have an opportunity to remedy the objections, and for such purpose, ask a continuance.

As to the merits of the case, the testimony is very conflicting, indeed, on the strength of which, the jury would have been warranted in coming to a conclusion against the plaintiff, and, had they done so, the court would hardly be justified in setting the verdict aside as being against the weight of evidence. There are numerous cases in this court to that effect.

As this court said in Crain *vs.* Wright, 46 Ill., 107, and in many other cases where the evidence is conflicting, it is the duty of the jury to reconcile it so far as it can reasonably be done, and so far as it is irreconcilable to reject such as they may believe, from all the circumstances, was the result of mistake or misapprehension, or from other causes is not reliable, and to give credit to such as they believe to be true. Juries see the witnesses, and from their manner, their intelligence, and opportunities of being informed, can determine the weight their evidence should receive, and unless it is clear the jury have mistaken the weight of the evidence, and their verdict is manifestly against it, this court will not interpose to set aside a verdict, and reverse the judgment rendered upon it. Voltz *et al.*, *vs.* Stephani *et al.*, *ib.* 54, is to the same effect, and it has long been the settled doctrine of this court.

We cannot say, in this case, the jury have mistaken the weight of the evidence, and consequently cannot disturb the verdict.

An objection was made by defendants on the trial to a question to this effect, put to the attending physician of plaintiff: Have these injuries affected the mind of the plaintiff?

It is insisted by defendants, that, as the act was not willfully done, the mere mental suffering resulting from it forms no part of the actionable injury, citing a note in 2 Greenleaf on Ev., sec. 267. The authority referred to by the author of that treatise is Flemington *vs.* Smithers, 2 Car. and Payne, 292. In the test, the author says: Injuries to the person or to the reputation, consists in the pain inflicted, whether bodily or mental, and in the expenses and loss of property which they occasion; and the jury in estimating damages may consider not only the direct expenses incurred by the plaintiff but the loss of his time, his bodily suffering, and, if the injury was willful, his mental agony also.

It will be perceived the question put has no reference to this effect upon the mind. Mental suffering, such as a person is supposed to undergo when writhing under the infliction of a willful injury, is not involved in the question. The answer of the witness shows he did not understand it, for he says: "Yes, sir, so much so, he is almost incapacitated from doing anything at all; at this time he cannot recollect anything more than ten minutes; at times he loses his mind entirely." The effort was to show by this witness the shock to plaintiff's system by the fall, and consequent amputation of his arm, was so great as to deprive him, in a great measure of mental power, and this was a legitimate subject of inquiry. In the opinion of this witness, the injury was permanent, and of the most serious and distressing character.

This question was followed by another, to which objection was made. It was this: "What will be the effect of these injuries on his future condition?" "The answer was: "I think it will result in death before many months; he may live one year." Defendants insist that no man, physician or otherwise, can tell what the future condition of an injured person will be. This may be true, and this physician did not pretend to say what his future condition would certainly be—he merely expressed an opinion on the facts, on the medical knowledge he had, and of physiology. He was a physician of year's practice, and must have been quite ignorant if he could not form an opinion on the probable effect of such injuries on the human system. It may be he was mistaken, but his opinion on the subject was proper for the consideration of the jury.

All the evidence of this character objected to by defendants was admissable under the declaration, to the benefit of which the plaintiff was entitled. 1 Ch. Pl., 398. Frink *et al.*, *vs.* Schroyer, 18 Ill., 416; Slater *vs.* Rink, *ib.* 527, and many other cases to the same effect.

An objection is made to the instructions given for the plaintiff, especially the second, in which the jury are told these companies must exercise extraordinary care. It said the court did not explain to the jury what was extraordinary care, leaving it to each juror to put his own construction on the phrase. We think this objection is rather hypercritical. Had the court used the phrase the strictest care, or any other phrase implying a care more than ordinary, no one would think the court should give an explanation of it. So where the phrase extraordinary care was used the jury could not fail to see that something more than ordinary care was required, something extra, beyond that degree. It does not differ from the phrase greatest care, utmost care, the highest degree of care, and so the jury would understand it.

The fourth instruction given for plaintiff is objected to. It was this: "The jury are further instructed, that a passenger is entitled to a reasonable time to leave the car in which he has been riding, when a train is stopped for that purpose; and what will constitute a reasonable time depends upon the age and physical condition of the passenger, as well as the time, place, and facilities for getting off the train, which the jury are at liberty to consider in determining whether or not such reasonable time has been allowed."

If the instruction was designed to be understood that the age and decrepitude of a passenger must determine the time of the stoppage of a train on its arrival at a station, it would be objectionable; but it is not to be so understood. Its extent is, that railroad companies must afford a reasonable time to passengers, whether young or old, to leave the cars in safety; and if the time table does not allow sufficient time for this purpose, and an injury is thereby occasioned, the company would be liable therefor.

The eighth instruction given for the plaintiff is objected to on the ground that the mental suffering of the plaintiff was not a proper element to enter into the consideration of the jury, the injury not having been willful.

There was no evidence before the jury of mental suffering by the plaintiff. The proof was that his mind was almost totally destroyed; and it must have been in view of such a condition that the jury received the instruction. They could not have been misled by the language in which the instruction was crouched; and, as given, it was more favorable to the defendants than if the attention of the jury had been called to the fact of an entire breaking up of that most important faculty, on which human happiness so much depends.

There is no argument upon the point that the damages are excessive, and we forbear touching that subject.

Perceiving no error in the record which would justify us in reversing the judgment, the same must be affirmed.

Judgment affirmed.

Cairo and Fulton Railroad.

The first passenger train on the Cairo and Fulton Railroad passed south to the Little Missouri River on the 7th inst. The Little Missouri is 20½ miles below Arkadelphia, and 92 below Little Rock. It is expected that the road, which is in rapid process of construction, will be finished to Fulton, Arkansas, by the 1st of September. This point was to have been the original terminus of the road, but it has been decided to extend it to Texarkana, twenty miles, where it will connect with the Texas and Pacific Railroad. The entire line will be completed early this fall.

Statement of the Public Debt of the United States August 1, 1873.

DEBT BEARING COIN INTEREST.

	Amount Outstanding.	Accrued Interest.
5 per cent. bonds, 1858	$20,000,000 00	$83,333 33

Interest paid by United States, $20,447,986 26; interest repaid by transportation of mails, &c., $4,225,563 55; balance of interest paid by United States, $16,222,132 71.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, July 31, 1873.

WILLIAM A. RICHARDSON,
Secretary of the Treasury.

The Coal Fields of Allegheny County.

The great Allegheny Coal Field of bituminous coal covers an area of 55,000 square miles. It commences at the western base of the Allegheny mountains, Chestnut Ridge and Laurel Hill, spreading its seams west and southwest through portions of eight States. After this coal field leaves Pennsylvania it gradually decreases in width as it passes through portions of Ohio, Maryland, West Virginia, Kentucky, Tennessee, Alabama, and terminates in Georgia. In this Allegheny coal field, that portion of it which is located in the southwest part of Pennsylvania, is located the Pittsburg coal bed. This bed does not exist west of the Ohio River to any great extent, and consists of three layers or stratas. The first is the main breast; over this is a layer of clay, and lastly, another bed of coal. As a general thing the miners do not care to dig the top strata of coal, but content themselves by extracting the lower seams. Five or six feet is the usual thickness of the main breast in Allegheny county. About five miles from Pittsburg is the northern out-crop, and near Beaver is the southern.

Nearly all the coal which is dug for eastern markets comes from the Monongahela Valley and from along the Youghiogheny river, all of it being of easy access to the river, some of the mines shooting the coal directly from the "tipple" to the boats. Surrounding Pittsburg are 120 coal mines, which give employment to some eight thousand miners. The amount of capital invested in these collieries is about $15,150,000. The number of acres of coal land under development is 30,250, which commands from $500 to $1,500 an acre, according to location and quality. In the immediate vicinity of Pittsburg the banks and hills along the rivers are all dug out. The privilege of digging coal of "Coal Hill," opposite the city, was granted in lots by the Penns, which extended through the hill to the middle, for the sum of £80 for each lot, and found ready sale at those figures. Where coal is reached by means of tunnels or drifts it is mined for two-thirds less than if it was mined through a shaft. The markets for coal, after supplying the home consumption of Pittsburg, are in the South and West, and it is nearly all towed down the Ohio river in barges, boats and flats.

☞ The Union Pacific Railroad Company sold, during the month of July, 1873, 20,529.43 acres of land, at an average price of $6 73 2-10 per acre, amounting to $138,677 23. Sales averaged 108.42 acres to each purchaser. Total sales to August 1, 1873, 756,644.57 acres, at an average price of $4 37½ per acre, amounting to $3,310,495 53.

☞ The earnings of the Toledo, Peoria and Warsaw Railway in July, 1873, were $108,038 99, against $90,071 79 in July, 1872—an increase of $17,967 20.

☞ The headquarters of the Springfield, Athol and Northeastern (Mass.) Railroad are soon to be removed from Athol to Springfield.

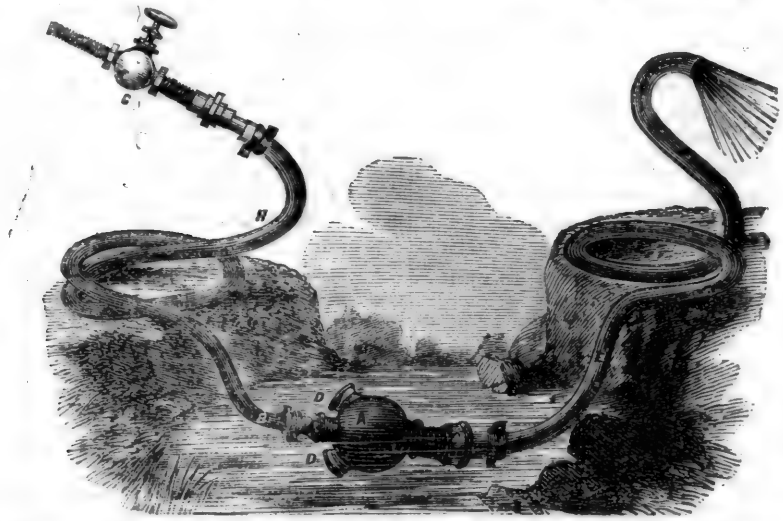
DREDGING MACHINES AND SCOWS
FOR SALE.

One (Osgood Pattern) Second Hand. Price $10,000.
One, Almost New. Price $22 000.
Two Large Dumping Scows, $3,500 Each.
Apply to
A. W. LADD,
5 and 7 Dey Street.

Second Hand Locomotive For Sale.

ONE SECOND HAND ANTHRACITE COAL BURNING LOCOMOTIVE for Sale, weighing 28 tons, eight-wheel connected with cylinders 16 inches by 20 inches. Engine can be seen on application to A. WILHELM, President of Cornwall Railroad, at Lebanon, Pa. 3m26

RAILROAD IRON.



THE undersigned, agents for the manufacturers are prepared to make CONTRACTS FOR RAILS delivered free on board at ports in England, or exship at ports in the United States.
M. K. JESUP & COMP'Y,
59 Liberty St., New York.

FOR SALE.

Four new passenger Coaches for sale, two 60 passenger each, price $5,250; two 78 passenger price $7,000 each, now ready for lettering. Also a 30 ton new Locomotive ready for use.
Apply to
A. W. LADD
35tf 5 and 7 DEY STREET NEW YORK.

LANSDELL'S

Patent Portable Railway Syphon.

The Portable is invaluable on a freight or construction train, being used to take water at points where there are no water stations. With it water can be taken from any point within one hundred feet of the track where there is water six inches or more in depth. The valve C is tapped into the locomotive boiler; steam is let on through the hose B, water is drawn through the orifices D D, and forced through the hose E into the tender, filling any tender with warm water in from six to twelve minutes.

Lansdell's Patent Steam Syphons, Double Suction, adopted by the United States Board of Supervisors, and approved by the Secretary of the Treasury for use on Steamboats.

For Price and particulars, apply to the General Agents of the **Steam Water Station Company,**

LENG & OGDEN,

IRON AND STEEL DEALERS & IMPORTERS,

No. 4 FLETCHER STREET, NEW YORK.

Sole Agents for Credenda Steel Gun Barrels and Moulds, and the Cold Drawn Patent Weldless Steel Tubes.

A. W. LADD,

NO. 5 DEY STREET, NEW YORK,

Will cut to order for Bridge and Railroad Builders, WHITE PINE, GEORGIA and FLORIDA PINE, HEMLOCK and OAK TIMBER.

Agent for ROBERT BROWN, Telegraph Contractor.

Telegraph Lines of any length built with Brooks' Patent Paraffine or Glass Insulation and American Compound or English Galvanized Wire at the lowest rates and shortest notice. Also, Wire Fence for Railroads.

THE WHARTON

Safety Railroad Switch.

BOTH RAILS of the main track absolutely immovable, continuous and unmutilated.

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,

ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R. R. Switch Co.,
28 South 3d St., Philada., Pa.
P. O. BOX, 2353, Phila.

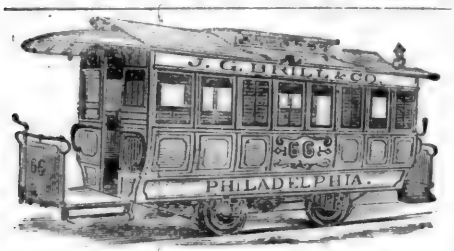
YORK CAR WORKS.

ESTABLISHED IN 1852.

Billmeyer & Smalls,

YORK, PENN.

This old established firm continue to build all kinds of Freight Cars to order.



Narrow Gauge Cars

having received their special attention, they are prepared to receive orders and to deliver promptly.

They have furnished the following Roads with Narrow Gauge freight cars, viz: Denver and Rio Grande, Kansas Central, North and South R. R. of Ga., Iowa Eastern, Painesville and Youngstown, Ripley R. R. of Miss., Utah and Northern, Costa Rica R. R., C. A., and others.

Photographs of Narrow Gauge cars sent by mail.

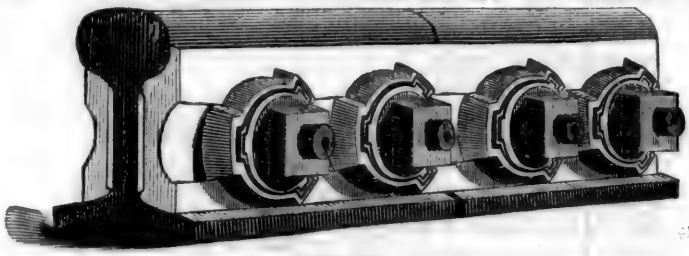
THE LOCK-NUT & BOLT COMPANY OF NEW YORK,

No. 61 Broadway, New York.

Manufacturers of all kinds of **BOLTS** for FISH-BARS, BRIDGES, CARS, MACHINERY, &c., with the "CUMMING NUT-LOCK," the only method of locking a nut to the bolt.

PATENTED June 16, 1868.

IMPROVED August 23, 1870.



Unequalled for Cheapness, Simplicity and Effectiveness.

DESCRIPTION.—A pointed copper key is placed in a groove cut in the threaded part of the bolt, *over which* the nut is screwed to its position, cutting its own thread in the copper, thereby taking up all the slack between the bolt and the nut. By riveting up against the face of the nut the projecting portion of the copper key, the nut is firmly locked in its position, but can be readily adjusted or removed with a wrench without injury to either bolt or nut.

Severely tested for over *four years*, they have *never failed*, and are *now in use on over fifty Railroads*, giving perfect satisfaction. We solicit a trial *anywhere*.

Licenses Granted to R. R. Companies, Car Builders and others.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

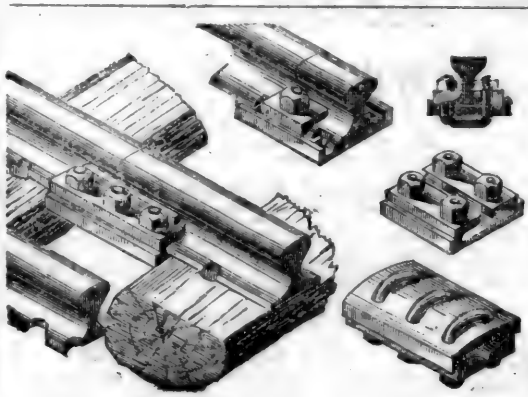
The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.



That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

FISHER'S PATENT

Wrought Iron

RAIL JOINTS,

MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

New York, Saturday, August 23, 1873.

Portland and Ogdensburg Railroad.

The Portland and Ogdensburg Railroad Company are constructing a line from Portland, Me., to Swanton, Vt., with the design of connecting at the latter point with the Ogdensburg and Lake Champlain Railroad, or they may continue an independent line to the St. Lawrence. Their object is to complete a continuous line that shall make Portland the nearest Atlantic port to and from the great West. At present the enterprise is being carried on by two separate companies which divide their limits by the Connecticut River. Of the division east of the Connecticut sixty miles are in working order, and the remainder, about fifty miles, is under contract. With regard to the Vermont Division very satisfactory progress has been made. From West Concord, eight miles east of St. Johnsbury, to Hyde Park, a distance of sixty-one miles, the track has been laid and the road opened for business. From Hyde Park to Cambridge, twelve miles, nearly all the heavy work is finished, and thence to Sheldon most of the heavy cuttings are done. From Sheldon to Swanton the grading is completed, except one small cut at Sheldon; and the piers for the bridge at Swanton, and four miles of track are laid at the western end of the line. The remaining fourteen miles, from West Concord to the Connecticut River, has been put under contract. It is proposed to have the whole line in Vermont completed before the close of the current year. The whole length of the road will be about 230 miles.

NOTICE TO INVESTORS.

The attention of the investing public is called to the limited remainder of the NORTHERN PACIFIC RAILROAD SEVEN-THIRTY LOAN. Of the $9,000,000 of this loan unsold on the 1st of June last, less than $5,000,000 now remains, and this balance will soon be absorbed, after which the Company has resolved to issue only six per cent. bonds.

There are now between 500 and 600 miles of the road in regular operation, with a growing traffic; surveys and construction are progressing satisfactorily; the survey prosecuted the present season, in connection with the Stanley military expedition, has resulted in the location of an excellent line through Western Dakota and Eastern Montana, and the company has advertised for proposals for grading and bridging the Yellowstone Division, extending 205 miles from Bismarck, at the crossing of the Missouri River to the crossing of the Yellowstone, in Montana. The Company's lands (amounting to more than 20,000 acres per mile of road) are selling to settlers at an average price of nearly $6 per acre, and the proceeds of land sales constitute a Sinking Fund for the repurchase and cancellation of first mortgage bonds.

The Company's seven and three-tenths per cent. gold bonds, the last of which are now offered, yield nearly 8½ per cent. per annum at the present price of gold.

All marketable securities are received in exchange at current rates, and full information furnished on inquiry.

JAY COOKE & CO.,
No. 20 Wall-st., New York.

☞ The Beaufort (S. C.) *Republican* says that negotiations are pending which promise to result in a consolidation of the Georgia Railroad, the Savannah and Charleston Railroad, and the Port Royal Railroad, so that they will be operated, as one road, under one management. This is to be done by the purchase of a controlling interest in the stock of the Savannah and Charleston by the Georgia Railroad Company.

Northern (Canada) Railway.

The semi-annual meeting of the proprietors of this railway was held in Toronto on the 13th inst. From the report of the directors which was presented, we learn that the gross traffic receipts from all sources for the half-year ending June 30, 1873, have amounted to $441,528 06 (£90,324 18s 10d stg.) as against $390,271 03 (£80,192 14s 7d stg.) for the corresponding period of 1872, being an increase of $51,257 03, or 13.13 per cent in favor of 1873, chiefly due to the traffic brought to the main line by the lines of the Northern Extension Railway Companies under lease.

The ordinary working expenses of the half-year have amounted to $285,567 23 (£58,678 3s 11d) as against $238,364 79 (£48,979 1s 11d) for 1872, being at a rate of 64.67 of the gross earnings as in comparison with 61.07 per cent in the previous half year. This advance is not larger than, in the report of last year, the directors led the proprietors to expect.

The additional outlay on works of extension has been $56,722 45 (£11,655 6s 0d) as against $63,164 50 (£12,979 0s 8d) in 1872.

The net revenue of the half-year available for dividend has amounted to $102,788 28, (£22,120, 17s 6d) and after all interest accrued due to date having been paid a balance of $1,683 26 (£345 17s 6d) has been carried forward to the credit of revenue account.

The Dominion Parliament having authorized a grant not exceeding $35,000 in aid of the reconstruction and improvement of Collingwood harbor, conditional upon a like sum being jointly appropriated thereto by the town of Collingwood, and the company in equal proportions, preliminary arrangements have been completed, and the works will at once be proceeded with.

The line of the Northern Extension Company has been completed to Washago, and that additional division was opened for traffic on the 18th instant—making a total of 54.85 miles of that company's line now in operation.

☞ The next meeting of the Chesapeake and Ohio canal board will be held in Cumberland, Md., September 10th, when a large delegation of Pittsburgers interested in the extension of the work to that city will attend.

Central Pacific Railroad.

The Annual Report of the Central Pacific Railroad Company for the year ending December 31, 1872, covering the operations of the road from its commencement, and embracing also information of its traffic and earnings down to the close of June, 1873, is now published.

The mileage at the latter date was as follows:

Main Line—		
San Francisco, Cal., to Ogden (U. P. R. R.) Utah	883	miles
Divisions—		
Oregon—Roseville (18 m. N. Sacramento) to Redding	152	
San Joaquin—Lathrop (78 m. E. San Francisco) to Goshen	146	
San Jose—Niles (27 m. E. San Francisco) to San Jose	18	
Alameda—Alameda to Hayward's Station	17	
Oakland—Oakland to Brooklyn	6	
	839	"
Total length of main and division lines	1,222	"
Siding and other tracks	110	"
Total length of equivalent single track	1,332	"

Gauge 4 feet 8½ inches. Rail 56 pounds.

Telegraph Line—On all lines of the road, 1,222 miles.

Rolling Stock—Locomotive engines, 184.

Passenger Cars—1st class, 93; 2d class, 54; and palace sleeping cars, 21; total of all passenger cars, 168.

Mail and express cars 15, and baggage cars 25; total 40.

Caboose cars 38; Directors' and Superintendents' cars 2; pay car 1.

Freight cars—Box 1,704, and platform 1,494; total 3,198.

Section cars 179; hand cars 222; dump cars 110; track-laying cars 51; wrecking cars 2; and snow-plows 7; total construction and road cars 571.

Total number of all classes of cars, 4,018.

In addition to the above there were built in the Sacramento shops between January 1 and June 30, 1873, 437 cars and three locomotives. Seven other locomotives were being built and were nearly completed at the latter date. The Miller platform has been put on all the passenger cars, and passenger trains are equipped with the Westinghouse air brakes.

The shops at Sacramento are extensive and complete for the construction and repair of locomotives and cars; fully equipped with the most approved machinery for that purpose, and are situated on large and commodious grounds within the city limits. The machine and car shops are located at Sacramento City and the repair shops at San Francisco, Oakland, Lathrop, Rocklin, Truckee, Wadsworth, Winnemucca, Carlin, Toano Terrace and Ogden. To date, these shops and their machinery have cost $1,280,223, and the material therein constantly kept on hand averages in value more than $1,000,000.

The railroad hospital at Sacramento is a large and commodious building on ample grounds, and has fully realized the expectations of its founders. Every officer and employe of the company contribute monthly fifty cents from his pay as "hospital dues," which constitutes a fund to defray the current expenses of the institution. This payment entitles each contributor to free admission and medical attendance, in case of sickness or injury, while in the service of the company. Thus far the fund has been sufficient to defray expenses and pay interest on the cost of the property.

Accessory to the railroad, the company own vast wharf and ferry property at San Francisco, Oakland and Alameda, with a ferry steam fleet of seven steamers with an aggregate of 4,292 tons; a fleet of twenty-nine steamers of 6,621 tons, on the Sacramento River, and twenty barges and other sailing craft of 7,600 tons, or a total of 23,005 tons floating stock.

The San Francisco ferries, to and from Oakland and Alameda, consist of seven steamboats, with a total of 4,392 tons, viz: El Capitan, 982; Alameda, 813; Oakland, 285; Washoe, 580; Thoroughfare, 1,012; Louise, 386, and Flora Temple, 334 tons, with wharves, piers and slips to accommodate them. The "Thoroughfare" is a large, powerful boat, designed exclusively for the transportation of freight trains between Oakland and San Francisco, with track capacity for eighteen cars, besides additional room and pens for sixteen car loads of live stock. It is a most decided success, and determines the question of manner of approach to the city of San Francisco.

The Lands of the Central Pacific Railroad Company, granted by Congress, on the Main Line and California and Oregon Branch, amount to 11,722,000 acres; which, at the minimum valuation of the Government lands adjoining them, $2.50 per acre, would be $29,306,000. Much of it is the choicest agricultural and timber land in the country, and will sell for a much higher price. The Railroad Hospital property at Sacramento, and large landed water front property at Mission Bay, San Francisco, Oakland and Sacramento, independent of improvements, are valued at $7,500,000; but neither these nor the granted lands appear as assets in the company's general balance sheet.

The assets of the Company are:

1,222 miles main line of railroad and telegraph, with all necessary sidings, turnouts, switches, turn-tables, depots, depot buildings, round-houses and snow-galleries, also wharves, slips, piers and steamers for ferries at San Francisco	(cost)	$130,485,678 74
Equipments for same—Locomotives, cars, snow plows, etc	(cost)	5,622,693 04
Real estate purchased for use of road	"	968,976 06
Shops and machinery	"	1,280,223 25
Telegraph instruments, furniture, safes, etc., at stations and offices	(cost)	76,692 05
Sacramento river steamers	"	830,372 90
Material on hand:		
In shops for constructing and repairs (per inventory)	"	985,283 23
In store of supply department (per inventory)	"	112,769 24
Fuel on hand (per inventory)	"	325,048 53
Balance of accounts outstanding after deducting obligations		2,366,130 90
Farming lands—estimated value		29,306,000 00
Undivided half 60 acres land in Mission Bay, in San Francisco; 500 acres water front at Oakland; about 140 acres and water front at Sacramento—estimated value, independent of improvements		7,750,000 00
Cash in hands of Treasurer		147,156 06
Total		$180,257,024 00

"The policy of the company with regard to their farming lands has been to sell them at low prices and on easy terms to actual settlers. This course of action invites an industrious agricultural population, whose improvements and production tend to increase the business of the roads and enhance the value of the still vacant lands. Most of the lands that have been sold were purchased for gold on a credit of five years; a payment of 20 per cent. being made at the time of sale, and the remainder in equal annual instalments, with interest at the rate of 10 per cent. per annum, payable in advance on all sums remaining unpaid. Of these lands there were sold previous to October 1, 1870, 137,635.55 acres, which brought the sum of $295,065 50, being an average of $2 21 per acre. From October 1, 1870, to December 31, 1872, there were sold 122,765.09 acres for $484,227 97, being an average of $3 93 per acre. From December 31, 1872, to June 30, 1873, there were sold 20,638.71 acres for $132,337 54, or $6 41 per acre. These sales were made to 1,446 individual purchasers, being an average of about 187 acres to each buyer. The annual advance in the average price of land sold indicates the increasing value of the unsold lands, and when viewed in connection with the annual increase of the road business, fully justifies the policy of selling, as far as practicable, to the actual settlers for cultivation. Immigration this year promises to be more than double that of any year since the junction of the roads at Ogden. The wealth of the soil, as exhibited in its great wool, grain and wine productions, and the advantages of climate are attracting attention that must each year largely increase the inflow of population.

"The trade of the Pacific Ocean, centering at the Bay of San Francisco, shows a remarkable growth, and furnishes some indication of the great business that is to come from the exchange of productions with the islands of the Pacific Ocean and the countries bordering upon it.

"The construction of the main line (Sacramento to Ogden, 742 miles), was commenced at Sacramento in February, 1863, and was opened by sections of varying length through the next ensuing six years, until its completion to a junction with the Union Pacific Railroad May 10, 1869. Since the opening of the road thus far there has been added to it by consolidation 480 miles, viz: the Western Division, 141 miles; the Oregon Division, 152 miles; the San Joaquin Division, 146 miles; the San Jose, 18 miles; the Alameda, 17 miles, and the Oakland, 6 miles. All these additions to the

main line have been proven at once profitable investments, adding to and with themselves increasing the pro rata earnings of each mile of the whole.

"These additions, like the main stem, have mostly penetrated a sparsely settled and undeveloped country, but of vast resources; and together they may be said to command the entire scope of the San Joaquin and Sacramento Valleys, and all the country, in fact, the business of which shall seek the Pacific. The Sacramento and San Joaquin Valleys—the two great valleys of California—alone occupy an area of 480 miles in length by an average breadth of 70 miles, or 21,500,000 acres of arable land susceptible of varied and most profitable cultivation, which must bring a very large traffic to these roads as soon as they shall be brought into culture in the near future.

"From the valley of the Sacramento to Ogden, the Truckee and the Humboldt Rivers alone offer a practicable pass through the range of mountains that occupy so largely the country from the Washatch to the Sierra Nevada, lying parallel to them and running north and south. The natural and only drainage of all that vast country, for hundreds of miles, north and south, is to the lines of the road, and it is the same with the drainage of the great valley system of California. These lines are so laid with reference to the topography and passes of the country that these valleys and their tributaries are completely commanded, and hereafter the construction of lines of railroads in this vast country must prove feeders to the Central Pacific Railroad.

"On the original line from Sacramento to Ogden, as well as upon the other parts, large expenditures have been made in perfecting them since they were opened for business, until now they are in such a state of completeness as to tracks, depots, machinery, snow galleries, docks, wharves and terminal accommodations and supplies on hand, that you may reasonably expect dividends upon your shares from this time on. Heretofore the net earnings have gone to construct and bring your property to its present state of completeness and effectiveness."

"The results of the operations of your roads for the year 1872 are more than satisfactory; they are conclusive of pre-eminent financial success. Though your lines command this vast country, so rich in mineral, agricultural, and manufacturing resources and of great commercial advantages, it is but sparsely occupied and but slightly opened for business."

"Altogether the prospects of your company are bright, and you have the satisfaction of knowing, at the same time, you have performed a most beneficient work in opening up to settlement a country otherwise in great part inaccessible for development."

Operations and Fiscal Results, 1872.

Passenger Traffic.—Passengers by rail; through (east, 21,645, and west, 34,040), 55,685; and local (east, 265,247, and west, 267,901), 533,974. Total (east, 286,892, and west, 301,941), 588,833. Passengers by ferry (east, 1,203,928, and west, 1,211,513), 2,415,141. Total of all passengers by rail and ferry (east, 1,490,520, and west, 1,513,454), 3,003,974, being an increase over previous year of (east, 283,094, and west, 337,897), 620,991. Upon computation the average distance traveled by each passenger was 35.33 miles, and the average charge per mile per passenger 3.83 cents.

Freight Traffic.—Freight moved (local, 647,497; through, 98,657, and company's, 194,669), 940,823 tons. Freight moved one mile (local, 104,915,024; through, 85,601,483, and the company's, 45,120,916), 235,637,223 ton. The average charge per ton per mile on freight (excluding company's freight) was 3.66 cents. Local freight includes 111,317 tons of grain forwarded from the agricultural districts to the general markets, the charge being 3.19 cents per ton per mile. Of the through freight (tons) the following were some of the principal articles:

Forwarded West.				Forwarded East.

Recapitulation.

Earnings	$7,400,089 35	$4,563,551 22	$11,963,640 57
Expenses	4,953,612 42	57,666 42	5,011,278 84
Earnings over Operating Exps.	$2,446,476 93	$4,505,884 80	$6,952,361 73

The currency was sold at a discount of $435,349, leaving the earnings over expenses for the year, $6,527,012 in coin. The average premium on gold in New York was about 14 per cent; adding this premium, the earnings over expenses would be equivalent to $7,740,794 currency. The following statement shows the yearly earnings and expenses since the first opening of any part of the road:

Fiscal year.	Gross earnings.	Expenses—Amount.	Expenses—p. c.	Nett earnings.	Rate p. m. of road.—Ear'gs.	Rate p. m. of road.—Exps.
1864-65	$519,096	$190,686	36.77	$328,209	$14,030	$5,159
1866	864,268	200 723	23.22	663.545	11,524	2,676
1867	1,433,646	333,624	23.27	1,100,022	11,359	2,876

Boston, Hartford and Erie Bonds.

A correspondent wishes to know how it happens that Boston, Hartford and Erie 7's do not improve in price since the foreclosure of the Berdell mortgage. He also appears to be in doubt as to whether the Boston, Hartford and Erie 7's quoted in the stock sales are Berdell bonds or not, and desires an explanation of the matter. We will therefore attempt to give a brief statement of the present condition of affairs. The bonds now known as the Boston, Hartford and Erie 7's are the bonds issued under the Berdell mortgage, of which there are twenty millions issued. This mortgage was made for the purpose of completing the road and taking up all underlying incumbrances, and, according to the terms of the mortgage, a sufficient amount of the bonds was to be retained for the latter purpose. But by the unwarranted diversion of a portion of the bonds to other uses, it happened that they were all issued without all the bonds under previous mortgages having been taken up. The amount of these underlying bonds outstanding at the present time, however, is only about $500,000, and this is all that the new company has to pay to obtain a clear title to the property, with the exception of such liabilities as the trustees have incurred since they came into office. All the other indebtedness of the old company will have to be proved in bankruptcy, and paid from whatever assets there may be in the hands of the assignees. The Hartford, Providence and Fishkill road, which was purchased by the Boston, Hartford and Erie, subject to a mortgage of $2,055,000, is still in the hands of the trustees under that mortgage, but it will be surendered to the new company whenever the company is in a condition to take up the mortgage itself, the interest being all paid from the earnings of the road. This briefly shows the present condition of affairs. The new company, which is formed of the Berdell bondholders, issues stock in place of bonds, giving ten shares of stock for each thousand dollar bond surrendered. The foreclosure of the mortgage, by which all the original stock is wiped out, of course greatly simplifies affairs, and improves the prospect of the corporation. But, as a reason why the bonds did not at once advance after foreclosure, it is to be recollected that the price of the bonds was enhanced and kept up before the foreclosure by the knowledge that that course would be adopted. The effect of the foreclosure, to use a street phrase, was "discounted" months before it took place, and after its occurrence many were naturally disposed to realize on the advance. Others, too, taking into consideration the fact that the road was not finished, and that several millions of dollars would be required to do so, preferred other investments, and the price dropped for want of support, as has been the case with a good many other stocks and securities, the intrinsic value of which was not unfavorably affected. That the real value of the bonds was enhanced by the foreclosure there seems to be no reasonable doubt, and while we think the bonds are now unduly depressed, there may be reason for others to think that the price was unduly inflated before. Those who have money invested or to invest must be there own judges of this matter, and according to the view they take, whether right or wrong, the price will be higher, in the futnre as it has been in the past. —*Boston Adv.*

Baltimore City Passenger Railway.

At the regular monthly meeting of the directors of this company held in Baltimore on the 13th inst., Mr. Henry Tyson, (who has recently been elected Third Vice President of the Erie Railway Company,) tendered his resignation as President and General Superintendent, which was accepted. At the same time he made the following statement of the affairs of the company:

In retiring from my official connection with this company I deem it proper to state to you briefly the results that have been achieved during our joint administration of its affairs, extending through a space of more than eleven years. Its organization took place on the 28th of May, 1862, the road having been previously worked for about two years by an association having no charter, during which time a floating debt of $640,342 66 was created. By the act of incorporation the property of the association was taken at $659,624 57. The amount expended since that period in extension of the road, purchase of property and equipment, erection of depots and buildings, has been $378,831 87, making cost of road and equipment, on the 1st day of July, 1873, $1,038,456 44. The present capital stock of the company is 40,000 shares, upon which $21 per share has been paid by shareholders, and $2 50 per share added from its earnings, making the shares $23 50 each, paid in, and the capital stock $940,000. The difference between the capital stock and cost of road and equipment, $98,456 44, very nearly represent ing its actual floating debt. The average annual earnings for eleven years to June 30, 1873, during which time the average capital has been $760,000, have been 19.62 per cent upon the capital stock, of which the city of Baltimore's proportion has been 12.12 per cent, and the shareholders' 7.50 per cent. Total amount to the city of Baltimore $1,022,952; do. to the shareholders $630,450. In 1871 and 1872 the mayor and city council of Baltimore granted privileges to railroad companies to run their lines upon streets very near to and parallel with those occupied by this company, the operation of which lines has very materially affected its receipts. This, in connection with a severe epidemic amongst the horses, the effects of which extended from October, 1872, to June, 1873, causing a direct loss of not less than $60,000, which, added to the high price of hay and straw, so influenced the company's profits that it was thought most prudent to pay no dividend in January and July last. But by the exercise of a rigid system of economy and a decrease in the number of cars run, the company again finds itself in a fair condition of prosperity, with a present surplus of about $40,000, and prospects which will ensure, even with the disasters of last year, a surplus of not less than 6 per cent upon the capital on the 1st of January. The company has for the last year kept in arrears to the city two quarterly payments, carrying in this way the principal portion of its floating debt, upon which the city receives interest. Its well defined policy has been to fulfill all of its obligations to the city of Baltimore and to pay its shareholders a fair interest upon their investment. This only has been accomplished by economy and a sacrifice in some instances of public comfort and convenience, rendered necessary by the unwillingness on the part of the mayor and city council of Baltimore to make such abatement of tax or change in the original agreement made between that corporation and this company as has been rendered necessary by the depreciation in the currency and proportionate increase in expenditures. All necessary property has been acquired and buildings erected, and arrangements made to give the largely increased accommodation which the public convenience so urgently demands, as soon as the mayor and city council of Baltimore will place the company upon a base of operations which will permit the full and liberal equipment of the various lines, and at the same time give to the shareholders a fair interest upon their investment.

Mr. Tyson's successor in the presidency and general management of the Baltimore City Passenger Railway Company will not be elected until the annual meeting of the stockholders in January, when it is expected there may be other changes in the directory.

☞ A cash dividend of five per cent has been declared upon the preferred and common stock of the Chicago and Alton Railroad Company out of the earnings of the last six months, payable at the banking house of the company's agents, Messrs. M. K. Jesup & Co., No. 59 Liberty st,. New York, on the 5th day of September next, to holders who are registered as such, at the close of business hours on the 22d day of August, at which time the transfer books will be closed, and reopened for transfers on the 11th day of September next.

Northern Pacific Railroad.

General Rosser, in charge of the railroad survey of the Stanley Yellowstone expedition, reports to the Northern Pacific Railroad managers that the new route across Western Dakota, from the Missouri to the Yellowstone, is entirely practicable and satisfactory, being greatly superior to those formerly examined. The distance, 205 miles, is 21 miles shorter than the survey of 1871. The gradients are moderate. The average of work per mile is considerably less. The number of important bridges is reduced nearly two-thirds. The Little Missouri River, which former surveys crossed seven and eleven times, is crossed once on the line now located. The route runs immediately through only one mile of the Bad (or clay) Lands, just east of the Little Missouri. With few exceptions, the country is rolling prairie, sometimes rising into low hills, the grass being excellent and soil good. Good water was found the entire distance. Coal outcrops at various points in veins several feet in thickness, and timber is more abundant than on former routes.

The report states that the main body of Colonel Stanley's expedition and most of the press correspondents did not accompany the engineers and Colonel Custer's detachment, but followed the old abandoned route south of Heart River. Hence descriptions of the region traversed by the main command do not apply to the country traversed by the new route.

The directors of the company have accepted the new line recommended by General Rosser, from Bismarck, the present end of the track, to the Yellowstone crossing, and have called for proposals to grade and bridge this section of 205 miles.

The expedition is now prosecuting the survey westward up the left bank of the Yellowstone to Pompey's Pillar, where it will join the survey made last year from the West, and thus complete the surveyed line across the continent.

The entire command is expected to return to Fort Rice about October.

☞ Articles of association have been filled for the formation of a company to construct a railway from Bordentown to Camden, (N. J.) twenty-three miles in length. The capital stock is $1,000,000, and is to be divided into ten thousand shares of $100 each. The requisite amount has been subscribed. A company was formed a short time ago to run a road from South Amboy to Bordentown. The above road is probably intended to connect with it.

☞ The management of the Columbus, Chicago and Indiana Central has perfected a negotiation with the lessees for additional equipment and rolling stock to meet the increasing traffic with both the old and new roads at the western terminus. The company has begun a new arrangement with the Columbus and Hocking Valley road for carrying coal, which it is expected will add about $1,000,000 annually to the earnings of that road.

☞ The first regular train from New Haven to Willimantic, via the Air Line road, went through on the 12th inst., accomplishing the distance in about three hours. For the present only one train will run daily, leaving new Haven at 5.50 p. m., and Willimantic at 6.25 a. m.

Commerce of New York.

The foreign imports at New York for the month of July, 1872 and 1873, are officially stated as follows:

	1872.	1873.
Entered for consumpt'n.	$9,885,624	$14,528,180
Do. for warehousing....	20,318,307	10,882,627
Free goods.....	5,890,400	5,612,362
Specie and bullion.....	2,041,904	149,957
Total entered at port...	$38,136,235	$31,173,126
Withdrawn fr. wareh'use	25,779,161	10,033,598

The foreign imports at New York for seven months from January 1, were:

	1872.	1873.
Entered for consumpt'n.	$118,640,268	$109,417,043
Do. for warehousing...	126,606,308	82,856,822
Free goods.....	22,850,813	57,006,582
Specie and bullion.....	2,819,482	2,941,662
Total entered at port...	$270,916,871	$252,221,109
Withdrawn fr. wareh'se.	89,832,451	73,875,844

Revenue from customs at New York:

	1872.	1873.
In July.....	$7,251,160 35	$10,008 929 55
Add 6 months.....	73,822,709 76	61,981,516 65
Seven months.....	$81,073,870 11	$71,990,446 20

The exports from New York to foreign ports in the month of July, were:

	1872.	1873.
Domestic produce.....	$19,140,248	$24,828,308
Foreign free goods.....	61,806	107,178
Do. dutiable.....	868,934	686,017
Specie and bullion.....	17,248,688	10 038,643
Total exports	$37,309,676	$35,660,146
Do. exclusive of specie.	20,060,988	25,621,503

The exports from New York to foreign ports for seven months from January 1, were:

	1872.	1873.
Domestic produce.....	$119,582,556	$158,231,491
Foreign free goods....	740,893	1,363,247
Do. dutiable	6,196 022	5,514,646
Specie and bullion.....	54,363,587	37,857,927
Total exports.....	$180,883,058	$202,967,311
Do. exclusive of specie..	126,519,471	165,109,384

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending August 9, at 447,156 tons, and for the coal year 11,416,547 tons, against 11,226,854 tons to corresponding time last year, being an increase of 219,693 tons. The bituminous tonnage for the week is 59,886 tons, and for the year 1,864,139 tons, giving a total of all kinds for the week of 503,042 tons, and for the year of 13,310,686 tons, against 12,879,653 to same time last year, being an increase of 431,033 tons.

☞ The Cairo and Fulton Railroad will be completed to Fulton by the 1st of September, and to Texarcara by October. The Cairo, Arkansas and Texas Railroad of which Mr. Allen is President, runs from Greenfield, opposite Cairo, via Charleston, Sikeston, Dexter, &c., 69 miles to Poplar Bluffs, on the Arkansas Branch of the Iron Mountain Railroad. This branch will be finished this month.

☞ Certificates of incorporation of the Toledo and Maumee Narrow Gauge Railroad Company, and of the Maumee and Toledo Narrow Gauge Railroad Company, each with a capital stock of $20,000, have been filed with the Secretary of State of Ohio. The incorporators are the same, viz: W. J. Wells, Clayton W. Everett, W. F. Lockwood, Miles W. Plain and George Vogle.

Chicago Belt Railroad.

Articles of incorporation of the Chicago Belt Railway and Transfer Company, capital stock of $400,000, have been filed in the office of the Secretary of State of Illinois. It is intended and proposed by the corporation to construct and operate a railway from or near the "Grand Crossing" on the Illinois Central Railroad around the city of Chicago, on or west of its western limits to a connection with the Chicago and Northwestern Railroad or any of its divisions, intersecting and uniting with all intervening railroads. The members of the Board of Directors are D. Knight Carter, Edwin W. Chamberlain, Sylvester Foord, Jr., Albert L. Rice and Augustus H. Scoville.

☞ A correspondent of the Cincinnati *Enquirer* writing from Huntington, W. Va., says that the unexpectedly large and increasing freight business, which has been thrown upon the Chesapeake and Ohio Railway since its opening, has rendered it necessary for the company to increase its rolling stock forthwith. Two hundred new freight cars are to be delivered at this point alone, during this month, and not less than the same number for six months to come. Fourteen new locomotives have been purchased for the road, to be delivered immediately. Cincinnati passengers are delighted with the new route by way of Huntington to White Sulphur Springs.

☞ The Harrisonburg (Va.) *Register* states that the North River Railroad has been absorbed by the Shenandoah Valley Railroad. The new road—the consolidated Shenandoah Valley and North River roads—is to be called the Shenandoah and Ohio River Railroad, and will be continued from Bridgewater on to the Ohio river. The right of way to the Ohio river has been secured except at three or four points. The road will run through Briery Branch Gap, and strike the coal and iron fields of West Virginia. Two large engineer corps are to be put on the Shenandoah and Ohio road by September 1st, and the road constructed as speedily as possible.

☞ The German government has decided to reduce for three years and then to abolish altogether the import duty on iron. The reduction, which takes effect in October, is 15s per ton on hammered and rolled iron, T-iron angles and thick sheets, bringing down the rate to £1 per ton. Blooms are to be admitted at 10s per ton, pig and old iron duty free. Proportionate reductions are to be made in the duties now charged on rough castings, forgings and unfinished articles in steel and sheet iron, also on boilers and steam machinery. These reduced imports will, according to present arrangements, be absolutely repealed on the 1st of January, 1877.

☞ The Cumberland rolling mill has been shipping rails for the track of the Baltimore, Pittsburg and Chicago Railroad, the (extension of the Baltimore and Ohio from Mansfield, Ohio, to Chicago,) nearly every week since the 5th of July, when the first shipment was made. All the rails for the new road will be supplied by the Cumberland mill.

☞ The Montpelier and Wells River Railroad will soon be completed. Only thirteen miles of track remain to be laid.

RAILROAD EARNINGS—MONTHLY.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, August 23, 1873.

Stock Exchange and Money Market.

Money has been in more request for speculative use, but has been in ample supply for all the current wants of responsible borrowers at from 3 @5 per cent on call. In the discount line there has also been more animation, with rates on strictly choice to very good business paper quoted at from 6@9 per cent per annum. The active call for coin for custom house purposes, last week, materially diminished the specie reserves of the city banks, which also reported a loss of about a million and a half of legal tender notes, with an important reduction of their deposit average. The U. S. Sub Treasury, last week, again added liberally to both its currency reserve and its coin hoard. The city banks last week reported a loss of about 2¼ millions in their deposit line with a decrease of nearly a million and a half in their legal tender, and of about 2⅛ millions in their specie reserves. They enlarged their loan and discount averages about 1⅞ millions, and contracted their circulation slightly.

The city banks have shown a further loss of ground on their obligatory reserve, the last statement showing that they had $9,686,950 more than the 25 per cent reserve which the national banks are required by law to keep on hand. The U. S. Sub-Treasury, last week, enlarged its coin balance about 3¼ millions, and its currency reserve nearly 1⅜ millions. Its currency reserves at the close of the week were $32,265,513; and its coin hoard, $45,651,597.

The clearances of the city banks averaged through the week about 71⅞ millions a day, and amounted in the aggregate, for the whole week, to $431 024,238, as against $420,989,757 the preceding week. The U. S. Sub-Treasury at this point enlarged its currency balance $1,357,599 and its coin reserve $3,229,970 as the result of the week's business.

The cash balances in the U. S. Treasury Department on Tuesday were: Currency, $10,238 705; special deposits of legal tenders for the redemption of certificates of deposit, $35,230,000; coin, $89,966,119; coin certificates, outstanding, $43,-513,300; outstanding legal tenders, $356,000,000.

The specie reserve of the city banks according to the latest return is $27,644,100, against $20, 399,300 same time last year. The city bank deposits are now $234,857,300 against $235,757,600, week ending Aug. 17, 1872. The legal tender reserve amounts to $47,540,100, against $52 533,400 same time last year. The circulation now stands at $27,222,700 against $27,290 600 same time las year. The loans are now $292,614 000 against $295,802,800 at this date last year.

The coin reserve of the city banks is now about 27⅝ millions, as against about 15 millions Feb. 21, 1873, and about 25¾ millions on the 20th of last July; the legal tender reserve is a little over 47½ millions against about 34⅞ millions April 5th, 1873, and 55½ millions on the statement of June 15th, 1872; and the deposits are now about 234⅞ millions, against 186⅞ on the 12th of April, 1873, and 247½ millions on the 20th of July 1872.

Government revenues have been more liberal in the customs form, though on a moderate scale in the excise line, through the week. The excises yielded within the week about two millions, and thus far in the current fiscal year commencing with July 1, 1873, $13,586,256. The customs at the port of New York, for the week, were $3,408,-131, and at the outports, about $1,150,000 more, in coin or coin certificates.

The U. S. Sub-Treasury office last week received $3,778,864 of currency, and $5,358,398 of gold, the latter including $3,511,000 from customs; and disbursed $2,421,265 of currency and $2,128,428 of gold, the latter embracing $360,-381 of coin interest.

Under the Treasury programme for August, Government proposes to sell Gold, as follows: Thursday, August 28, $1,500,000.

Gold has been decidedly more active and quoted higher, though closing less buoyantly. The speculative inquiry was more confident, during most of the week. The customs demand was also brisker. The export movement was light. The range of the price during the week has been from 114⅜@115¾, and the quotation on Wednesday was 115⅜ against 115⅛ on Wednesday of the preceding week. The specie outflow last week, was $496,793. The Gold Exchange Bank clearances have averaged about 83 millions per day during the week.

The customs demand for Gold last week, averaged $585,166 a day. The arrivals of specie from Europe, Havana and other foreign ports thus far in 1873 have been $2 176,151, against $2,797,422 in 1872. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1873, has been $81,543,060 against $96,474,277 during the same time in 1872.

Government has disbursed through the U. S. Sub Treasury here, on account of the coin interest on the public debt, since January 1, 1873, $50,968 510, against $56,299,029 during the same time in 1872.

The export drain of specie was $496,793 last week, against $582,185 same week preceding year. The shipments since January 1, 1873, have been $39,125,366 against $55,243,691 during the same portion of 1872.

Foreign Exchange has been very much depressed, by the liberal offering of bills, while the demand has been on a comparatively liberal scale. Bankers' sixty day bills on London closed on Wednesday at 108@108⅛; sight bills on London, at 108¾@108⅞. The week's exports of Domestic Produce have to the currency value of $5 258,190.

Government securities have been offered very sparingly through the week at the ruling prices, which fluctuated with gold. The investment demand readily took the small amount offered.

The Secretary of the Treasury has made a new call for $15 000,000 more of the Five Twenties, for redemption, interest thereon to cease on and after Nov. 16. The bonds thus called in are coupon bonds known as the third series, act of Feb. 25, 1862, dated May 1, 1862, as follows, as given in the official circular: Coupon Bonds, $50, No. 6,-201, to No. 10 200, both inclusive; $100, No. 20,-001 to No. 30,750, both inclusive; 500, No. 10,701 to No. 15 800, both inclusive; $1,000, No. 22,001 to No. 36,000, both inclusive; total, $13,000,000. Registered Bonds, $50, No. 1,321, to No. 1,375, both inclusive; $100, No. 9,501 to No. 10,300, both inclusive; $500, No. 5,701 to No. 6,100, both inclusive; $1,000, No. 22,301 to No. 25,000, both inclusive; $5,000, No. 7 501 to No. 7,900, both inclusive; $10,000, No. 9,680 to No. 10,000, both inclusive. Total, $2,000,000. Grand total, $15,-000,000. Of the amount outstanding (embraced in the numbers above) $13,000,000 are Coupon Bonds and $2,000,000 are registered Bonds.

U. S. sixes of 1881 closed on Wednesday of this week at 119¼@119¾; U. S. Five-Twenties of 1862, 116¾@117; U. S. Five-Twenties of 1864 at 117@117¼; U. S. Five-Twenties of 1865 118¾@119; U. S. Five-Twenties of 1865 consolidated 116¾@117; U. S. Five-Twenties of 1867, 119@119¼; U. S. Five-Twenties of 1868, 117⅞@118⅛; U. S. Ten-forties at 115½@115¾; U. S. Fives of 1881 (Funding Loan) 114⅝@114⅞; Six per cent. currency Sixes from 113¼@113¾.

The latest quotations at the London Stock Exchange compare as follows with former returns:

* Ex Sept. coupon.

The Railway and Miscellaneous share specu-

lation has been decidedly more active, but prices have been quite variable; the movement having been more or less bearish in temper, especially toward the close. Pacific Mail Shares were a prominent feature. The fight about the control of this property was growing in earnestness and determination; more or less affecting values on the general list.

State bonds have been in moderate request at somewhat irregular prices.

Railway Mortgage Loans have been in good demand at generally firm prices. Central Pacific Sixes have been in fair request at from 99⅝@99⅞. The Chesapeake and Ohio Seven per cent gold bonds have been in good demand at 90, and interest. Chesapeake and Ohio Sixes have been inquired for at 88½ and interest. Western Pacific Sixes at 92½@92¾. The Northern Pacific 7-30 Loan has been more sought after at par and interest. Over $4,000,000 of the Northern Pacific 7-30 Gold Bonds are officially announced as having been disposed of since the first of June, and but $5,000,000 of the loan remains. When this is closed out, the company will pay but six per cent for such funds as it may require for the completion of the road.

General business has been moderately active, since our last. Domestic produce has been attracting more attention. Breadstuffs and Provisions have shown more firmness. Petroleum, and Naval Stores have been irregular. Wool has favored sellers. Middling upland Cotton left off heavily at 19⅞c. per lb. The receipts at all the ports, since Sept. 1, have been 3,578,842 bales, against 2,674,391 bales same time in the preceding year; exports 2,364,769 bales against 1,944,483 bales in the previous year; stock at the ports at latest dates, 142,640 bales against 76,650 bales same date in 1871.

The Metal trade has been without much animation. Copper has been quite dull, but quoted steady at 27c.@27¼c. for prompt and 28c for forward deliveries. Iron has been quiet and generally quoted lower with sales reported of only 350 tons American Pig at $39 for No. 2 and $45 for No. 1. We quote: Eglinton Pig at $44: Glengarnock, at $44@$45; Gartsherrie at $47 75; Coltness at $50@$51; No. 1 American Pig at $44@$46; No. 2 do. at $38@$42; English rails at $64@$65, gold; American Rails, at works, at $74@$78; Old Rails $46@47; Wrought Scrap, $40@$45. Pig Lead has been quiet with foreign quoted at 6⅝c.@6¾c., gold, for ordinary; sales, 100 tons Domestic at 6⅛c., gold. Spelter continues inactive at 7½c.@7⅝c., gold. Pig-tin has been in limited demand, with Straits quoted at 31¼c.@31½c., with English at 28¾c., and to arrive 28¼c., and Banca, at 34¾c., gold. Tin Plates have been quite sparingly sought after, with Charcoal Plates quoted here at $10 87½@$11 25; Charcoal Terne, $9 75@$10 25; Coke, at $8 50@$9; Coke Terne $7 75@$8 50, gold, per box. Zinc dull and unchanged.

An improved inquiry has been noted for foreign goods at generally firm rates. The week's imports of foreign goods and merchandise amounted to $6,970,442 including $3,076,668 of dry goods.

Ocean freights have been quite active, but rates have been quoted easier and irregular, though closing more firmly. The demand has been mainly for Grain and Petroleum room.

At the Live Stock Markets, Beeves have been moderately sought after at from 6½@13¼ cts. Veals at 5½@9½ cts.; Sheep at from 4¼@6½ cts.; Spring Lambs 5½@9½ cts.; Swine at 5¾@5⅞ cts. per lb., all live weight. The week's receipts were 10,290 Beeves, 2,288 Veal Calves, 31,919 Sheep and Lambs, and 24,084 Swine.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ While the Stanley Yellowstone Expedition is still pursuing its way westward through Montana, a practical result of its labors appears in the announcement published to-day by the Northern Pacific Railroad Company that they are ready to receive bids for construction of the two hundred and five miles of their road between the Missouri and the Yellowstone. General Rosser, the engineer in charge of the surveys, reports that an unexpectedly favorable line has been found avoiding the so-called Bad Lands almost entirely, traversing a good grazing country well supplied with pure water. We notice that some of the press correspondents with the Expedition state that the road can be built on this line at even less cost than across the prairies of Minnesota. Thus another important advance in this great enterprise is inaugurated under most favorable auspices.

☞ The earnings of the Union Pacific Railroad for June, 1873, were $969,863 68, the expenses $417,118 04, and the net earnings $552,745 64. In June, 1872, the earnings were $835,459 47, the expenses, $391,660 08, and the net earnings $443,799 39—showing an increase in earnings of $134,404 21 with an increase in expenses of $25,457 96, making the increase in net earnings $108,946 25. From January 1 to June 30, 1873, the earnings were $4,582,976 27, the expenses $2,352,914 83, and the net earnings $2,230,061 44—showing an increase in gross earnings compared with 1872 of $741,359 56, and an increase in net earnings of $775,582 14.

☞ The earnings of the Milwaukee and St. Paul Railway for July, 1873, were $834,341 22, against $488,348 42 for July, 1872—an increase of $345,992 80. From January 1 to July 31, 1873, the earnings were $4,457,330 26, against $3,412,511 59 in the corresponding period of the previous year—an increase of $1,044,818 67.

☞ The New Jersey Midland Railroad Company have filled the route of a part of the extension of the road to the Delaware River at Belvidere, and thence across that river; also the links connecting the road with the Belvidere Delaware Railroad. This will form a continuous line to Philadelphia.

☞ T. Jones, Yorke has been elected President. G. J. Robbins Secretary, and B. F. Lee Treasurer of the Cape May and Millville Railroad. This road is leased to and worked by the West Jersey Railroad Company at a rental of 6 per cent per annum.

☞ The Chesapeake and Ohio Railroad Company have purchased and placed at the western end of their line one of the largest wharf-boats on the Ohio river. It is 168 feet long by 32 feet wide, and 14 feet to the ceiling, giving the storage of nearly 55,000 cubic feet.

☞ The estimated earnings of the Kansas Pacific Railway for the week ending Aug. 8, are: freight, $47,045 10; passengers, $30,265 14—total, $77,310 24.

☞ Messrs. Jay Cooke & Co., give notice that of the $9,000,000 of seven-thirty gold bonds of the Northern Pacific Railroad Company unsold June 1 less than $5,000,000 now remain to be disposed of. When these are sold only 6 per cent. bonds will be issued. Between 500 and 600 miles of the road are in operation, and the company have advertised for proposals for grading and bridging the Yellowstone division, extending 205 miles from Bismarck. The agents also state that the company's lands (amounting to more than 20,000 acres per mile of road) are selling to settlers at an average price of nearly $6 per acre. The proceeds of these lands constitute a sinking fund for the repurchase and cancellation of the first mortgage bonds.

☞ The Shepherdstown *Register* says that the directors of the Baltimore and Ohio Railroad Company, in order to shorten their line as much as possible, contemplate running a line upon the old and original survey, which was made about the year 1836, running from Harper's Ferry to a point near North Mountain, passing through Shepherdstown and Scrabble, Berkeley county, and then on to North Mountain, thereby shortening their line at least ten miles, leaving Martinsburg to the left.

☞ The Alexandria *Gazette* says that the East Alexandria Railroad Company, the road which is to connect the Washington City, Virginia Midland and Great Southern Railroad and the Baltimore and Ohio Railroad, opposite Alexandria, Va., has commenced accumulating the lumber for the construction of its necessary bridges, one of which will be at Blue Plains, just opposite Goose Egg Island, on the Maryland side, and the other just above the wharves of the American Coal Company, on this side of the river.

☞ At the annual meeting of the stockholders of the Brockville and Ottawa Railway Co., held in Brockville, Ca., on the 13th inst., the following gentlemen were elected directors for the ensuing year: H. L. Redhead, A. Turner, E. J. Senkler, Jr., Dr. J. E. Brouse, Daniel Galbraith, A. B. Foster. The officers elected are: H. L. Redhead, President; Hon. A. B. Foster, Managing Director; Mr. Redhead, Auditor; G. Lowe, Secretary; Archer Baker, Accountant.

☞ Messrs. Claxton, Remsen & Haffelfinger, of Philadelphia, have published, "A Catechism of High Pressure or Non-condensing Steam Engines." This work includes also the modelling constructing running and management of steam engines and steam boilers, and is illustrated. The author is Stephen Roper, engineer.

☞ The earnings of the Erie Railway Company for the week ending Aug. 7, 1873, were $394,517, and since July 1, $2,079,901—an increase over the corresponding period of the previous year of $179,461.

☞ The North Pennsylvania Railroad Company have commenced the extension of the northeast branch of their road for a distance of two and a-half miles into Bucks county.

☞ The earnings of the Baltimore and Ohio Railroad and branches in July, 1873, were $1,375,449 10, showing an increase, as compared with July, 1872, of $178,923 97.

☞ Banking House of Fisk & Hatch,
New York, Aug. 18, 1873.

The **SEVEN PER CENT. BONDS OF THE CHESAPEAKE AND OHIO RAILROAD COMPANY** are issued in the denominations of $1,000 each, interest payable July and January, both principal and interest payable in United States Gold Coin, in New York. The price for the present is 90 and accrued interest—that is, a

$1,000 bond would cost to-day $909 21

At the present price of gold the income derived is equal to nearly nine per cent. in currency. With the rapidly increasing business of the road, its commanding importance as another great east and west trunk line, its complete roadway of 420 miles, the princely wealth of **iron, coal, salt, and timber,** along its route, tapping, as it does, at its Western terminus on the Ohio River, over 12,000 miles of water navigation, it Eastern terminus resting on the tide waters of the Atlantic Ocean, and the fact that the other great parallel trunk lines are being compelled to lay additional tracks to meet the enormous and steadily augmenting traffic between the East and West—all warrant us in our belief that the securities of the Chesapeake and Ohio are destined to attain a high rank in the markets of the world. Government bonds are so high, at present, and really desirable permanent investment securities so difficult to be obtained at a reasonable price, that we are glad to have so satisfactory a bond to offer our friends and customers.

We also have a small amount of the **OLD SIX PER CENT. GOLD BONDS OF THE CHESAPEAKE AND OHIO:** the price of these is 88½ and accrued interest. They are issued in denominations of $100, $500, and $1,000, interest payable May and November. Underlying, as they do, a property that has cost nearly $38,000,000, and which is constantly increasing in value, they need no recommendation. The small remaining balance will soon be absorbed.

$100 bond will cost to-day	$90 29
500 bond will cost to day	451 46
1,000 bond will cost to day	902 92

We also buy and sell the **Central and Western Pacific Gold Bonds** at the market price.

The Central Pacific Company has now over 1,222 miles of completed road, and its earnings this year will reach upward of $13,000,000. Their securities should rank with those of the Government itself.

We also continue to deal in Government Bonds, execute orders at the Stock Exchange for investment Stocks and Bonds, receive deposits on which we allow interest at the rate of four per cent. per annum, and conduct a general banking business.

FISK & HATCH.

☞ The Metropolitan street railway will be entirely completed from the Georgetown Heights to the capitol, and be in good order by the 20th of September next.

☞ Stephen Kendrick, Jr., of Franklin, N. H., has been appointed Assistant Superintendent of the Green Bay and Lake Pepin Railway in Wisconsin.

The Baldwin Locomotive Works.

One of the most famous among the many large manufacturing institutions of America is the Baldwin Locomotive Works, located on Broad street, in this city. These works date back to the earliest history of steam roads, and the late Mathias W. Baldwin, the founder of the works, was one of the pioneers in American locomotive building. In the year 1830 he built his first engine—a stationary, which is still in use—and seven years later, in 1831, the first, successful locomotive engine, used for a time in the Philadelphia Museum as a curiosity. During 1832 the Philadelphia, Germantown and Norristown Railroad Company, then operating six miles of road by horse power, ordered an engine. Mr. Baldwin had then only about twenty hands employed, and this force, in about one year, produced the "Old Ironsides," a four wheeled engine, with wood and iron drivers, fashioned after the old English patterns somewhat, which was a decided success, and for years did valuable service for the company. Subsequently a second engine was sent to South Carolina, and a third, purchased by the old State road, from Philadelphia to Columbia, at once established the reputation of the builder, and his first shop in an alley running from Walnut street, and betweeen Fourth and Fifth. He removed to Lodge alley, and again in 1834 to Broad and Hamilton streets, on the site of the present works. Here he invented improvements and purchased many more, until the awkward looking, old fashioned engine, without any "cab," has grown into a beautiful and harmonious looking pile of mechanism, which is not excelled anywhere. The growth of the works to accommodate the rapidly increasing trade has been almost beyond conception. In 1832 only 20 hands were employed, and one engine required a year to build. At this time there are about 3000 skilled mechanics employed, and the present firm are turning out an average of 1¾ engines per day. From a single, narrow, contracted shop, where a hammer could scarcely be slung aloft without striking the wall, the works now cover 8 acres and ⅝, and from a pay roll of $200 per week it has grown to $40,000 per week, or over two million dollars per year. In order to show the enormous extent of the work done in all these years it may be stated that there have been built, of all sizes and kinds, 3,342 engines, the lowest selling for $3,500, and the highest for $34,000. Averaging these engines at about $12,000 each, it will be seen that this one concern has manufactured within forty years engines to the value of $41,104,000, or over $1 000,000 work per year. During these years the firm have paid out for labor alone about $15,000,000, and some of the employes have seen the full forty years of service with the firm. One Mr. Lewis O. Howell, who forged the iron for the first engine is still a foreman, a hale hearty man of 71 years, who looks as though he were equal to another quarter of a century. As showing the imperfections of the early engine made this gentleman states that a large party of celebrities who make a trial trip over the old State road on the third engine built, had large holes burned in their clothing by the sparks from the engine, there being no "spark arrester" known then. To further exhibit the increase of demand for the later perfected engines, it is stated that in 1866 there were 118 engines built, 127 in 1867, 124 in 1868, 235 in 1869, 280 in 1870, 331 in 1871, 422 in 1872, and the number for 1873 will exceed 500.

The 1000th engine was furnished in February, 1861; the 2000th on October 30th, 1869, and the 3000th November 13, 1872, and the last one completed up to this writing numbered 3,342, on July 18th. It is stated that one other immense firm in Berlin has turned out over 3000, having on exhibition their 3000 h'locomotive at the Vienna Exhibition; but this firm employs ten thousand men to do less work and at greater cost in the same time than the Baldwin works, thus proving conclusively the superiority in skill, the perfection in machinery, and even Europe itself acknowledges the superiority in perfection of the American built engine.

The Baldwin Works cover over an area of 8⅝ acres, or nearly 4 squares, the real estate possessions amounting in the aggregate to about $1,400,000, of which about $425,000 is in buildings. The works front on Broad street from Pennsylvania avenue to Spring Garden street, 760 feet, looking like a busy city all to itself. The several lots occupied by the works have a superfical area, all told, of about 400,000 square feet, and upon them are erected substantial brick structures, one, two three and four stories high, filled with the most perfect and expensive machinery.

The following table will show the number of shops, the area of each, the purposes for which they are used, the number of men employed in each and the number of machines:

Number.	Buildings.	Area in square ft.	Number employed.	Machines.
1.	Frame shop	18,463	99	55
2.	Connecting rod shop	19,213	124	63
3.	Wood pattern shop	13,213	125	30
4.	Steam Hammer shop	28,600	190	15
5.	Office buildings	2,166	19	..
6.	Store room	1,600	14	..
7.	Wheel department	10,890	63	70
8.	Smith and boiler shop	56,167	486	45
9.	Drawing room	2,166	18	..
10.	Standard gauge shop	1,600	13	10
11.	Piston and guide shop	14,486	86	68
12.	Valve motion shop	10,216	115	43
13.	Erecting shop	23,800	285	30
14.	Grinding room	4,148	10	9
15.	Pipe shop	4,148	28	5
16.	Sheet iron shop	6 800	32	5
17.	Paint shop	8,296	19	5
18.	Machine repair shop	6,800	46	21
19.	Brass work shop	6 800	34	35
20.	Brass foundry	2,800	17	..
21.	Tool repair shop	6,800	12	9
22.	Pattern loft	6,800	7	..
23.	Iron foundry	18,000	265	38
24.	Smith shop	16,400	146	6
25.	Forge shop	9,600	119	10
26.	Spring shop	10,004	36	18
27.	Tender paint shop	9,790	10	..
28.	Truck wheel shop	13,706	80	27
29.	Tank shops	9,790	62	21
30.	Stack shop	9,790	38	12
31.	Tender frame shop	9,790	85	44
32.	Punching & shearing shop.	4 800	16	5
33.	B. smith shop	1,700	6	..
34.	Smith shop (No. 2)	8,140	18	4
35.	Stables	7,000	27	..
	Total	390,482	2,700	703

In addition to the above, there are 18 stationary engines, 26 boilers and 115 laboring men not enumerated, whilst a force of over 200 men are given employment at times, increasing the entire force to over 3000 persons.

The consumption of material in the works is of course enormous, and to give some idea figures are again resorted to. The average annual consumption of the principal articles used is as follows:

Coal used	18,000	tons.
Bar iron	3,000	"
Pig iron	5,800	"
Boiler iron	1,150	"
Boiler plate steel	420	"
Copper	384,000	lbs.
Spring steel	350,000	"
Lead	100,000	"
Pig tin	55,000	"
Spelter	42,000	"
Coke	40,000	bush.
Charcoal	5,600	bbls.
Steel tires	2 100	
Chilled wheels	5 000	
Flues	58,000	

As a matter of course, the larger number of the engines manufactured are sold and used in the United States, but there have been a great many sent to foreign countries. An investigation goes to prove that since the year 1860 the firm have sent abroad 154 engines, as follows: To Canada, 39; to Cuba, 25; to Brazil, 50; to Peru, 13; to Russia, 10; to Finland, 9; to Nova Scotia, 4, and to New Brunswick, 4. There are now being constructed 50 for Canada, 11 for South America, and several smaller orders for other countries. Mr. Baldwin, the founder, died in 1866, after a long life of usefulness, and, after many changes, Mr. M. Baird, a former apprentice in the business, became a prominent member of the firm. A few months since the latter gentlemen also retired, disposing of his interest in the business, amounting to one third, for $1,125,000. The present firm is composed almost entirely of young men, who have grown up with the business, from office or apprentice boys. Mr. George Burnham, the senior, who has been in the concern for 35 years, is the financier, Mr. Charles T. Parry, another member, is general manager. He is now abroad in Europe on a business tour. Dr. Edward H. Williams, an experienced railroad official, is now the selling, or contracting partner. Mr. William P. Henszey is the mechanical engineer. Mr. Edward Longstreth, a former apprentice, who was made a foreman before he was free, is now a partner, and general superintendent. Mr. John H. Converse is an old journalist.

Some of the machines used in the establishment are well worth notice. One steam hammer has a weight of over 3000 pounds, to pack and cram the red hot iron into a sufficiently compact mass to sustain great weight. Another, a tram engine, picks up an entire engine boiler and carries it from point to point. A third holds the boiler suspended, whilst a massive upright steam riveter clinks with one great blow the red hot rivet through the boiler, saving hours of manual labor. The punches, the shears, the planers, the great wheel lathes, all are huge, and yet all apparently perfect for the purpose intended, and yet improvements are being constantly made. The work goes through no less than thirty-five different shops before completion, each department of which is presided over by an experienced and competent head. Nearly all the employes are Americans, and the skill displayed by them in the several branches marks Yankee superiority over all other nations.—*Philadelphia Ledger.*

Journal of Railroad Law.

RAILROAD COMPANIES—RULES OF EVIDENCE AS TO EXPLANATION ON BILLS ON LADING.

The recent case of Long *vs.* The N. Y. Central R. R. Co., (50 N. Y., 76), was an action brought against the defendant as a common carrier for an alleged refusal to deliver 500 empty pork barrels received from plaintiff at Buffalo, under an agreement to transport to and deliver to plaintiff at New York.

The other facts are clearly and plainly stated in the following opinion by—

ALLEN, J.—There was a conflict of evidence as to the contract for the carriage of the barrels so far as the same rested in parol, and depended upon the verbal negotiations and understanding of the agents of the respective parties. The witnesses differed widely in their recollection and version of the terms of the proposal made by the one party and assented to by the other; and the disagreement of the witnesses was in respect to the freight, an essential and material part of the agreement. If the rights of the parties depend upon the agreement, thus made and consummated by the verbal negotiations of the actors, the verdict of the jury is conclusive upon this branch of the case, and the contract must be assumed to be that which the jury, by their verdict, have found it. The contract is one which is ordinarily reduced to writing before or at the time its performance is entered upon. Goods are seldom

transported by common carriers except under an agreement evidenced by a written instrument in some form. The shipper of property, either by land or water, ordinarily takes from the carrier a bill of lading, receipt or other voucher acknowledging the receipt of the goods, and the purpose for and the terms and conditions upon which they are received. The evidence in this case accords with what from experience may almost be assumed to be the universal custom of common carriers, to wit, that freight is always carried by this defendant under a written contract. The evidence is that at the time the barrels were received by the defendant a receipt was given to the party delivering them, expressing the terms of the contract, and that this receipt was presented by the plaintiff at the time he demanded the property. The property was delivered to and the receipt or contract accepted by the party representing the plaintiff, who at the time requested the defendant's agent to take it at a lower rate, which was refused. This testimony on the part of the defendant is unexplained and uncontroverted by the plaintiff. The verbal contract was merged in the written agreement, and the latter must be taken as the evidence, and the sole evidence, of the final and deliberate agreement of the parties. If it does not embody truthfully the terms of the agreement as actually made, the plaintiff or his agent should not have received it or assented to the carriage of the property under it; if accepted by the agent by mistake that fact should be shown. But at the time of the receipt of the goods, and the delivery of the shipping receipt or contract for carriage the parties were in a position to correct any mistake or misunderstanding as to the terms of the verbal agreement, and definitely adjust its terms. The one could retain his property or ship by some other carrier, and the other could refuse to accept the goods for carriage except upon such terms as should be agreed to. All prior negotiations and agreements were superseded by the formal written agreement; and by it, and it alone, in the absence of mistake or fraud, the duties and liabilities of the parties must be regulated.

Instead of relying upon the oral agreement of the defendant's agent, the plaintiff has elected to take the express written agreement of the party; and this agreement is perfect as a contract for the carriage of the goods, embracing all essential particulars. The rule that when a contract is reduced to writing, recourse must be had to the instrument to ascertain its terms, and that resort cannot be had to prior negotiations to vary its terms, and that everything resting in parol becomes thereby extinguished, was applied to a contract for the sale of a ship in Mumford *vs.* McPherson (1 J. R. 414.) The rule was recognized in Bostwick *vs.* Baltimore and Ohio R. R. Co. (45 N. Y. 712); but the case was taken out of the rule by the fact that the goods had been actually shipped under the verbal agreement, and the written agreement or bill of lading was sent to the shipper one or two days after the property had been shipped and after the owner had lost the control of the goods and was in no situation to object to its terms.

Here the contract was entire and the written instrument was complete, making by itself a perfect contract, and was delivered and accepted by the plaintiff's agents at the time of the receipt of the goods by the defendant; and there are no circumstances in the case, as made, to authorize a resort to the prior verbal negotiations or agreement by the parties. The court held on the trial that the verbal contract was that by which the rights of the parties were to be determined, and the verdict passed against the defendant upon that ruling and the terms of the contract as it rested in parol and was found by the jury. This was erroneous, and entitles the defendant to a reversal of the judgment. By the parol contract, as claimed by the plaintiff and as found by the jury, the barrels were to be carried, at specified rate per hundred pounds actual weight, while by the written contract, they were to be carried at the same rate "at estimated weight" as used in the contract, meant that each barrel was estimated to weigh 100 pounds. That this was the true meaning of the term, as there used, was not controverted upon the trial. The contest was as to which contract should govern, the verbal or written, and the plaintiff prevailed in excluding the written and establishing the verbal agreement as the contract of the parties. For the error the judgment must be reversed. Other questions of more or less importance and difficulty are presented, but as the facts may be essentially varied upon another trial they are not considered.

The judgment should be reversed and a new trial granted.

Judgment reversed.

Payment of the Alabama Indemnity.

The *Evening Post* gives the following statement in regard to the method adopted by the British Government for the settlement of the Geneva award:

Early in June last a contract was entered into by the British Government with three American banking houses in London, Messrs. J. S. Morgan & Co., Messrs. Morton, Rose & Co., and Messrs. J. Cooke, McCulloch & Co., to provide and deposit in New York to the order of the British Government, or their nominee, gold coin to the amount of the Geneva award. The first object was of course to provide for the payment of the money; the second that this should be done in such a way as might, so far as practicable, avoid any financial derangement which would have probably followed the shipment to the United States of $15,500,000 in gold, or the sudden drawing of bills of the agents of the British Government to the amount of the sterling equivalent. A credit was accordingly opened at the bank of England for the bankers referred to, at a stipulated rate for the dollar. Their correspondents here have from time to time within the past two months negotiated exchange to the amount of nearly two millions sterling, the proceeds of which have been deposited in certain registered banks in this city to the credit of Mr. Archibald, the British consul general at this port, the corresponding credit being given at the same time to the London bankers in the Bank of England. The other million pounds—or thereabouts—is represented by called bonds purchased by the bankers to the contract in London. As the bonds are purchased the amount is telegraphed to the Secretary of the Treasury, who thereupon issues certificates of deposit of the amount of coin the bonds will represent when payable. These certificates and the certificates of deposit in the banks, of the gold received for bills of exchange sold, are endorsed to the order of Mr. Archibald, the nominee of the British Government in the contract, and will be held by him until the time of payment of the award on the 13th of September. The full amount will then be paid over in one sum to Mr. Fish, the Secretary of State, at Washington, in discharge of the award.

The business has been skilfully as well as quietly managed, and has certainly prevented any of the apprehended disturbance in financial affairs.

From the official report of the iron mining and manufacture in Sweden in 1871, just published, we learn that the total amount of mine-ore was raised 633,983 tons, and of lake and bog ore 15,450 tons, an increase of nearly 30,000 tons of the former, and nearly 2 000 tons of the latter over the previous year. The export of pig iron amounted to 40,000 tons; there was besides this a trifle upward of 12,000 miscellaneous castings. The manufacture of cast iron was less than the year before, and in round numbers amounted to 185.000 tons. Of steel there was made upward of 8,000 tons, of which more than one-half was by the Bessemer process.

☞ At a meeting of the Directors of the Chicago and Lake Huron Railroad Company, held at Port Huron July 31st, the following officers were elected; President, William Bailey Lang, of New York; Vice President and General Manager, William L. Bancroft, Port Huron; Secretary, E. B. Taylor, Port Huron, Counsel, L. D. Dibble, Battle Creek; Superintendent, E. B. Taylor; Chief Engineer, Charles Palmer.

LETTING
NORTHERN PACIFIC RAILROAD.

SEALED PROPOSALS will be received at the office of the Chief Engineer, No. 23 Fifth avenue, in the city of New York, until noon of Wednesday, September 10, for Grading and Bridging all that portion of this Company's Road, between the Missouri and Yellowstone rivers, 205 miles.

Proposals will be received for the whole distance, or for sections of about 25 miles each.

For further information apply at the office of the Chief Engineer in New York, or to General T. L. Rosser, Division Engineer, Minneapolis, Minn.

W. MILNOR ROBERTS, Chief Engineer.

LANSDELL'S
Patent Steam Railroad Water Station.

DISPENSES WITH Tanks, Tank Houses, Stationary Power, AND Attendance.

CAN NOT FREEZE IN ANY CLIMATE, UNDER ANY CIRCUMSTANCES.

COSTS LESS Than One Half the Price of a FROST PROOF TANK.

The Engineer in charge of the Locomotive attaches the Hose A to a steam valve in the boiler. Steam passed through the pipe D and slip joint F into the globe H, producing a vacuum; the water is then lifted through the pipes I I and forced through the column E and hose C into the tender, filling any ordinary tender in about three minutes. When steam is shut off all the water in the pipes returns into the well, and any condensed steam passes off through the drip valve G, leaving nothing to freeze. The handle B serves to turn the discharge pipe and hose in any direction. The water delivered into the tender is warm, thus utilizing the steam used. The discharge tubes, represented above made of hose, can be made of iron if preferred.

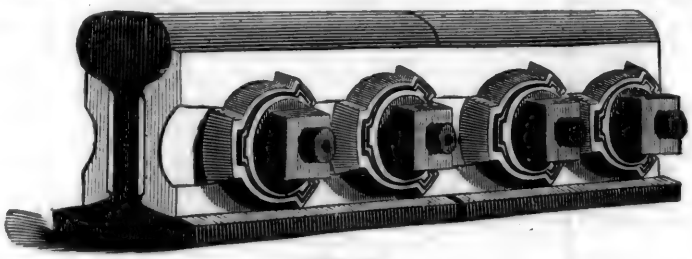
THE LOCK-NUT & BOLT COMPANY OF NEW YORK,

No. 61 Broadway, New York.

Manufacturers of all kinds of **BOLTS** for FISH-BARS, BRIDGES, CARS, MACHINERY, &c., with the "CUMMING NUT-LOCK," the only method of locking a nut to the bolt.

PATENTED June 16, 1868.

IMPROVED August 23, 1870.



Unequalled for Cheapness, Simplicity and Effectiveness.

DESCRIPTION.—A pointed copper key is placed in a groove cut in the threaded part of the bolt, *over which* the nut is screwed to its position, cutting its own thread in the copper, thereby taking up all the slack between the bolt and the nut. By riveting up against the face of the nut the projecting portion of the copper key, the nut is firmly locked in its position, but can be readily adjusted or removed with a wrench without injury to either bolt or nut.

Severely tested for over *four years*, they have *never failed*, and are *now in use on over fifty Railroads*, giving perfect satisfaction. We solicit a trial *anywhere*.

Licenses Granted to R. R. Companies, Car Builders and others.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

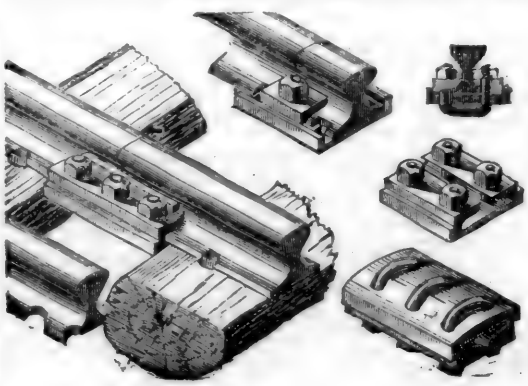
The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.



That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

FISHER'S PATENT

Wrought Iron

RAIL JOINTS,

MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

New Route to Market for Western Grain.

Since the Chesapeake and Ohio Railroad Company began to transport heavy merchandise over their road in connection with the river and ocean steamers, applications have been made by parties at the West to have corn and wheat carried in bulk; in fact, large quantities of corn have been received at Huntington for shipment. In order to do away with the expense of bags and the handling, it has been decided to erect elevators at the western terminus so as to transfer the grain from river barges to the cars by steam power; and orders have been given for two of modern construction to be begun at once. The grain, flour and provisions traffic over this line must be very large, as its water connections are available during every month in the year, and the water transport on the Ohio and Mississippi rivers when on the same large scale as that of the latter will be equally as cheap; while the coastwise and foreign shipments from the Chesapeake are not liable to interruption at any season. It will be noticed that grain and other produce can be sent from points as distant as Saint Paul, Dubuque, Leavenworth, Omaha, Yancton, Saint Louis, Peoria, Little Rock, Shreveport, New Orleans, Memphis, Nashville, Tuscumbia, Louisville and Cincinnati, by continuous navigation, to the Chesapeake and Ohio Railroad terminus, and thence by a short and easy haul be put on board seagoing vessels destined for all ports of the world.

NOTICE TO INVESTORS.

The attention of the investing public is called to the limited remainder of the NORTHERN PACIFIC RAILROAD SEVEN-THIRTY LOAN. The unsold balance will be soon absorbed by current sales, after which the Company has resolved to issue only six per cent. bonds.

There are now more than 500 miles of the road in regular operation, with a growing traffic; surveys and construction are progressing satisfactorily; the survey prosecuted the present season, in connection with the Stanley military expedition, has resulted in the location of an excellent line through Western Dakota and Eastern Montana, and the company has advertised for proposals for grading and bridging the Yellowstone Division, extending 205 miles from Bismarck, at the crossing of the Missouri River to the crossing of the Yellowstone, in Montana. The Company's lands (amounting to more than 20,000 acres per mile of road) are selling to settlers at an average price of nearly $6 per acre, and the proceeds of land sales constitute a Sinking Fund for the repurchase and cancellation of first mortgage bonds.

The Company's seven and three-tenths per cent. gold bonds, the last of which are now offered, yield nearly 8¼ per cent. per annum at the present price of gold.

All marketable securities are received in exchange at current rates, and full information furnished on inquiry.

JAY COOKE & CO.,
No. 20 Wall-st., New York.

☞ A committee of the directors of the Philadelphia, Wilmington and Baltimore Railroad have awarded to the Baltimore Bridge Company the contract to replace the present wooden bridge now spanning the Susquehanna river at Havre de Grace by an iron structure. In all there are twelve spans in the bridge, each two hundred feet in length. The replacement of the present structure by an ironone will consume considerable time, as but one span can be operated upon at one time.

Buffalo and Lake Huron Railway.

The report for the half-year ending 30th June, 1873, states that the accounts show the balance of revenue, including the amounts previously brought forward, as £24,334, after providing for the payment of interest on the company's bonded debt of £763,758, at 5¼ per cent. per annum. The suit in Chancery of Ayres v. the Buffalo and Lake Huron Company having been withdrawn, the directors have been enabled to pay to the proprietors 5s. 6d. per share dividend for the year 1872, amounting to £14,622, and they propose to pay for the half-year just closed a dividend of 3s. 6d. per share, leaving a balance of £407 to be carried forward. A copy of the Act of Parliament, enabling the company to carry out the recently agreed re-arrangement of the bonded debt, which has received the Royal Assent, is annexed; and the board will be prepared to issue new bonds, in accordance with its provisions, after 1st Sept. next.

The revenue account for the half-year showed that the Grand Trunk Company had paid the rent to the 30th of June last amounting to £30,000, from which was deducted £21,003 for interest coupons on various stocks at 5¼ per cent per annum, due in the months of January, February, March and June respectively, leaving £8,997. To this was added £15,622, balance from the preceding half-year, £665 balance of interest account, and £10 transfer fees, making a total of £25,294. From this was deducted £960 for office and other expenses, leaving a balance of $24,334.

☞ The Richmond *Dispatch* says that "the freight and travel on the Chesapeake and Ohio Railroad continue to increase almost every day. The receipts of coal are at this time very large. On Saturday a large number of black walnut stumps gathered along New river were received here to be shipped to New York, where they will be made into buttons. Very few persons, perhaps, are aware of the extent of this kind of freight. The railroad company is at present busily engaged in having a large coal dump and stand erected near the engine house, just above the depot, and when this and other contemplated improvements are completed the removal of freights will be greatly facilitated."

New York and Oswego Midland Railroad.

The first regular passenger trains through from New York to Oswego, and from Oswego to New York, were started simultaneously from both cities on Monday evening. There will hereafter be daily trains through, thus opening up a new route from the Lakes to the metropolis. The main line is divided into three sections. The New Jersey division is 88 miles in length; the Middle division 145 miles, and the Western division 100 miles. Total from New York to Oswego, 333 miles. There are besides several branches, at Rome, Utica, Scipio, New Berlin, Delhi, Ellenville, and Crawford, making an aggregate in main line and branches of 558 miles. It is proposed to extend the line from Scipio to Buffalo within a year, which will add some 120 or 130 miles more to the aggregate of track. All this vast work has been accomplished under very disadvantageous circumstances. While its most active projectors were men of moderate means, none of them were millionaires. They pushed their enterprise by the simple force of energy, and by an intelligent presentation of the necessity, importance and merits of the work. The town bonding law has been of great assistance to them. Indeed, but for that law it is doubtful whether the road could ever have been built—certainly not in many years. This law has not only been of service in the direct aid which it has secured to the enterprise, but in attracting also outside capital, which seemed secure with these town bonds as (practically) collaterals. Whether the result will prove the investment, either by the towns or by individuals, to have been judicious as a simple investment, may be a matter of doubt; but the towns have this security, that the construction of the road has so greatly enhanced the marketable value of their property that they will be the gainers if every dollar raised by town bonds is sacrificed. The road is built. Their property has doubled in value, and nothing can happen in the future either to remove the road or depreciate their property.—*Albany Evening Journal.*

Railway Management.

Loosely quoting the old saying that the interests of the public and of railway companies are identical, which in a great measure is perfectly true, amateur railway managers are frequently heard to advocate an excessive train service. The more trains, say they, the better for the public, and therefore the more traffic. But mark the course a very experienced set of managers took, the moment they directed the affairs of the Metropolitan railway. They reduced the train service and made more profit. Sir Edward Watkin said at the late meeting of that Company—"We have run 70,000 less miles; we have increased the portion of the day which we can devote to the repair and sustentation of your property by 70 minutes, which is a most important consideration in a concern which runs a thousand trains in 24 hours. We have done that, but of course we have carried a smaller number of passengers What does that prove? It proves that you were carrying a certain amount of your passenger traffic at a loss. You were running more mileage than was profitable, and therefore, though a certain part of the traffic you got represented money over the counter, it was undoubtedly carried without the proper element which should attach to all commercial operations, viz., profit."

This embodies the practice we have always contended for, namely, that it is fallacious to run trains to get traffic; that the right course is to follow the commercial principle, and only do work that pays. An account should be taken of each and every train run, and any that did not yield a fair surplus over working expenditure should be taken off. The average cost of working per train per mile is known, and therefore it can be ascertained with certainty whether or not a train yields a profit.

The appointment of a train service must to some extent be experimental, but there is no excuse for continuing those trains which do not pay after a reasonable time has been allowed for learning their results.

If it be said that it is a public injury to discontinue trains with thin traffics, we answer the injury cannot be very great if the traffic is so exceedingly small that it does not cover bare working expense.—*Herapath, Aug. 2.*

United States Rolling Stock Co.

REPORT OF THE DIRECTORS.

The earnings of the six months ending June 30th have enabled the board of trustees to declare a dividend of 6 per cent. in gold, being at the rate of 12 per cent. per annum, payable in full on the first issue and *pro rata* on the second issue of the share capital of the Company, leaving, after paying the operating expenses, a sufficient balance as a reserve fund to provide against the loss for wear and tear on the property, for which the lessees are not accountable. Should this fund be needed for other purposes considered essential to the success of the Company, then it will be distributed in accordance with the terms of the prospectus. The statements appended give in a condensed form the transactions of the half year just expired, leaving for the annual report the detailed statements of the working of the Company during the twelve months. It will be noticed in referring to the statements of the rolling stock owned by the Company, and to its cost, that there remains now but little equipment to receive, and that within the next two months the whole capital will have been paid out, when your Company will earn a full rental on its property, while it has heretofore only received it on that part of its capital represented by the rolling stock delivered. The demand for the rolling stock on lease has constantly increased; there are applications on file for 2,000 coal cars and 2,500 box cars, as well as for several locomotives and other cars, such as flats, passenger coaches, &c. In mentioning this demand I only desire to confirm what I stated in my report of January 15th, 1873, that any reasonable addition to the present capital of the Company can be safely and advantageously invested.

GEO. B. McCLELLAN, President.

The financial condition of the company on the 30th of June, 1873, was as follows:

Balance to credit of profit and loss		$26,651 19
Estimated gross rental from January 1st to June 30th, 1873		441,129 00
Interest		14,546 00
		$482,326 19
Estimated general expenses from Jan 1st to June 30th, 1873	$24,466 16	
Insurance	808 63	
Doubtful accounts	17,994 21	
Freight	5,475 33	
		48,744 33
Balance available for dividend and reserve fund		$433,581 86

☞ The Trans-Continental Railway Company of Texas has conveyed to the Texas and Pacific Railroad Company all its franchises and real and personal property in Texas, Louisiana, Arkansas, or elsewhere, in consideration of $1,000,000 in seven per cent land grant bonds of the Texas and Pacific Railroad Company, redeemable in forty years from July 1, 1873.

Columbus and Hocking Valley Railroad.

The earnings of this road for the year ending December 31, 1872 were as follows:

From passengers		$113,076 77
" freight		721,314 07
" express and mail		8,847 50
" telegraph		921 60
" miscellaneous		8,567 08
" mileage		2,165 43
		$854,892 45
Expenses, viz:		
Repairs of road	$140,242 24	
Locomotive expenses	27,613 64	
Car expenses	30,651 94	
Transportation expenses	159,929 17	
General operating exp'ses	51,083 33	
Loss and damage	2,709 85	
	412,229 67	
Net earnings		$442,662 78
Add balance from previous year		285,118 87
Total		$727,781 65
From which deduct—		
Interest on bonds	$151,333 39	
Dividend of March 4, 1872, on all business prior to 1872	189,500 00	
Dividend of July 1, 1872, on first half of 1872	56,730 00	
	397,563 39	
Balance to credit of income account December 31, 1872		$330,218 26

The earnings and expenses have increased in about the same proportion, being 55½ per cent over the previous year. The ratio of expenses to earnings is 48.22 per cent. The report says:

During the year one thousand and twenty tons of steel rail have been laid in the main track, extending from Columbus, eleven miles.

The rails taken up, have been used for renewals and additional side tracks.

The masonry for five bridges (for double track) has been built, and three combination bridges (iron and wood) of seventy-five feet span each, have been placed on the same.

There have been four miles of side tracks built at Columbus and on the line during the year.

The company has increased the equipment by the purchase of four hundred and sixty-seven coal cars, twenty-five flat cars, three caboose cars and six locomotives, at a cost of $413,440 98, and with this large increase, we find ourselves unable to supply the demand.

A large proportion of our coal tonnage is delivered to connecting roads which require several days and even weeks in which to return our cars.

As soon as all the connecting roads to which we are furnishing coal, will furnish their proportion of cars, (now promised within a reasonable time,) your company will be able to do a much larger business with a small increase of motive power.

Twenty-eight and one half acres of land have been purchased at Columbus to furnish room for a round house, shops and side tracks.

A round house to contain thirty-two stalls has been laid out, and one-half of the same nearly completed, also a blacksmith shop of fifty by eighty feet contracted for, which will be completed within sixty days.

In your last annual report, an agreement between the miners and operators for a scale of prices from January, 1872, to April, 1873, was alluded to, and the hope expressed that the principle adopted would result satisfactorily to both parties, and give a uniform business to your road. That hope has been realized and while other sections of the country have been suffering from differences between the miners and operators in their respective sections, the miners and operators on your line of road have been doing well, and the agreement made January, 1872, has been extended from April, 1873, to April, 1874, so that

the miners, operators and your company, can rely on a uniform business during the present year.

At a meeting of your board of directors, held January, 18, 1873, it was resolved, "That this company take the necessary steps to build branch roads from its main line up Monday Creek and Snow Fork." The surveys for the same are now being made.

The dividend of March, 1872, was declared from earnings prior to January, 1872 and paid in the stock of the company as the earnings were used to procure equipment.

The dividend paid August 1, 1872, was from the business of the first half of the year. The dividend for the business of the last half of the year must necessarily be shown in the report for the present year, as our fiscal year closes on the 31st of December.

The company have 25 locomotives, 8 first class passenger cars, one passenger and baggage car combined, 3 baggage cars, 957 eight-wheel coal, 60 box and 75 flat-cars; while that owned by private parties and running on the road consists of 459 eight-wheel, and 100 four-wheel coal cars. The company also own 11 caboose cars for freight trains. The car mileage has been as follows: passenger, 219,203; freight, 6,782,101; baggage, 96,305—total, 7,097,609. The number of miles run by engines has been 499,582. Number of passengers carried, 134,999. Pounds of freight transported (including 1,209,762,000 coal) 1,863,039,946.

GENERAL ACCOUNT, December 31, 1872.

☞ Four routes have been surveyed for the extension of the Portsmouth, Great Falls and Conway Railroad, from Great Falls to Dover. The engineers incline to the opinion that it will not be an expensive road to build.

Central Pacific Railroad.

REPORT OF THE CHIEF ENGINEER.

ENGINEER'S OFFICE, C. P. R. R.,
SACRAMENTO, July 1, 1873.

To the President and Directors of the Central Pacific Railroad:

GENTLEMEN: In presenting a general report of the progress of surveys and construction, and of the present condition of your road, it will I presume, be unnecessary to trace in detail the history of the work from its inception, as most matters of interest in this connection have from time to time been placed before you.

The most important works undertaken by your company since the connection of the main line with the Union Pacific Railroad, have been confined to the State of California, and have been designed as a part of a general system, comprehending in its plan the development of the great interior valleys of the State, and providing suitable means of communication between them and the most eligible point for the connection of inland and ocean commerce.

In furtherance of this plan, the construction of the Western Pacific had been commenced previous to the completion of the track on the main line and the connection of the Central Pacific and Union Pacific roads, and was opened for traffic in the fall of 1869, thus forming an unbroken line from Omaha to San Francisco Bay.

Simultaneously with the construction of the Western Pacific, work was commenced on the extension of the California and Oregon Railroad. This road was in operation previous to 1868 to a point about seven miles south of Marysville, and it was pushed rapidly forward to the town of Redding, Shasta County, one hundred and seventy miles from Sacramento, and, by the line of our preliminary survey, one hundred and thirty-nine miles from the northern boundary of the State.

The construction of the road thus far, through the Counties of Placer, Sutter, Yuba, Butte, Tehama and Shasta, has developed some of the best agricultural lands of the State, and will render productive a large region heretofore uncultivated and unpopulated, for want of facilities for transporting grain and other products to market.

The certainty of the grain crop, in the northern part of the valley especially, will always render farming lands there very desirable, and the appreciation of real property since the construction of the road is ample evidence that its advantages are not overlooked by those seeking investments in that direction.

The fine grazing region in the northern part of this State and Southern Oregon is already being occupied, and the products of these large districts, when fully stocked with sheep and cattle, must find an outlet to a market over your line. Added to this may be mentioned the business of the thrifty mining and agricultural population of Siskiyou and adjoining counties, and in the transportation of lumber from some of the best pineries in the State. Large deposits of marble and iron are known to exist in convenient proximity to the line, which will undoubtedly be worked with profit at an early day. Valuable deposits of coal have already been discovered in Shasta County, but have not yet been worked extensively, and similar discoveries have been reported in the adjoining counties on the north.

The connection of this line with the Oregon and California Railroad, or its construction as an independent line to the Columbia River, will make this one of the most important routes of travel on the Pacific coast, and will be sought not only by the business community, but by tourists, to whom it will open one of the most interesting fields for pleasure and observation that has yet attracted their attention.

Not less important than the California and Oregon, is the San Joaquin Valley Railroad, forming the great Southern, as the former does the Northern, arm of the system.

Both of these roads, since their commencement, have been consolidated with, and are now known respectively as the Oregon, and San Joaquin Divisions of the Central Pacific Railroad. The latter diverging from the main line at Lathrop, runs southeasterly in a nearly direct line for a distance of one hundred and forty-six miles to Goshen, where it connects with the Southern Pacific Railroad, which is already constructed from this point to Delano, a distance of some forty-one miles further south, and is ultimately, as I understand, to be extended southerly through the State to the Colorado River, thus forming an important feeder to this part of your road, making it in fact a link in the great Southern trans-continental route, which must eventually find it most eligible terminus at San Francisco Bay. In view of its importance in this respect, at well as with regard to the heavy local traffic which must result from the development of the agricultural resources of this valley, the road has been constructed upon a maximum grade of ten and one-half feet per mile ascending, and with a grade of but five and one-fourth feet per mile against freight descending the valley. The alignment is also very favorable, the total curvature after leaving Lathrop being, in a distance of one hundred and forty-six miles, but two hundred and fifty-five degrees, with a minimum radius of five thousand seven hundred and thirty feet.

This great valley, extending from the conduence of the San Joaquin and Sacramento Rivers, southeasterly for a distance of two hundred and forty miles, with a width of from sixty to seventy miles, nearly all susceptible of cultivation, is as yet sparsely populated, though the large grain shipments from the comparatively small area under cultivation, fully attest its value as a grain-producing region.

With the completion of the system of irrigation already in contemplation by resident and foreign capitalists, and for which the topography of the country is admirably adapted, the population of this valley must rapidly increase; and when this is accomplished its productive capacity can hardly be overestimated.

Work has already been commenced on one of the principal irrigating canals, and it is confidently expected that more extensive operations will soon be inaugurated, looking to the speedy development of a large area, now comparatively useless except for grazing purposes.

The general business anticipated upon this, as well as upon the Oregon Division of your road, has thus far been more than realized; and although these lines now command the greater portion of the business of the mining districts of the Sierra Nevada, as they do the business of the valley, it is thought that the construction of lateral lines may at many points be made remunerative, tending to develop local enterprises which are now languishing for a cheap and expeditious means of communication with the main lines leading to the seaboard.

The vast forests of pine and other valuable timber which abound in many parts of the Sierra Nevada; valuable ore deposits undeveloped or but indifferently worked, for the reasons just mentioned, and towns that were once the centers of busy mining districts, are waiting for this communication with the valleys and coast, and promise remunerative returns when it shall be provided.

The topography of California and of the country lying between the Sierra Nevada and Wahsatch mountains is such that the business of the country must naturally flow towards, and find its outlet over, your road; in fact, cannot avoid centering upon your line. Hence the construction of lateral roads in this country must necessarily become feeders to your own.

The Virginia and Truckee Railroad, connecting with the Central Pacific at Reno, is an important illustration, and the impulse its construction has given to business in Virginia, Gold Hill and vicinity, warrants the belief that many similar enterprises will soon be inaugurated in Nevada and elsewhere. Surveys are already being made for a railroad from Elko to the Eureka, White Pine, Pioche and other important mining districts. The Utah Northern and Utah Central roads, extending

north and south respectively, through the fertile and populous valleys of Bear River and Great Salt Lake, both form important connections with, and already bring a large amount of business to your line.

The construction of the San Pablo and Tulare Railroad, which is already graded from Fassett (on the Central Pacific Railroad) to Antioch, will place you in connection with the roads leading to the Mount Diablo coal mines, and will enable you to receive and distribute coal for use on the road at much less than the present cost, and its distribution for use throughout the State must make this an important item of local freight.

LOCATION AND CONSTRUCTION.

The history of the location of the Central Pacific Railroad across the Sierra Nevada, and thence to Salt Lake Valley, having been referred to in detail in former reports, it is, I presume, unnecessary to repeat it here.

The heavy grades and sharp curves necessarily adopted, in locating a railroad line across this formidable range, of course renders its operation very expensive, though not more so than was anticipated.

In the construction of the road it has been the aim to bring it up to the standard of the first-class roads of the country. Embankments and excavations have been made of ample width, and the road is well ballasted. Where the material composing the road bed was not suitable for this purpose, it has been transported from the most available localities, though in some cases it has been found necessary to haul long distances.

On the mountain divisions, as well as elsewhere, where stone could be procured, all culverts and bridge piers have been built of that material, but in the valleys it has generally been found necessary to substitute wood for such structures. In such cases, whenever it could be obtained, redwood or cedar has been used.

The redwood, so well known on this coast, closely resembles red cedar in appearance, and fully equals it in durability. It has been used almost exclusively for ties on the valley roads, as well as for such portions of trestle and culvert work as are most exposed to decay.

For bridges and the superstructure of trestle work on the valley roads, Puget Sound pine has been used almost exclusively, and for purposes where rigidity and strength are both essential qualities, it has no superior among American woods.

Owing to the periodical rise and overflow of the principal streams in the Sacramento and San Joaquin Valleys, it has been found necessary to introduce trestle-work or piling for the approaches to many of the principal bridges, where otherwise embankments would not only have been more desirable, but would also have been cheaper, and the circumstances which required the construction, will also require the maintenance of this work, or its replacement with some more durable material. This, however, is not an immediate necessity, as the present structures may generally be depended on for several years without extensive repairs.

Your road first reached San Francisco Bay by a connection with the San Francisco and Oakland and San Francisco and Alameda Railroads, since consolidated with the Central Pacific Railroad.

The wharves in use by those roads had been built with a view to the accommodation of the Oakland and Alameda ferry business, and were extended only to a depth of water sufficient to meet the boats used upon those lines. Extensive additions were at once made to the Alameda Wharf for the temporary accommodation of the overland and interior freight, which was discharged there upon lighters, towed across the bay, and delivered to consignees at the Second and King Street Wharf, at which point freight for shipment on the road was also received, thus making San Francisco, practically, the terminus of the overland road as soon as the rails were laid to the eastern shore of the bay.

With the constantly increasing overland, as well as local freight, the necessity for some more expeditious method of handling it soon became apparent, and the steamer Oakland was accordingly fitted up as a car ferry-boat, carrying five loaded cars; and suitable slips being provided at Alameda and Second Street Wharves, freight was thus landed in San Francisco with but little delay and without breaking bulk.

Meantime, work had been commenced at Oakland Wharf with the view of extending it to ship's channel, and providing suitable slips for the reception of the largest sea going vessels, as well as for the boats in the regular passenger and freight ferry service.

The length of this wharf when it came into the possession of your Company, was about 6,900 feet, with a width sufficient for a railroad track and a roadway for teams, having at the terminus a single slip for the ferry-boat, El Capitan.

The plan adopted for its extension consisted of a new track for the main overland line, connecting with the old wharf about 4,000 feet from the Oakland shore and running parallel with the same to its terminus; and thence the extension of the wharf for a distance of about 4,200 feet, with a width sufficient for three parallel tracks and a roadway for teams; the construction of three slips, one for the passenger boat El Capitan, one for a new car ferry boat, and one of sufficient capacity to hold four large ships, with warehouses alongside for the temporary storage of grain when vessels were not at hand to receive it. Outside of these slips there is an available frontage on either side of more than four thousand feet, where vessels lie with convenience and safety.

Extensive passenger depots were also provided for, and every arrangement made for the rapid transhipment of passengers and freight.

A new freight ferry-boat, with a capacity for eighteen loaded cars, and additional room for sixteen car-loads of loose stock, was built and ready for use as soon as the new wharf was completed, in January, 1871, since which time all of the freight and passenger business of the Company's roads has been concentrated at this point. Recent extensive additions have been made for the reception and storage of lumber awaiting shipment by rail. The construction of this wharf has consumed 7,006,875 feet, board measure, of timber and plank; 848,658 lineal feet of round piles, and 215 tons of iron.

In manner of construction and for excellence of material, I think this may safely challenge a comparison with any similar structure in the world. Its efficiency for the purposes intended is best attested by the convenience and economy with which freight is handled and transhipped, and the security it affords the largest vessels, many of which have lain in its slips during the heaviest storms that have occurred since its construction, and with much less inconvenience than was experienced by vessels on the opposite side of the bay.

During the past year there have been loaded here with grain 110 vessels, carrying 161,135 tons; and all the local and overland freight received at or shipped from the terminus at San Francisco over your road, as well as all lumber, timber, ties, iron and other material for use on the road, passes over this wharf.

The stability of this structure has as yet been unaffected by the action of the currents, or by the heavy storms which at times prevail in the Bay of San Francisco; and although it cannot be regarded as permanent, its life will greatly exceed that of the San Francisco wharves, where the ravages of the teredo have been so destructive to all wooden structures exposed to their attacks.

The immunity of the wharves on the eastern side of the bay from the attacks of the teredo is undoubtedly due to the fresh water from the Straits of Carquinez, which, at a certain stages of the tide, flows along this shore.

The experiment of using piles treated by the "Robins process," as a preventive both against decay and the work of the teredo, has been made at Oakland Wharf, and also in some of the new work at Second street and in Mission Bay. The piles so treated have thus far withstood the attacks of the teredo, and, it is to be hoped, will continue to do so, as any process by which timber and piles may be treated at a reasonable cost, and render it safe from the destructive agencies referred to, must prove of great value to your company, as well as to the public.

WORK AT SAN FRANCISCO.

The additions which had been made to Second Street Wharf, San Francisco, though occupying all the available space south of Townsend street, soon proved inadequate to the wants of the rapidly increasing freight business, and early in 1871 steps were taken for its better accommodation. The block of ground lying between Fourth and Fifth, King and Townsend streets, was purchased as a site for temporary freight depots, and the use of the adjacent block west of Fifth street and the greater portion of the block east of Fourth street was also secured for yard purposes. Work was commenced on the buildings early in 1872. Meanwhile a new slip had been constructed for the steamer Thoroughfare (new car ferry-boat) at the foot of King street, and a double track was laid through King street to the blocks above named, there connecting with ten parallel tracks, extending from Fourth to Sixth streets, and two tracks on Townsend street.

Two large buildings for the receiving and deliverery of freight was also erected—one fifty feet in width, fronting on Townsend and extending from Fourth to Fifth streets, and the other seventy-five feet in width, fronting on King street and likewise extending from Fourth to Fifth street, a distance of eight hundred and twenty-five feet. The freight offices are in the second story of the latter, and the two buildings are connected by a foot bridge over the ten tracks above noted. The general arrangement of the yard and buildings are, it is thought, the best of which the space occupied will admit; and the advantage of separate buildings for receiving and delivering, where so large an amount of freight is daily handled, must be apparent to any one who has experience in the business.

A large amount of work has been done in Mission Bay conjointly with the Southern Pacific Railroad Company—wharves covering an area of nearly seven acres have been built, and two depots, 60x200 and 60x500 feet respectively, have been erected thereon. Tracks have been laid connecting these depots and wharves with the main tracks, at Fourth and Townsend streets. Spur tracks have also been laid from King street to the Pacific Mail Steamship Company's wharf, at the foot of Beale street, and to Hooper's warehouse, between Berry and Channel streets. The former is a most important connection, as it brings the cars within a convenient distance of the China steamers, thus facilitating the transhipment of teas, silks, and in fact, of all Asiatic freight seeking overland transit. It may be noted that it is only on those wharves not directly under the control of the State or City Government, that this connection of ship and car has been accomplished, and until further action of the proper authorities shall have removed the present restrictions, which prevent the bringing together of ship and car in Mission Bay, you will be unable to use to advantage the property already acquired there for depot purposes. The new buildings and yard in San Francisco have now been in use for more than a year, and although the amount of business is already large, it is thought they will be found adequate to the requirements for two or three years to come, or until the grading of the Mission Bay lands and the erection of permanent depots thereon shall have been accomplished. An important feature of the improvements made by your company in this part of the city is the new building for your general offices. It is located on the corner of Fourth and Townsend streets, fronting one hundred and eighty feet on each, with a depth of sixty and seventy feet respectively. It is three stories high, built of brick upon a pile foundation, with front of pressed brick, and is constructed throughout in the most thorough and substantial

manner. It contains seventy-seven rooms, and was planned especially with a view to the convenience of the several departments by which it is to be occupied.

I omitted to mention a large amount of grading in Mission Bay, consisting of a wide embankment, from Channel street southerly on the eastern line of Illinois street to the Potrero, at which place the greater part of the material for the work was obtained. This work was also done conjointly with the Southern Pacific Railroad Company, and is preliminary to the work of reclaiming the lands granted by the State to the two companies for depot purposes. The expenditures upon the work south of Channel street have already amounted to $352,224.

SHOPS.

The construction of shops for the motive power and car departments was, of course, coincident with the construction of your road. Sacramento being a central and convenient point for the principal manufacturing and repair shops, it was early decided to locate them at this place, and the small structures at first required have gradually given place to the present large and commodious buildings, consisting of a round house with stalls for twenty-nine locomotives; a machine shop one hundred by four hundred feet; car shop, ninety by two hundred and thirty feet, two stories high, with wing ninety by three hundred and ten feet; paint shop, two hundred and twenty-five by seventy feet, with five wings each twenty-four by seventy feet; blacksmith shop, two hundred and fifty feet long, of which one hundred and forty five feet are sixty, and the rest ninety feet in width; boiler shop, sixty by one hundred and seventy feet; foundry, one hundred and twenty by eighty-three feet; copper shop, fifty-two by seventy feet; and a supply store, thirty-four by sixty feet. All of these shops are supplied with tools and machinery of the latest and most approved kind, and for economy, and class of work produced, are unsurpassed by any similar works in the country.

The necessities of your work will soon require a rolling mill, for which Sacramento will be a convenient location.

The car and machine shops, blacksmith shop and round house, are built of brick, the others of wood. The ground upon which these buildings are located has mostly been reclaimed from what was formerly a swamp, and has been filled from a depth of ten to twenty five feet, and the work of grading is still in progress, the necessity for more room in the near future being already apparent. About twelve hundred men are regularly employed in these shops.

In addition to the above, division repair shops have been erected at San Francisco, Oakland Point, Lathrop, Rocklin, Truckee, Wadsworth, Winnemucca, Carlin, Toano, Terrace and Ogden.

Commodious depot buildings, adapted to the wants of the business have been erected at the principal stations, and the necessary provision made for the storage of fuel and water.

SNOW GALLERIES.

A novel and important feature of the work on the Sierra Nevada has been the construction of galleries for the protection of the track from the heavy snow-storms incident to that region. The experiment was first made of covering the track in the cuts only, depending upon snow-plows for clearing the embankments, but experience soon proved that where snow was liable to accumulate to a great depth, its removal even from the high embankments would incur great expense, and often delay the movement of trains; and it was therefore deemed best to make the covering through the deep snowbelt continuous. More than thirty miles of these galleries were built, consuming 44,639,552 feet, board measure, of sawed timber, and 1,316,312 lineal feet of round timber, equivalent in the aggregate to 52,537,424 feet, board measure, of sawed timber; and 721 tons of iron and spikes. Two general styles of construction were adopted—one, intended for localities where the weight of the snow only had to be supported, and the other for such places as were exposed to "slides" and the slower, but almost irresistible, "glacial movement" of the snow on the steep and rocky slopes, along which a great portion of the road near the summit was built.

A detailed description of the manner of constructing these galleries would occupy too much space for this report, but I need only say, that they have proven a complete success, and though frequently covered with drifted snow to a depth of ten or twenty, and, in some places on the slope of Donner Mountain, of more than fifty feet, they have afforded a safe passage for trains through this inclement region at all times and seasons, without any noticeable detentions.

As a security against fire, the wooden covering of sections of the sheds, of from one hundred to two hundred feet in length, at intervals of one-fourth to one-half mile, is being replaced with galvanized corrugated iron, and this work will be extended as rapidly as the material can be procured.

PRESENT CONDITION OF THE ROAD.

The necessary repairs of track, bridges, buildings, wharves, etc., have been kept up, so that, with the exception of the unavoidable wear of track incident to the heavy business of the road, it is at present in better condition than at any time since its construction.

In consequence of the heavy grades and sharp curves on the mountain divisions, the life of the iron on that part of your road must always be much less than on the lighter grades of the valleys, and the renewal of some portions of the mountain track has already been found necessary. During the past year there have been received two thousand and fourteen tons of steel rail, weighing sixty pounds per yard, sufficient for twenty-one and a half miles of track, most of which has already been laid upon the mountain division. The superiority of this over iron rail, especially where exposed to the heavy service of your main lines, both on the mountains and in the valleys, cannot be questioned. Its use on Eastern roads is highly commended wherever it has been tried, and that the truest economy will always be found in the use of the best procurable materials, not only in track, but all railroad structures, cannot be doubted.

As a matter both of utility and experiment, a small amount of this steel rail has been laid on Oakland Wharf and in the yard at San Francisco, at points exposed to excesive wear, and the result has been very satisfactory. In one locality they have already outlasted three sets of iron rails, and the wear on the steel rail is almost imperceptible. I would recommend to your board the propriety and economy of providing steel rail not only for the mountain track but of the whole of your main lines, as rapidly as the renewal of the rail may be necessary. The renewal of a considerable number of ties on the Truckee, Humboldt and Salt Lake Divisions has already been found necessary.

The ties laid between Promontory and Ogden, which were obtained on the Wahsatch and Uintah Mountains have been found to decay most rapidly, the quality of the timber found on those ranges being evidently inferior to that of the Sierra Nevada, from which source most of the ties used between Blue Canon and Promontory have been obtained. A great difference is noticed in the life of the ties laid on the sandy and gravelly soil of the highlands, and the strongly saline and alkaline soil of the river bottoms and "sinks" east of Wadsworth.

In the former most woods are found to decay more or less rapidly; while in the latter, the ties are still as sound as when first laid.

Besides the ordinary repairs, a large amount of work has from time to time been done in the widening of deep cuts, where the material had been loosened by blasting, and in additions to the high embankments.

BRIDGES AND TRESTLES.

All of the bridges on your road are in good condition.

The only renewals of bridges required thus far have been to supply losses by fire, which have occurred in a few instances. All bridges over sixty feet span are of the "Howe truss," and are equal to the best class of wooden structures.

The ultimate replacement of the structures with iron bridges will undoubtedly be found advisable, but they may be safely depended upon for many years yet, as safe against ordinary causes of decay.

The trestle-work found necessary to introduce in the first construction has, in some instances, been replaced with stone culverts and embankments, and elsewhere it has been kept in thorough repair.

Between Promontory and Blue Creek the line has been changed so as to avoid the two high trestles over which the track was originally laid, and at Blue Creek a stone arch culvert has been built, and the high trestle at that place replaced by an embankment.

A number of the smaller trestles, twenty or more, at different points on the Salt Lake and Humboldt Divisions, have been similarly replaced.

On the Sierra Nevada two trestles have already been filled, one near Colfax and one near Clipper Gap; another, crossing Deep Gulch about a mile east of Clipper Gap (the highest structure of the kind on the road), will soon be abandoned for the track just built upon a new line, (without trestle), crossing the gulch just above the old one.

This change of line was necessary, as it was not deemed prudent to build an embankment on the old line and maintain the trestle at the same time. This change has materially improved the alignment, but has involved the necessity of an open cut of 90,000 and an embankment of 70,000 cubic yards, a tunnel 700 feet in length with approaches of 100 feet on either end. Five hundred feet in length of this tunnel has been lined with granite masonry, with portals of the same material.

The other trestles, between, and including those at Newcastle and Secrettown—seven in number—have recently been thoroughly repaired, and may safely be depended upon for three, and probably four or five years. To replace these, embankments aggregating 653,000 cubic yards will be required, at a probable cost not to exceed forty cents per yard.

The long trestle forming the northern approach to the American River bridge has just been repaired, and may now be considered good for five years, and probably longer. This, like other similar structures in the valley, already referred to, must always be maintained.

The force at present employed on repairs of track, bridges, etc., is lighter than at any previous time the road has been in operation, and it is thought that the expenses properly chargeable to this account may be kept within the present cost. The rapidity with which the track will require renewal will, of course, depend largely upon the amount of tonnage carried over it, and the speed with which it is moved. And, as before mentioned, I would most earnestly recommend that whenever renewals of any kind become necessary, they be made with the best and most durable materials. Though not always practicable in the first construction, permanent structures are in the end the most economical, and the amount of business that may be reasonably anticipated for your road will certainly warrant their adoption in the future.

The accompanying map shows the line of your road and its connections, and their relative position to the great valleys of the State.

Respectively submitted,

S. S. MONTAGUE,

Chief Engineer.

☞ The grading of the Bucksport and Bangor Railway is rapidly approaching completion. Their is one cut in Bucksport which will require a large amount of blasting. The road will probably be in running order by the 1st of December.

RAILROAD EARNINGS—MONTHLY.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, August 30, 1873.

Stock Exchange and Money Market.

Money has shown more activity, and rates have been generally quoted firmer. The increased demand was mostly on speculative account. The later call loan negotiations were at very variable figures. An effort was made on Tuesday, in the interest of the operators against ruling stock values, to make money dearer on call, and for a short time the speculative bids carried the price, during the afternoon, up to 6@7 per cent, from the opening figures of 4@5 per cent. The sharp advance brought out very large offerings, which had the effect of depressing rates to 3@4 per cent. On Wednesday, business to the more responsible street borrowers was on the basis of 4@5 per cent. The Government houses had their limited wants provided for at the uniform figures of 4@5 per cent. Time Loans were quoted steady on the basis of 6@7 per cent for 30 days, to 7 per cent. Gold, for 60 to 90 day credits, with moderate dealings reported. In the discount line a fair business is in progress, growing out of the increasing Fall trade movements. On the best grades of short date commercial paper the current rates are 6½@7 per cent per annum. On the bank return, as made public on Saturday afternoon, the averages were all below the figures of the preceding weekly exhibit. The U. S. Sub Treasury, last week, again added handsomely to its currency reserve and very liberally to its coin hoard. The city banks last week reported a loss of about 7⅛ millions in their deposit line with a decrease of about two millions in their legal tender, and of about 2⅛ millions in their specie reserves. They reduced their loan and discount averages about 2⅜ millions, and contracted their circulation slightly.

The city banks have shown a further loss of ground on their obligatory reserve, the last statement showing that they had $6,950,170 more than the 25 per cent re-erve which the national banks are required by law to keep on hand. The U. S. Sub-Treasury, last week, enlarged its coin balance about 4¾ millions, and its currency reserve over a million. Its currency reserves at the close of the week were $33,343,264; and its coin hoard, $50,420,569.

The clearances of the city banks averaged through the week about 74⅞ millions a day, and amounted in the aggregate, for the whole week, to $449 504,645, as against $431,024,238 the preceding week. The U. S. Sub-Treasury at this point enlarged its currency balance $1,077,752 and its coin reserve $4,768,972 as the result of the week's business.

The specie reserve of the city banks according to the latest return is $25,144,200, against $18,207,200 same time last year. The city bank deposits are now $227,691,800 against $226,449,300, week ending Aug. 24, 1872. The legal tender reserve amounts to $45,532,400, against $50,869,000 same time last year. The circulation now stands at $27,214,400 against $226,449,300 same time las year. The loans are now $289,931 800 against $292,428,800 at this date last year.

The coin reserve of the city banks is now about 25⅛ millions, as against about 15 millions Feb. 21, 1873, and about 25¾ millions on the 20th of last July; the legal tender reserve is a little over 45½ millions against about 34⅞ millions April 5th, 1873, and 55½ millions on the statement of June 15th, 1872; and the deposits are now about 227⅝ millions, against 186⅞ on the 12th of April, 1873, and 247½ millions on the 20th of July 1872.

Government revenues have been yielding more satisfactory, since our last The excises yielded within the week about 2⅛ millions, and thus far in the current fiscal year commencing with July 1, 1873, $15,624,858. The customs at the port of New York, for the week, were $2,810,704, and at the outports, about $950,000 more, in coin or coin certificates.

The cash balances in the National Treasury on Tuesday were: Currency, $10,377,909; special deposits of legal tenders for the redemption of certificates of deposit, $35,815,000; coin, $86,396,836. Coin certificates, outstanding, $44,008,000. Outstanding legal tenders, $356,000,000.

The U. S. Sub-Treasury office last week received $4,114,077 of currency, and $7,593,960 of gold, the latter including $2,852,000 from customs; and disbursed $3,036,326 of currency and $2,824,989 of gold, the latter embracing $286,153 of coin interest.

There has been rather more animation in the Gold market, with wider fluctuations as to price. The demand has been almost speculative, and in the interest of the *clique* operators for a rise. The customs drain was the main source of inquiry for legitimate business purposes. The later dealings indicated a less confident movement. The range of the price during the week has been from 115⅛@116¼, and the quotation on Wednesday was 115¼@115⅜ against 115⅜ on Wednesday of the preceding week. The specie outflow last week, was only $311,649. The Gold Exchange Bank clearances have averaged about 50⅛ millions per day during the week. Saturday's exchanges were up to $99,921,000.

The Treasury Office here held on Monday an aggregate coin reserve of $50,420,569. Under instructions from the Secretary of the Treasury, the Assistant Treasurer at this point on Monday began paying the September coin interest on the Public Debt. On this account the coin disbursements of the local office amounted to $1,156,000, and on Tuesday nearly half a million. The customs revenue of the port, last week, averaged $468,450 a day.

The customs demand for Gold last week, averaged $475,334 a day. The arrivals of specie from Europe, Havana and other foreign ports thus far in 1873 have been $2,176,151, against $2,797,422 in 1872. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1873, has been $84,397,044 against $99 972,277 during the same time in 1872.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1873, $51,354,763, against $56,274,029 during the same time in 1872.

The export drain of specie was $311,649 last week, against $374,190 same week preceding year. The shipments since January 1, 1873, have been $39,487,015 against $55,820,441 during the same portion of 1872.

Foreign Exchange has been in very liberal supply and unusually depressed in price, on a restricted business. Bankers' sixty day bills on London closed on Wednesday at 107⅝@107¾; sight bills on London, at 108⅜@108½. The week's exports of Domestic Produce have been to the currency value of $5 281,459.

Government securities have been scarce and wanted; prices ruling firm, in the face of a variable Gold premium.

U. S. sixes of 1881 closed on Wednesday of this week at 119@119½; U. S. Five-Twenties of 1862, 116½@117; U. S. Five-Twenties of 1864 at 117@117¼; U. S. Five-Twenties of 1865 118⅛@118¾; U. S. Five-Twenties of 1865 consolidated 116⅞@117⅛; U. S. Five Twenties of 1867, 118¾@119; U. S. Five-Twenties of 1868, 118@118¼; U. S. Ten-forties at 116@116½; U. S. Fives of 1881 (Funding Loan) 114⅛@114¾; Six per cent. currency Sixes from 118½@118¾.

The Railway and Miscellaneous share speculation has been comparatively brisk, in the instance of the leading street favorites, such as Pacific Mail, Western Union Telegraph, Union Pacific, Wabash and Lake Shore. Prices have been more than usually unsettled, closing weaker. The operators against ruling values have been working energetically to depress prices.

Railway Mortgage Loans have been in fair in-

vestment demand at firm prices. Central Pacific Sixes have been selling to a fair extent at from 99½@99¾. The Chesapeake and Ohio Seven per cent gold bonds have been in request at 90, and interest. Chesapeake and Ohio Sixes have been moderately sought after at 88½ and interest. Western Pacific Sixes at 92½@92¾. The Northern Pacific 7-30 Loan has been in fair demand at par and interest.

State bonds have been in fair request at about steady prices.

The latest quotations at the London Stock Exchange compare as follows with former returns:

* Ex Sept. coupon.

General business has shown a fair degree of activity, especially in Dry Goods, Groceries, Wool and the leading kinds of domestic produce with values well supported, as a rule. The Metal trade has been exceptionally slow. Copper has been dull, but about steady; 35,000 lbs. sold at 27c. Iron has been unusually quiet, with prices quoted generally very weak, within the previous range for Pig, both foreign and American, with no dealings of moment reported. We quote: Eglinton Pig at $44; Glengarnock, at $44@$45; Gartsherrie at $47 75; Coltness at $50@$51; No. 1 American Pig at $44@$46; No. 2 do. at $38@$42; English rails at $65@$67 gold; American Rails, at works, at $77 50; Old Rails $46@47; Wrought Scrap, $40@$45. Pig Lead has been inactive with foreign quoted at 6⅝c.@6¾c., gold, for ordinary. Spelter dull at 7½c.@7⅝c., gold. Pig-tin has been in slack demand, with Straits quoted at 31¼c.@31½c., with English at 28¾c., and to arrive 28¼c., and Banca, at 34¾c., gold. Of Tin Plates, sales have been reported, of 250 boxes Charcoal Terne, at$10 @$12½; 500 boxes Coke, at $8 75, and 500 boxes Coke Wasters at $8 25, gold; market steady.

Breadstuffs, Petroleum, Hay, Seeds, Naval Stores, and Tobacco have been in fair request and generally held with confidence. Cotton closed firmer on a livelier inquiry. Middling upland Cotton left off heavily at 20⅛c. per lb. The receipts at all the ports, since Sept. 1, have been 2,679,347 bales, against 3,588,701 bales same time in the preceding year; exports 2,648,123 bales against 1,950,053 bales in the previous year; stock at the ports at latest dates, 123,000 bales against 65,250 bales same date in 1871.

Foreign merchandise has been salable at about previous quotations. The week's imports of foreign goods and merchandise amounted to $8,081,843 including $3,315,378 of dry goods.

Ocean freights have been more active, and quoted firmer, with room and tonnage offered less freely.

At the Live Stock Markets, Beeves have been moderately active, but weaker in price at from 6½ @12½ cts. Veals at 6@10 cts.; Sheep at from 4 @6¼ cts.; Spring Lambs 6@10 cts.; Swine at 5¼ @5⅝ cts. per lb., all live weight. The week's receipts were 9,306 Beeves, 2,430 Veal Calves, 28,534 Sheep and Lambs, and 30,443 Swine.

At the regular monthly auction sale of Scranton coal on Wednesday, 90,000 tons were promptly disposed of at the advanced range of $4 77½@$5 45, as against $4 65@$5 42½ in July.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

R., 16@20; George's Creek Coal, 120@140.

☞ The New Haven and Northampton and the Holyoke and Westfield Railroads are doing a more extensive freight business this summer than ever before.

A Gunpowder Pile-Driver.

A trial was had in Baltimore on the 25th inst., of a pile driver, the motive power of which was gunpowder. The machine is the invention of Henry Vogler, of Baltimore, and does its work in an effective and quick manner. It consists of a large gun cap, which fits on the head of the pile to be driven into the mud, and on the cap is placed a percussion cartridge, invented by B. C. Nicoll, of Baltimore. The hammer is held in its place over the cap by means of a brake, and to start the same on its downward course a brake, under control of a person at the foot of the machine, releases it, causing it to descend with lightening-like velocity upon and exploding the cartridge, which, in turn, forces the hammer back to its old position, where it is held by the brake before spoken of. At the trial a pile was driven eleven feet through a hard bottom in the space of four minutes. Mr. C. P. Manning, civil engineer, and several other scientific gentlemen witnessed the working of this new fashioned pile driver, and expressed themselves highly satisfied with its effectiveness and saving of labor.

☞ The Eastern Railroad, through their purchasing agents, Mr. Charles Robinson, Jr., and Mr. R. H. Parker, are quietly at work purchasing estates located in the territory they have taken in Charlestown for railroad purposes. Some fifty estates are now being negotiated for and the company are desirous of having the land clear this fall. In cases where a price cannot be agreed upon the estates will be taken and the matter of compensation left to the decision of a board of commissioners, consisting of three disinterested men, who are to be appointed at the next term of the Supreme Court. An appeal from thir decision carries the case before a jury of the Supreme Court. We understand, however, that the Eastern Railroad do not wish any litigation, as they are disposed to pay a fair price for the estates which they take.

☞ The Illinois Central Railroad and the Southern Railroad Association are building a link of about 85 miles between Cairo, Ill., and Jackson, Tenn., which will make a close connection with the entire Southern Railroad system, avoiding the water transfer of twenty miles between Cairo and Columbus, Kentucky. The work is progressing rapidly, and is expected to be finished about next October. On the completion of this road Chicago will have an uninterrupted railway line to Mobile and New Orleans by the Illinois Central Railroad, over which passenger trains will run the entire distance without any change of cars whatever.

☞ Articles of incorporation of the South St. Louis and Belleville Railroad Company have been filed in the office of the Secretary of State of Illinois. This road is to run from a point on the eastern bank of the Mississippi river, opposite St. Louis, to Centreville, St. Clair county, and thence by some route, hereafter to be determined upon, to Belleville, and is also to have the privilege of building and operating a branch road from Centreville to a point on the Cairo and St. Louis Short Line road at or near Lemertown, St. Clair county. The company's principal office will be at Centreville.

Debts of the Southern States.

The debts of the Southern States are summarised in the following: In Virginia Governor Walker states that the public debt amounts to $26,000,000. This is one-third less than the amount previously stated, that portion having been shifted to West Virginia, which we believe will not assume the responsibility of it. In October last the debt of North Carolina was stated at $29,900,045. The debt of Tennessee in January last was reported at $20,966,382, it having been announced at about thirty-two millions the previous year. The difference was in railroad bonds that have been liquidated. In South Carolina considerable difference of opinion exists as to what the State debt really is, but the largest amount reported is that by the Committee of Congress on Southern Affairs, in which the minority report gave it at $29,158,914. Georgia's debt on January 1st was $15,961,500, with a liability to be increased if certain projected railways should be constructed. Florida, with a similar liability, has a debt of $5 512,269. Mississippi, on January 1, 1871, reported a debt of $1,145,726. Arkansas, adding to the bonded debt all prospective and contingent liabilities, has a total of $14,390,000, according to the report of the Congressional Committee. In Louisiana, in January 1, 1873, the debt was reported at $21,801,800. In Texas the debt was $3,836,227 on September 1 last year. The total of these debts is a little more than one hundred and eighty millions of dollars. At the close of the war in 1865 these eleven States owed about one hundred and thirty millions.

☞ The St. Louis, Kansas City and Northern Railway has perfected arrangements for a direct connection from St. Louis to St. Paul, which is to be a closer as well as a more direct route than has heretofore been offered. The line is over the St. Louis, Kansas City and Northern to Ottumwa, Iowa, thence by the Central of Iowa to Mason City, thence to St. Paul via the Milwaukee and St. Paul. The Central of Iowa connects at Ottumwa with the St. Louis, Kansas City and Northern for St. Louis direct.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending August 16, at 436,873 tons, and for the coal year 11,878,016 tons, against 11,622,151 tons to corresponding tons to corresponding time last year, being an increase of 250,865 tons. The bituminous tonnage for the week is 67,979 tons, and for the year 1,931,052 tons, giving a total of all kinds for the week of 504,851 tons, and for the year of 13,804,068 tons, against 13,866,070 to same time last year, being an increase of 467,098 tons.

☞ The estimated earnings of the Denver and Rio Grande Railway for the month ending July 31, 1873, were: freight, $18,735 19; passengers, $20,876 85—total estimate, $39,612 04. For the week ending August 7th the estimated earnings were: freight, 4,226 89; passengers, $4,324 45—total, $8,551 34; and for the week ending August 14th: freight, $3,519 90; passengers, $4,802 65—total, $8,322 55.

☞ The Washington Iron Works, 60 Vesey St., New York, have for sale one new four-ton Locomotive, Narrow Gauge. Will be sold $500 under value.

OFFICE OF FISK & HATCH,
No. 5 NASSAU-ST., NEW YORK, Aug. 25, 1873.

☞ The CHESAPEAKE AND OHIO RAILROAD, now completed and in regular operation between the Atlantic tide-waters at Richmond and the unfailing navigation of the Western rivers at Huntington, is now carrying passengers and freights with great promptness, and on favorable terms, between the coast cities and the chief trade centres at the West. Freights can be shipped via the "Clyde" Line of steamers from Boston, Providence, and Philadelphia; via the "Old Dominion" Line of steamers from New York, and via the "Chesapeake and Ohio Packets" from Cincinnati, Louisville, and St. Louis, &c. Passengers can also take this route to or from the West, and enjoy the wonderful scenery of the Alleghanies, the **Medicinal Springs and Mineral Attractions** of Virginia and West Virginia.

To enable the Company to perfect more rapidly its Equipment, Terminal facilities, and Deep-water connections with European Steam-ship Lines, and to accommodate the heavy **Coal and Mineral Traffic** together with the growing **Iron and Miscellaneous Local and Through Business** now pressing upon the Line, we are selling, on behalf of the Company, a limited amount of their **SEVEN PER CENT. GOLD BONDS,** secured by mortgage liens on the whole valuable property at **90** and accrued interest; **$1,000** each, either coupon or registered, payable in gold coin, in New York City, principal and interest; interest Jan. 1 and July 1.

We also have a small amount of the **OLD SIX PER CENT. GOLD BONDS OF THE CHESAPEAKE AND OHIO;** the price of these is 88½ and accrued interest. They are issued in denominations of $100, $500, and $1,000, interest payable May and November.

The property has cost already upward of **$38,000,000,** and is constantly increasing in value. We can recommend both classes of the Bonds, which are selling rapidly, with great confidence.

We also continue to deal in **Government, and Central Pacific, and Western Pacific Bonds,** execute orders at the Stock Exchange for investment Stocks and Bonds, receive Deposits, on which we allow interest at the rate of 4 per cent. per annum, and conduct a general Banking business.

FISK & HATCH.

☞ Holders of Income bonds of the Union Pacific Railroad must present the original bonds when applying for payment of the September coupon, "so that the genuineness thereof may be determined and declared," counterfeits of the same being in circulation. The interest is now all payable in Boston, not part in New York as heretofore. The injunction placed upon the interest payments in July applies to all bonds of the company, consequently "innocent holders" only will be able to draw their interest, bonds received as "dividends," and still held by the original parties, being enjoined.

☞ The earnings of the Erie Railway Company for the week ending Aug. 15, 1873, were $459,185, and since July 1, $2,539,086—an increase over the corresponding period of the previous year of $193,529.

Journal of Railroad Law.

RAILROAD COMPANIES—HOW NEAR TO SIDE WALKS STREET RAILROADS MAY LAY THEIR TRACKS. DUTIES AND OBLIGATIONS OF COMPANIES AND OWNERS OF PRIVATE PROPERTY.

The facts in the recent case of Kellinger *vs.* The Forty-second Street and Grand Street Ferry Rail road Company, (50 N. Y., 206), are fully and clearly stated in the following opinion by—

CHURCH, CH. J.—It is not alleged in the complaint that the plaintiff owns the fee of the street in front of his premises, nor that the track of the defendant's road was unnecessarily or negligently or wilfully laid so near the sidewalk as to impair the use of his premises and depreciate its rental value.

We cannot take judicial notice of the width of the street at that point, nor but that the track of the road was laid in the only available space vacant for that purpose. Nor is it alleged that the grade of the street has been changed, or that there is any physical obstruction to free access to the plaintiff's premises, nor any practical difficulty in passing over the track. The gravamen of the action is that the defendant has laid the track of the road so near the sidewalk as not to leave sufficient space for a vehicle to stand, and that the plaintiff and family are thereby incommoded in leaving and returning to their residence and that the rental value of said premises is greatly depreciated. The action is based upon the idea that the easement in the street, which the plaintiff is entitled to, has been and is being interfered with, and that he is entitled to compensation for the injury occasioned by such interference and an injunction to restrain the defendant from using their railroad. The corporation of the City of New York has acquired by grant, dedication or confiscation the title in fee to the land on which the streets are laid, but the title thus vested is held not as private property, but in trust for public use, and such as was required under the act of 1813 is by that act expressly declared to be held in trust for the purpose of maintaining public streets. In The People *vs.* Kerr, (27 N. Y., 188), this court held that the trust of the city was *publici juris*, held not for the benefit of the people of the city alone, but for the people of the whole State, as the agent of the State, and a part of its governmental machinery, and that consequently the absolute control and direction of the trust was in the Legislature as the superior power; that legislative authority to construct a railroad on the surface of the streets, without a change of grade was a legitimate exercise of the power of regulating public rights for public uses, and that the city was not entitled to compensation, because it had as a corporation no property which was appropriated.

It is not quite clear as to what was intended to be decided relative to the rights of abutting owners. The opinion of WRIGHT, J., which the case states was acquiesced in by a majority of the judges, affirms explicitly that such owners had no property, estate or interest in the land forming the bed of the streets in front of their respective premises, to be protected by the constitutional limitation upon the right of eminent domain; that they had no reversionary right, and even if they had, it was only a possibility so limited as to be subsequent in enjoyment to a prior present ownership that might last forever, and was not property entitled to protection from appropriation by the will of the government, and that if it was, it had no appreciable value. Two of the judges queried whether such owners might not have some intent, independent of the rights which the public had acquired to have free access to their premises, but thought that no such question was involved in the case.

We should feel bound to adhere to this decision, and its necessary legal results, even if we doubted its soundness, because large sums of money have been expended upon the faith of it, and in many obvious ways it has become a rule of property which should never be abrogated except for the most cogent reasons. It is, however, strenuously insisted by the plaintiff that the decision does not reach the point involved in this case, but I am unable to see why it does not. It clearly holds that the abutting owner had no property in the street which was taken for the railroad, for which they were entitled to compensation, and in this respect the case is distinguishable from Williams *vs.* N. Y. C. R. R. Co., (16 N. Y., 971), and other kindred cases, which hold that the laying of a railroad in a street or highway is an additional burden to the easement which as against the owners in fee the public had previously acquired, and for which such owners were entitled to compensation. These decisions have no application when the fee as well as the easement is vested in the public. This distinction is expressly recognized in these cases. In the former Judge Selden said: "No case is likely to arise in the city of New York which would be entitled to any weight in the decision of this question for the reason that it is claimed, and apparently with much justice, that as to a large portion of the streets in that city the fee of the land, and not mere easement, is vested in the corporation." The railroad of the defendant is not therefore a public nuisance. It was authorized by the sovereign power of the government. If it had been a public nuisance, the adjoining proprietor being specially incommoded and injured, could maintain an action. (6 Barb., 313). The basis of his action would have been that he suffered a peculiar inconvenience not common to all the inhabitants of the State, resulting from the public wrong of obstructing the street. In this case the foundation of such an action is wanting, viz: the unlawfulness of the act. It was authorized by law, and adjudged by this court to be for public use and within the uses to which the streets may be devoted. The fee being in the public, the legislative authority can lawfully consent to modify, regulate or enlarge its use for the benefit of the public. If these positions are sound, the corporeal rights of property of the plaintiff have not been impaired. Neither his property nor any right of property has been taken from him or injured, and his injuries are referable to that class of incidental disadvantages to which he is subjected resulting from the lawful exercise of the absolute power of control vested in the State, in connection with the title to the fee of the land. This, I think necessarily results from the principles determined in the People *vs.* Kerr, *supra*.

The abutting owners have an easement in the street in common with the whole people to pass and repass, and also to have free access to their premises, but the mere inconvenience of such access occasioned by the lawful use of the street is not the subject of an action.

There are expressions in some of the opinions apparently favoring the idea that such an action may be maintained. It was said in Drake *vs.* Hudson River R. R. Co., (7 Barb., 508), that for contingent and consequential injuries, the parties aggrieved are not entitled to compensation as for property taken for public use, but that an action will lie for such injuries. The force of this remark is spent in limiting it to the statement that such injuries are not a taking of property within the meaning of the constitution, without intending to define what injuries might be recovered for by an action, and this view is confirmed by another portion of the same opinion, in which it is said that adjoining owners have no exclusive right in the streets, but that all other citizens, including railroad companies, have equal rights, subject to the control of the public authorities. If this is so, there is no principle which will sustain an action for incidental injuries growing out of a lawful regulation by the public. When it is determined that a horse railroad is a public use of the street the question is settled, that incidental inconveniences must be submitted to. They become merged in the superior interest of the public. The decision in Fletcher *vs.* Auburn and S. R. R. Co., (25 Wend., 462), is cited and relied upon by the plaintiff. There the defendants were authorized to build a railroad upon a line to be selected by themselves, and to cross public highways by restoring them to their original usefulness. In crossing the highway near the plaintiff's premises, they raised an embankment which obstructed free access and otherwise injured his property, and they were rightfully held liable for the damages. The powers exercised in that case by the legislature were entirely unlike that exercised here.

In the first place, the fee of the highway was assumed to be in the adjourning owner, and the court held that the legislature had not and could not, without compensation authorize the injury complained of, and that all that the Legislature professed to do was to protect the defendants from prosecution by the public for obstructing the highway leaving the rights of the plaintiff untouched. The authority was in no sense a regulation of the use of the highway, but a privilege granted free, as against the public only. Similar views are applicable to the case in 2 Dutch, 148. These and like cases are reconcilable with The People *vs.* Kerr, *supra*, upon the difference between the extent of the right and powers of the public authorities, possessed and exercised in the different cases, although the expression of Judges may seem to conflict. It is conceded that the authority to lay a railroad in the streets in the city of New York is lawful without compensation or liability to adjoining owners, and yet the laying of such road even in the widest streets may be and often is a disadvantage and injury to the property adjoining the street, rendering it less accessible and desirable and less valuable. If this action can be maintained, I see no reason why in all cases of inconvenience and injury a similar action might not lie. The principle would be the same, and the injury would be only a question of degree. Such a result would not only overthrow previous adjudications, but unsettle rights of property to an incalculable amount, and inflict seri-

ous injury upon the public. But while we feel bound to hold that this action cannot be maintained upon the allegations contained in the complaint, we do not intend to determine that there are no circumstances which will justify an action. All the authorities concur that an injury to private rights or property, committed through negligence or wilful misconduct, even though in the pursuit of a lawful purpose, may be redressed by an action.

We are not called upon to determine what acts would amount to negligence so as to give a cause of action. That question is not before us.

The judgment in this case must be affirmed with leave to the plaintiff to amend the complaint, on payment of costs.

Judgment accordingly.

Costa Rica Railway.

The following are extracts from a very interesting account of the progress of the work lately given by Senor Nanne, the Director General of the Railway, dated June 1st, 1873:

The Costa Rica Railroad was actually commenced on the 8th Oct. 1871, at Alajuela, and the first "ranch" was built at Limon, on the 15th November, 1871. The later place was a perfect wilderness, and destitute of resources of any kind. On the 6th February, 1872, the first locomotive arrived at Alajuela, and the first spike nail was driven on the 2nd March, 1872. The first shriek of the steam-whistle was heard on the 5th March, 1872, and the first excursion train of about 9,000 spectators, left for Cirnelas-bridge on the 31st March, 1872. On the 6th August the first excursion train was despatched to Heredia, seven miles distant, and on the 30th December to San Jose, thirteen miles. Another thirteen and a-half miles to Cartago are expected to be opened next month (July). These twenty-six and a-half miles constitute the fourth division, which is therefore fast drawing to a completion.

The next division from Cartago to Angostura, twenty six miles, is well under way. This is the most difficult division of the whole line. There are over 1,000 men at work upon it, and the works have made most progress fifteen miles east of Cartago. So much for what we may call the Pacific division. To speak now of the Atlantic division at the opposite of the country, we may state that the first spike was driven in May; at the commencement the works, owing to several unforeseen difficulties, were considerably delayed. The first locomotive started on the line in July, 1872. Up to the present date, there are about 14 or 15 miles of track, laid and the works are now going ahead in first-rate style. The principal difficulty (the clearing) is nearly all accomplished, to the extent of 35 miles, up to Pacuare. The extent of ground to be moved on the first division—35 miles—is about 500,000 cubic yards, with about 15,000 cubic yards of masonry. The second division—28 miles—from Pamare to Angostura, is already surveyed and laid out, but no works will be commenced upon it until the locomotive can run to Pacuare. The second division is in tolerably good ground, and will be the last to be finished, in accordance with the terms of the contract. The stations at Alajuela, Heredia, San Jose, and Cartago are pretty well finished up to contract. Rolling stock, full complement, is ready for shipment in New York. total number of men and employes on the books to-day is about 8,000.

☞ Articles of incorporation of the Evansville and Louisville Narrow-Gauge Railroad Company were filed at Indianapolis, yesterday, with the Secretary of State. The capital stock being $3,000,000. The proposed road will extend from Evansville to Jeffersonville and will pass through the counties of Vanderburg, Warrick, Spencer, Perry, Crawford, Harrison, Floyd and Clark. The entire length being 140 miles.

Significant Trip of a Trunk.

The General Baggage Agent of the European and North American Railway recently shipped a small trunk from Halifax to San Francisco, from which place it is to be returned, thus significantly announcing the establishment of an all-rail line of communication between those two cities. The agents of all the railroads on the route it was to take were informed of the fact, and requested to forward it as rapidly as possible. The trunk was to be checked with the Intercolonial Railway check No. 4,196. It is so constructed that letters can be put in, as in a letter box, but cannot be taken out, and among its collections as it travels will be all the railroad time tables, passes, names of the principal stations, and such other contributions as the railway officers may see fit to insert. On its arrival in San Francisco it will be placed on exhibition in the Board of Trade rooms. One section of it will then be opened, and a canteen containing water taken from the Atlantic Ocean will be taken out. On setting out for its return the canteen will be filled with water from the Pacific Ocean, to be carried to Halifax. The route of the trunk will be over the International Railway from Halifax to St. John, the European and Northern American to Bangor, the Maine Central to Portland, the Eastern to Boston, the New York, New Haven and Hartford to New York; the Pennsylvania to Pittsburg; the Pittsburg, Fort Wayne and Chicago to Chicago; the Chicago, Burlington and Quincy to Burlington; the Burlington and Missouri River to Omaha, and the Union and Central Pacific to San Francisco.

Staten Island and New Jersey Suspension Bridge and Railroad.

This company was chartered by the last Legislature of New York and, it is said, is preparing to commence operations. The plan proposed is stated to be to cross the Kill von Kull from New Brighton, on Staten Island, to Constable's Hook, on the New Jersey shore, by a suspension bridge of about 1,000 feet span, and to run thence along the west shore of the bay to Jersey City. It is proposed to make the bridge 125 feet above high water and to provide a carriage way in addition to the railroad. From New Brighton the railroad is to run southward to Tottenville, where another bridge is to be built across Arthur Kill to Perth Amboy.

The project of connecting Staten Island with Jersey City is an old one, but, we believe, has never before progressed so far as the organization of a company or the securing a charter. The incorporators of the present company are Henry G. Stebbins, William A. Garner, John C. Green, William Butler Duncan, Daniel Lowe, R. W. Cameron, J. H. Vanderbilt, Tompkins Westervelt, Amos Clarke, jr., Charles Butler, Charles K. Hamilton, Thomas Bond, Richard Patrick, William H. Pendleton, David W. Judd, John A. Austin, William H. Davidge, and James Guthrie Hamilton.

☞ The estimated earnings of the Kansas Pacific Railway for the week ending Aug. 16, are: freight, $40,755 56; passengers, $31,258 30—total, $72,618 86.

Detroit and Milwaukee Railway.

This road has been engaged during the summer in laying steel rails upon its track, having purchased 5,000 tons for this purpose, 2,000 of which have already been laid, and the remaining 3,000 will be put down as soon as possible after they are delivered. The track already laid is from two miles east of Birmingham to two miles west of Pontiac, 11¼ miles, and also at the west end from three miles east of Ada to Grand Rapids, 12¼ miles, making in all 24 miles already laid. It is expected that the road from the Junction to Holly will be laid with steel rails by the first or middle of December, or sooner if the rails are delivered. Of the coming 3,000 tons, 500 tons are to be delivered this month, 1,500 tons in September and 1,000 tons in October.

FOR SALE.
One New Four-Ton
LOCOMOTIVE,
NARROW GAUGE,
WILL BE SOLD $500
UNDER VALUE.
WASHINGTON IRON WORKS,
80 Vesey St., New York.

LETTING
NORTHERN PACIFIC RAILROAD.

SEALED PROPOSALS will be received at the office of the Chief Engineer, No. 23 Fifth avenue, in the city of New York, until noon of Wednesday, September 10, for Grading and Bridging all that portion of this Company's Road, between the Missouri and Yellowstone rivers, 205 miles.

Proposals will be received for the whole distance, or for sections of about 25 miles each.

For further information apply at the office of the Chief Engineer in New York, or to General T. L. Rosser, Division Engineer, Minneapolis, Minn.

W. MILNOR ROBERTS, Chief Engineer.
NEW YORK, August 15, 1873.

DREDGING MACHINES AND SCOWS
FOR SALE.

One (Osgood Pattern) Second Hand. Price $16,000.
One, Almost New. Price $22 000.
Two Large Dumping Scows, $3,500 Each.
Apply to

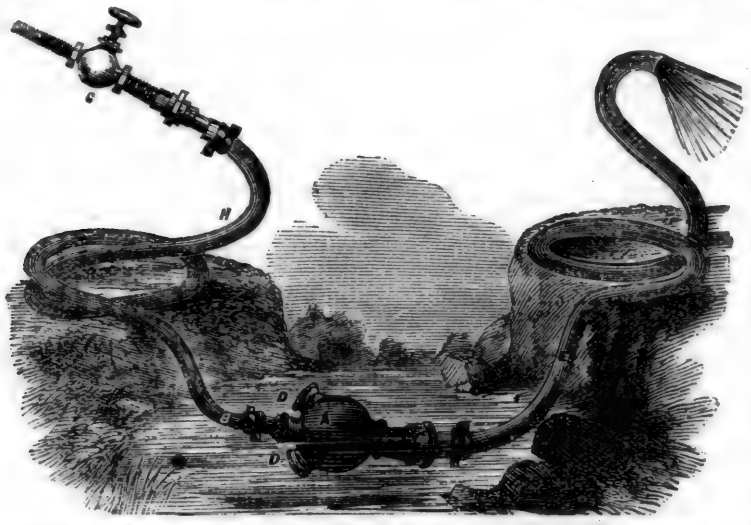
5 and 7 Dey Street.

Second Hand Locomotive For Sale.

ONE SECOND HAND ANTHRACITE COAL BURNING LOCOMOTIVE for Sale, weighing 26 tons, eight-wheel connected with cylinders 16 inches by 20 inches. Engine can be seen on application to A. WILHELM, President of Cornwall Railroad, at Lebanon, Pa. 3m26

RAILROAD IRON.

ENGLISH and AMERICAN RAILROAD IRON for delivery in New York and other markets in the United States. For sale by
WM. H. PETIT & PIKE,
72 Wall-st., New York.



FOR SALE.

Four new passenger Coaches for sale; two 60 passenger each, price $5,250; two 76 passenger-price $7,000 each, now ready for lettering. Also a 30 ton new Locomotive ready for use.

Apply to
A. W. LADD
35tf 5 and 7 DEY STREET NEW YORK.

LANSDELL'S

Patent Portable Railway Syphon.

The Portable is invaluable on a freight or construction train, being used to take water at points where there are no water stations. With it water can be taken from any point within one hundred feet of the track where there is water six inches or more in depth. The valve C is tapped into the locomotive boiler; steam is let on through the hose B, water is drawn through the orifices D D, and forced through the hose E into the tender, filling any tender with warm water in from six to twelve minutes.

Lansdell's Patent Steam Syphons, Double Suction, adopted by the United States Board of Supervisors, and approved by the Secretary of the Treasury for use on Steamboats.

For Price and particulars, apply to the General Agents of the **Steam Water Station Company,**

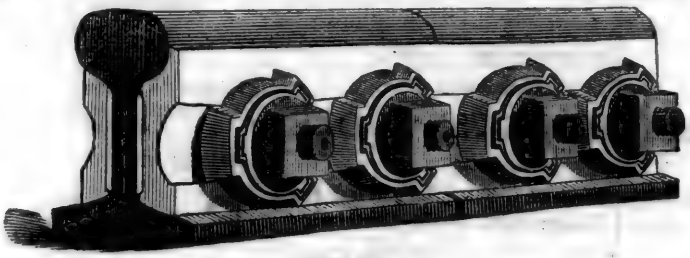
THE LOCK-NUT & BOLT COMPANY OF NEW YORK,

No. 61 Broadway, New York.

Manufacturers of all kinds of **BOLTS** for FISH-BARS, BRIDGES, CARS, MACHINERY, &c., with the "CUMMING NUT-LOCK," the only method of locking a nut to the bolt.

PATENTED June 16, 1868.

IMPROVED August 23, 1870.



Unequalled for Cheapness, Simplicity and Effectiveness.

DESCRIPTION.—A pointed copper key is placed in a groove cut in the threaded part of the bolt, *over which* the nut is screwed to its position, cutting its own thread in the copper, thereby taking up all the slack between the bolt and the nut. By riveting up against the face of the nut the projecting portion of the copper key, the nut is firmly locked in its position, but can be readily adjusted or removed with a wrench without injury to either bolt or nut.

Severely tested for over *four years*, they have *never failed*, and are *now in use on over fifty Railroads*, giving perfect satisfaction. We solicit a trial *anywhere*.

Licenses Granted to R. R. Companies, Car Builders and others.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

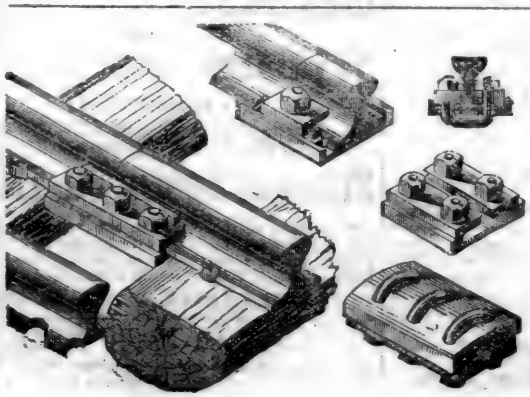
The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.



That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

FISHER'S PATENT
Wrought Iron
RAIL JOINTS,

MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

New York, Saturday, September 6, 1873.

Railroad from Baltimore to Harrisonburg.

The Baltimore *Sun* says that on Friday last Thomas H. Sharpe, master of transportation, Lewis M. Cole, general passenger ticket agent, John L. Wilson, road master, Frank Mantz, general supervisor of trains, A. G. Davis, telegraph superintendent, Mr. Buchanan, of the auditor's office, and George W. Cromwell, assistant road master, passed up the Virginia valley, over the line of road to Winchester, Strasburg and Harrisonburg, the Baltimore and Ohio Company having just leased that portion of the road from Strasburg to Harrisonburg. The purpose was to inquire into the condition of the road and its appliances. The joint road and its rolling stock were found in good condition, and the first train under the new lease, from Baltimore to Harrisonburg, left Camden Station on the 1st inst. Under this arrangement the line can be much more satisfactorily worked through than heretofore, and when the 25 miles of the Valley Railroad, now in course of construction from Harrisonburg to Staunton, is completed, as it is expected to be in December, the Baltimore and Ohio Company, working that line also, will have the proper control of the trains through from Staunton to Baltimore, to insure efficiency and close connections with the Chesapeake and Ohio Railroad at Staunton, and thence to Huntington, on the Ohio River.

NOTICE TO INVESTORS.

The attention of the investing public is called to the limited remainder of the NORTHERN PACIFIC RAILROAD SEVEN-THIRTY LOAN. The unsold balance will be soon absorbed by current sales, after which the Company has resolved to issue only six per cent. bonds.

There are now more than 500 miles of the road in regular operation, with a growing traffic; surveys and construction are progressing satisfactorily; the survey prosecuted the present season, in connection with the Stanley military expedition, has resulted in the location of an excellent line through Western Dakota and Eastern Montana, and the company has advertised for proposals for grading and bridging the Yellowstone Division, extending 205 miles from Bismarck, at the crossing of the Missouri River to the crossing of the Yellowstone, in Montana. The Company's lands (amounting to more than 20,000 acres per mile of road) are selling to settlers at an average price of nearly $6 per acre, and the proceeds of land sales constitute a Sinking Fund for the repurchase and cancellation of first mortgage bonds.

The Company's seven and three-tenths per cent. gold bonds, the last of which are now offered, yield nearly 8¼ per cent. per annum at the present price of gold.

All marketable securities are received in exchange at current rates, and full information furnished on inquiry.

JAY COOKE & CO.,
No. 20 Wall-st., New York.

☞ At a recent meeting of the Portland, Rutland, Oswego and Chicago Railway Co. the shareholders voted to accept the act extending the time for locating and completing their road, and elected the following officers: President—Allen Haines, Portland. Directors—N. C. Rice, W. H. Fessenden, J. W. Lane, Portland; D. W. O'Brion, Cornish; Henry V. Poor, Brookline, Mass.; Oscar F. Fowler, Bristol, N. H.; Fred. Billings, Woodstock, Vt.; John Cain, Rutland, Vt.; Gilbert Mallison, Oswego, N. Y.; W. McEckron, Jones Falls, N. Y. Treasurer—John Neal, Portland. Clerk—Moses Gould, Portland.

Where our Future Supply of Iron is to Come From

Pennsylvania still has the lead in the amount of iron manufactured and coal mined, being pre-eminently the mineral State, although New York, Ohio, New Jersey, Michigan, Missouri and Virginia have of late years shown remarkable growth in these industries. The opening of the Chesapeake and Ohio Railroad has done much to bring the coal and iron regions of the latter State into active development. There were more than a dozen furnaces in operation along the line of this road when it was opened through the Kanawha coal fields last year. Since then grounds for eight new furnaces have been purchased, three of which are now in course of erection. Some of them will be placed on the coal-lands, others on the ore lands, the average distance between the richest ore deposits of Virginia and the famous Kanawha coal-beds being 150 miles. The "Low Moor" Iron Company will also ship ores to the New Jersey and New York furnaces from their "bluff ore beds," near Clifton Forge, as well as to the furnaces in Southern Ohio and Eastern Kentucky.

No less than 146,000 acres of coal lands along the line of the Chesapeake and Ohio Railroad have changed hands within the present season, most o which will be worked as soon as practicable. Five of the mines are now being supplied with shoots side-tracks, inclines, &c., preparatory to shipping Five saw-mills and two stave factories are also among the industries recently opened. A car-wheel foundry is already going up at Huntington, and a rolling mill and locomotive works are talked of. The advantage of the West Virginia coal operators in having a market both East and West for their coal, of which there are four varieties—the dry-burning bituminous, gas, splint, and cannel—must be signal. The splint is used as a substitute for charcoal in iron-making, while the bituminous is a perfect substitute for the English coal which is now so high in price as to admit the American article to many markets hitherto supplied wholly by Great Britain.

☞ Lucius Robinson, former Comptroller of the State of New York, has been elected first vice-president of the Erie Railway Company.

Proposed Oil Pipe to the Seaboard.

There is now an effort being made, and with alleged success, to form a company to pipe oil from the petroleum regions to the commercial marts on the seaboard. The proposition is one which will, of course, strike the general reader with amazement, and command the serious attention of scientists and mechanics; but it must be remembered that this is the age of wonders, and while two Pennsylvania æronauts are just perfecting their arrangements to cross the Atlantic by means of a balloon, and a combination of other Pennsylvanians will meet this week in Pittsburg to further consider the project of improving the navigation of the Ohio river by feeding it with water from Lakes Erie and Chautauquau, we must not be surprised with the offer to pipe oil from its sources of supply to its market of consumption.

But the proposition to pipe oil from the petroleum regions is certainly most wonderful. How will it be forced over great elevations? How forced through immense depressions? How secured in pipes subject to incalculable pressure? These are only a tithe of the questions which now suggest themselves, but which science readily answers and simplifies. The project is within the range of engineering ability. It is of no more magnitude than crossing the Alleghanies with a locomotive, no grander in conception than J. Edgar Thomson's horse shoe bend, an achievement in engineering which has won the admiration of every man who has beheld its sublime proportions and mathematical beauty. We expect to see the day, if the Lord permits us to live another decade, when illuminating gas will be supplied to different parts of the States by means of pipes running from the oil regions. The supply of this gas is as certain and abundant as that of coal. The nature of its manufacture is as perpetual as that of water, and therefore no greater risk will be run in laying pipe for its conveyance to distant points than is now incurred in piping large cities to convey water, in bringing water from long distances, or in laying interminable tracks of iron to facilitate the transportation of material and agricultural products, bipeds and quadrupeds.

The men at the head of this piping scheme are shrewd and practical. Some of them are identified with the greatest of our material projects, and understand precisely what they are about. They are resolved to put this thing through, so that in a few years we may expect to see plugs on the Delaware front from which ships will be loaded with the oily freight running through pipes direct from the tanks on Oil creek.—*Phila. Press.*

A Fireless Locomotive.

We clip the following from an account of a trial trip of a new locomotive for street railroads, published in the Chicago *Tribune* of August 24:

"In front of the cars was the motive power, contained in a small, compact, and neat locomotive, manipulated by an engineer. This was the 'fireless locomotive.' It consisted of a boiler, eight feet long by three feet in diameter, and the usual machinery on a small scale. There was no fuel, no fire, no fireman. The steam was supplied for the round trip of six miles before starting. At the depot, was a supply boiler sixteen feet by three feet, in which steam was generated until 200 pounds pressure was indicated by the steam gauge. The locomotive boiler was three-fourths full of cold water. Instead of boiling this by means of a fire, and raising the pressure to a required height, the heat was introduced from the supply boiler through an iron tube. The iron tube was connected with a tube in the locomotive boiler, the latter running under the water along the bottom of the boiler and letting out the superheated steam as it was freed from the supply boiler into the locomotive boiler. This steam, rising through the cold water, permeated it, and quickly raised its temperature to 170 degrees. With this supply of steam the locomotive started, drawing a heavy four-horse car over the three miles, to Thirty fifth street, in ten minutes. The amount of steam consumed was 80 pounds, the locomotive starting back with 90 pounds remaining. When the starting point was reached there was 57 pounds of steam in the boiler, the pressure being reduced only 33 pounds in the return trip, which was down grade. It must be borne in mind that there was a large car, heavily laden, making eighteen miles an hour. The experiment proved conclusively that, as a substitute for dummy engines, the 'fireless locomotive' is beyond question, a success. There is no fire or fireman required; very little steam escapes, and the locomotive, not being one-half the size of the clumsy dummy engine, does not frighten horses and endanger the public safety."

The Transatlantic Balloon Enterprise.

The *Graphic* of Saturday announces that, wind and weather and other circumstances permitting, its great air-ship will start on the voyage across the Atlantic on Wednesday afternoon, September 10th, from the Capitoline Grounds, Brooklyn. The balloon will be finished during this week and by Saturday will be placed on exhibition at the Capitoline Grounds, to which all persons will be admitted free up to the hour of departure. The only companions of the two æronauts, Wise and Donaldson, will be a reporter of the *Graphic* and an experienced mariner, who will take charge of the life-boat in case the worst comes to the worst, and the balloon deposits its freight in the Atlantic or some other ocean. But Wise and Donaldson are said to have no fear of such an event, and are confident that from eighty to one hundred hours' travel will land them on the shores of Europe. It was at first contemplated that there should be nine passengers, but when the lifting power of the balloon was tested it was found to be three thousand pounds less than was calculated; consequently two thousand pounds of ballast were dispensed with, and the passenger list confined to the four named. The balloon is 116 feet high, and 335 feet in circumference. It contains 600,000 cubic feet of gas. In a muslin balloon each thousand feet of gas has a lifting capacity of eleven pounds; this makes the power of the balloon 6,600 pounds, from which it may readily be estimated that there is no margin to spare for extra freightage.

Erie Railway.

At the semi-annual meeting of the directors of the Erie Railway Company held on the 2d inst., the Report of the President was presented showing the earnings of the Main Line for the nine months ending June 30, 1873, to have been $13,635,742 29, the expenses $8,825,199 85, and the net profit $4,810,542 44. The entire earnings of the Erie Railway and branches during the same time were $14,527,193 25, and the entire expenses (including $341,693 61 rental) $10,093,344 23—showing a net profit of $4,433 849 02. Compared with the corresponding nine months of the preceding year, the gross earnings show an increase of $1,085,573 51, with an increase in working expenses of $271,009 66—making the net increase $814,563 85. The number of tons carried one mile amounted to 735,618,510, and the revenue derived therefrom to $11,485,127 61—the net increase being $779,007 92. Total number of tons carried, 4,295,530. The earnings from general freights have increased 11.53 per cent, from passengers 8.63, from mails and express 14.47, and from miscellaneous earnings 27.87, with a decrease from coal earnings of 3.89—making a net increase on the whole revenue of 8.07 per cent. The increased tonnage of paying freight has amounted to 250,419 tons carried

Comparative statement of earnings for nine months ending June 30, 1873 and 1872:

From—	1873.	1872.
Freight	$8,213,764 84	$7,864,856 22
Coal	2,852,171 86	2,967,787 90
Passengers	2,484,923 93	2,287,583 30
Mails and express	638 244 05	557,559 62
Miscellane's sources	388,088 57	264,382 70
Total	$14,527,193 25	$13,441,619 74

Statement of freight business during the nine months ending June 30, 1873:

	Tons carried one mile.	Revenue.
Way East	225,626,411	$4,082,448 53
Way West	116,249,828	2,048,686 04
Through East	304,851,307	4,012,123 02
Through West	88,890,964	1,341,970 02
Grand totals	735,618,510	$11,485,127 61

Statement of the earnings and expenses of the Erie Railway and branches, respectively, for the nine months ending June 30, 1873:

Names.	Earnings.	Total Expenses.*	Profit and loss.
Erie Railway	$13,635,742 29	$8,825,199 85	$4,810,542 44 p.

Totals	$14,527,193 25	$10,093,344 23	
Net profit			$4,433,849 02

* Including rental, $341,693 61.

Profit and loss account for the nine months ending June 30, 1873:

By balance of account Sept. 30, 1872		$2,816,768 12
Less dividend No. 13, on preferred stock, to 31st December, 1872, paid March 15, 1873	$298,791 85	
Less dividend No. 7, on common stock to 31st December, 1872, paid March 15, 1873	1,365,000 00	
		1,663,791 85
Balance to credit, profit and loss		$1,152,976 27
By Guy R. Pelton mortgage		2,850 00
By earnings for the nine months ending June 30, 1873	$14,527,193 25	
Less expenses	9,751,650 62	
		4,775,542 63
		$5,931,368 90
To interest on mortgage debt	$1,709,953 34	
To rents on property and leased roads	787,707 07	
To mileage of cars	311,911 60	
To interest, discount and taxes	265,277 63	
		3,024 849 64
Balance, July 1, 1873, subject to division		$2,906,519 26

The cost of repairs has been charged to ex-

pense account, and the road and equipments have been kept in good order.

On account of suits and other matters there have been obtained from different parties money and property during the year worth more at present than the estimates, no part of which has been placed to profit and loss. Further sums will be received from suits now pending.

Liabilities and assets for the nine months ending June 30, 1873:

LIABILITIES.

Total	$131,014,080 82

☞ In regard to the payment due September 13th of the Geneva award, by the British Government to our own, and which is made through Messrs. Drexel, Morgan & Co., Morton, Bliss & Co. and Jay Cooke & Co., members of the syndicate for the negotiation of the new fives, the *Evening Post* is informed on good authority, that the transfer has been practically concluded, and that no further amounts of gold will be withdrawn from the market to be paid into the Treasury. The transfer has been going on gradually for several weeks, which explains the decrease in specie held by the banks, as witnessed by their statements for the past few weeks.

Cincinnati, Richmond and Chicago R. R.

The receipts of this company for the year ending March 31, 1873, were as follows:

From passengers		$78,714 05
" freight		141,488 30
" mails and express		9,203 03
" miscellaneous		229 56
		$229,634 94

Secretary and Treasurer.—FREDERICK H. SHORT.

Preparations for Laying the Pacific Cable.

The United States steamer Tuscarara, which has been detailed to make the surveys and soundings preparatory to laying the telegraph cable from this port to Japan and the Asiatic Continent, started on an experimental trip on the 12th instant for the purpose of testing different apparatus for taking ocean soundings. The result was the adoption of the machinery invented by Lieutenant Brooks, with a recent improvement by Captain Belknap, as the most perfect and practical. The first reel consisted of a reel of fine steel wire, containing fourteen miles, weighing fourteen pounds to the mile, and bearing a strain of two hundred and seventy-eight pounds. The weight used was a shot of about thirty pounds, with detaching apparatus. The steam-sounding apparatus of the United States frigate Juniata—which vessel was detailed for similar work on the Atlantic side, but subsequently sent in search of the Polaris—was brought out here at considerable expense to the Government. It failed to be of any practical service, however, in this expedition, as three hundred fathoms of line was lost at one throw, and five hundred fathoms on another pitch. Eleven attempts at sounding were made in all, two only being failures. The greatest depth reached was 1,949 fathoms, in latitude 37 degrees 24 minutes and 50 seconds north, longitude 123 degrees 33 minutes and 25 seconds west. The Tuscarora is now lying at her anchorage off Third street, awaiting orders to proceed in sounding the line of the cable to the coast of Japan.—*San Francisco Bulletin, Aug.* 18.

Dayton and Michigan Railroad.

The income of this company for the year ending March 31, 1873 was as follows:

From passengers		$211,913 31
" freight		669,944 25
" express and mail		44,286 72
" miscellaneous		8,422 82
		$1,034,567 10

a. Under construction and no portion in operation.
b. Under construction and a portion in operation.
c. Completed since September 30, 1872.
d. Leased to Delaware and Hudson Canal Company.
e. Leased to Rensselaer and Saratoga Railroad Company.
f. Leased to Erie Railway Company.
g. Leased to Utica and Black River Railroad Company.
h. Consolidated with Wellsboro' and Lawrence Railroad Jan. 1, 1873 under the name of Corning, Cowanesque and Antrim Railroad—Corning, N. Y. to Antrim, Pa. 58 miles.
i. Leased to Delaware, Lackawanna and Western Railroad Company.
j. Leased to Flushing and North Side Railroad Company.
k. Leased to Northern Central Railway Company.
l. Leased to New York, Boston and Montreal Railroad Company.
m. Leased to New York and Oswego Midland Railroad Company.
n. Leased to New York Central and Hudson River Railroad Company.
o. Operated by South Side of Long Island Railroad Company.
p. Operated by Housatonic Railroad Company. Consolidated with Southern Westchester Railroad.
q. Leased to New York and Harlem Railroad Company.
r. Leased to Central Vermont Railroad Company.
s. Leased to Rome, Watertown and Ogdensburg Railroad Company.
t. Leased to Long Island Railroad Company.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "§."

American Railroad Journal.

Saturday, September 6, 1873.

Stock Exchange and Money Market.

Money has been hardening in price to both speculative and mercantile borrowers, on a gradually increasing demand for aid, that for commercial purposes growing directly out of the expanding requirements of the Fall trade, which now promises quite encouragingly. There has been an enlarged outflow of currency to the interior, to further the movement of the crops to the seaboard; and this has told adversely on the currency reserves both at Bank, and in the U. S. Sub-Treasury. Call loan rates have been quoted more generally toward the close at 6@7 per cent, with strictly choice to prime discounts from 7@8½ per cent per annum. The speculative demand for help has been more animated, in view of the livelier dealings at the Stock, and Gold Exchanges. The U. S. Sub Treasury, last week, reduced its currency reserve materially and added moderately to its coin hoard. The city banks last week reported a loss of nearly 7⅜ millions in their deposit line with a decrease of about ⅞ths of a million in their legal tender, and of over two millions in their specie reserves. They reduced their loan and discount averages more than a million, and enlarged their circulation slightly.

Preparations are making by the new National Banks of the South and West, under the act of July, 1870, to take out the remainder of their circulation, $8,000,000 in amount, before the 15th of September, as limited by the recent order of the Currency Bureau. Whatever sum then remains to be provided for by the deposit of Public Stocks will be distributed to the older Banks. The new Bankers are buying the 5 per cents of 1881 (Funded Loan) as the basis of this Circulation. Merchant paper and time loans on Stock collateral tend to dearer rates of Interest.

The city banks have shown a further loss on their obligatory reserve, the last statement showing that they had $5,906,450 more than the 25 per cent reserve which the national banks are required by law to keep on hand. The U. S. Sub-Treasury, last week, enlarged its coin balance about $391,033, and reduced its currency reserve $1,122,928. Its currency reserves at the close of the week were $32,220,337; and its coin board, $50,811,601.

The clearances of the city banks averaged through the week about 74⅝ millions a day, and amounted in the aggregate, for the whole week, to $447,799,948, as against $449,504,645 the preceding week.

The specie reserve of the city banks according to the latest return is $23,095,200, against $16,402,500 same time last year. The city bank deposits are now $229,390,300 against $219,036,200, week ending Aug. 31, 1872. The legal tender reserve amounts to $44,729,300, against $49,366,700 same time last year. The circulation now stands at $72,281,900 against $27,475,000 same time last year. The loans are now $288,833 000 against $288,812,400 at this date last year.

The coin reserve of the city banks is now about 23⅛ millions, as against about 15 millions Feb. 21, 1873, and about 25¾ millions on the 20th of last July; the legal tender reserve is a little over 44⅞ millions against about 34⅞ millions April 5th, 1873, and 55⅛ millions on the statement of June 15th, 1872; and the deposits are now about 220⅜ millions, against 186⅞ on the 12th of April, 1873, and 247½ millions on the 20th of July 1872.

A fair yield from excises and customs has been noted by the Treasury Department during the week. The excises yielded within the week about two millions, and thus far in the current fiscal year commencing with July 1, 1873, $17,346,306. The customs at the port of New York, for the week, were $3,279,528, and at the outports, about $1,100,000 more, in coin or coin certificates.

Under the Treasury programme for September, Government proposes to sell at least six millions of Gold, as follows: Thursday, September 4, $1,500,000; Thursday, September 11; $1,500,000; Thursday, September 18, $1,500,000; Thursday, September 25, $1,500,000. And to but in, on Wednesday, Sept. 17, at least $500,000 Five-Twenties.

The outstanding amount of U. S. Currency, on the 1st of September, was $401,583,434, as follows: Old demand notes, $79 937 50; legal-tender notes, new issue, $78,236,551; legal-tender notes, series of 1869, $277,763,449; one-year notes, 1863, $88,615; two year notes, 1863, $25,950; two year coupon notes 1863, $31,100; compound interest notes, $473,240; fractional currency, first issue, $4,349,694 46; do., second issue, $3,161,502 17; do., third issue, $3,424,498 67; fourth issue, first series, $21,602,440 98; do., second series, $10,555,955 25; fractional currency, fourth issue, third series, $1,795,500.

The U. S. Sub-Treasury office last week received $4,105,959 of currency, and $6,114,057 of gold, the latter including $3,435 000 from customs; and disbursed $5,228,886 of currency and $5,723,025 of gold, the latter embracing $2,342,609 of coin interest.

The aggregate receipts of the office from all sources in August, were $70,573,442, including $13,454,759 from customs; payments, on all accounts, $55,892,086, including $5,421,813 of coin interest.

Gold has been in more confident speculative demand toward the close, with a fairly active customs inquiry, and a limited call for export. The later dealings at the Gold Board indicated a stiffening tendency in the premium, under the clique manipulations. The range of the price during the week has been from 115¼@116⅛, and the quotation on Wednesday was 115⅞ against 115⅜ on Wednesday of the preceding week. The specie outflow last week, was only $399 428. The Gold Exchange Bank clearances have averaged about 50¼ millions per day during the week.

The customs demand for Gold last week, averaged $546,600 a day. The arrivals of specie from Europe, Havana and other foreign ports thus far in 1873 have been $2,176,151, against $2,797,422 in 1872. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1873, has been $87,831,258 against $103 900,798 during the same time in 1872.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1873, $53,697,372, against $58,940,859 during the same time in 1872.

The export drain of specie was $399,427 last week, against $367,539 same week preceding year. The shipments since January 1, 1873, have been $39,789,199 against $57,334,806 during the same portion of 1872.

Foreign Exchange closed heavily and irregularly, influenced by the large and urgent offerings of bills and the comparatively limited demand. Bankers' sixty day bills on London closed on Wednesday at 107¼@107⅜; sight bills on London, at 107⅞@108⅛. The week's exports of Domestic Produce have been to the currency value of $5,420,244.

Government securities have been quoted firmer, and have been fairly active, considering the limited offerings of all issues. The public debt statement of Sept. 1, indicated a further liquidation of $6,752,829.

U. S. sixes of 1881 closed on Wednesday of this week at 119⅜@119¾; U. S. Five-Twenties of 1862, 116⅞@—; U. S. Five-Twenties of 1864 at 117@117⅜; U. S. Five-Twenties of 1865 118⅛@118¾; U. S. Five-Twenties of 1865 consolidated 116⅞@117⅛; U. S. Five-Twenties of 1867, 118⅝@118⅞; U. S. Five-Twenties of 1868, 117@118; U. S. Ten-forties at 113@113⅝; U. S. Fives of 1881 (Funding Loan) 114⅝@114⅞; Six per cent. currency Sixes from 113⅛@113⅝.

The Railway and Miscellaneous share specu-

lation has been quite active in the prominent street favorites, and, toward the close, buoyant as to prices.

Railway Mortgage Loans have been more inquired for and quoted firm. Central Pacific Sixes have been selling to a fair extent at from 99⅜@99½. The Chesapeake and Ohio Seven per cent gold bonds have been selling to a fair extent at 90, and interest. Chesapeake and Ohio Sixes have been moderately active at 88½ and interest. Western Pacific Sixes at 92½@92¾. The Northern Pacific 7-30 Loan has been in good demand at par and interest.

State bonds have been moderately active at generally steady prices, for the favorite issues.

The latest quotations at the London Stock Exchange compare as follows with former returns:

* Ex Sept. coupon.

General business has been more satisfactory as to the volume of dealings in foreign merchandise, as well as in domestic produce. Prices have generally shown more firmness. The Metal trade has been rather brisker. Copper has been quoted steady, but has been quite moderately dealt in; 100,000 lbs. Lake at 26¾c.@27c. Iron has been generally held with more confidence in view of the reported rise in the English markets, and the announcement that the new German tariff would take effect on the 1st of October. The demand has been more animated, especially for Pig. Sales have been reported of 800 tons Glengarnock Pig at $44, now quoted at $45, with Eglinton at $44. The reported dealings in American product have been limited, with quotations about as in our last. We quote: Eglinton Pig at $43; Glengarnock, at $44; No. 1 American Pig at $43@$45; No. 2 do. at $38@$42; English rails at $64@$65 gold; American Rails, at works, at $77 50; Old Rails $46@47; Wrought Scrap, $40@$45 from dock and yard. Pig Lead has been very dull with foreign quoted at 6⅞c., gold, for ordinary, and domestic at 6¼c.@6⅜c., gold. Spelter has been very quiet at $7 37½.@$7 60, gold. Pig-tin has been in limited demand, with Straits quoted at 31c.; English at 28c.@28¼c., on sales of five tons, and Banca, at 34½c.@34¾., gold. Tin Plates, have been rather more active, at full previous rates. Sales, 1,000 boxes Charcoal at $10 75; 500 boxes Coke at $8 75; and 500 boxes Charcoal Terne, at $10 gold. Charcoal Plates quoted at $10 75@11 12½; Charcoal Terne, $9 62½@$10 25; Coke, $8 50@$8 87½; Coke Terne, $7 50@$8 37½, gold, per box. Zinc dull dull and unchanged.

Foreign merchandise has been more active and generally firm as to price. The week's imports of foreign goods and merchandise amounted to $8,465,334 including $2,862,116 of dry goods.

The leading kinds of domestic produce have been more sought after, especially Breadstuffs, Provisions, Cotton, Wool and Tobacco, with holders evincing more firmness. Middling upland Cotton left off buoyantly at 20⅜c. per lb. The receipts at all the ports, year ending Sept. 1, were $3,564,045 bales, against 2,705,523 bales the preceding year; exports 2,665,113 bales against 1,951,995 bales the previous year; stock at the ports at latest dates, 48,899 bales against 57,959 bales same date in 1871.

Ocean freights have been quite active, with rates quoted firmer, room and tonnage having been offered reservedly. The main call for accommodation has been from Grain and Petroleum Shippers.

At the Live Stock Markets, Beeves have been in fair demand at from 6½@12½ cts. the better grades showing firmness. Veals at 5@10 cts.; Sheep at from 4@6¼ cts.; Spring Lambs 5@9 cts.; Swine at 5¼@5⅝ cts. per lb., all live weight. The week's receipts were 9,243 Beeves, 2,629 Veal Calves, 23,381 Sheep and Lambs, and 36,347 Swine.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Atlantic and Pacific pref., 26; St. Louis, Kansas City and Northern pref., 44; Illinois Central scrip, 100⅛; Ohio and Miss. 7s, consol., 91¼; Detroit, Monroe, and Toledo 1st mort., 97; E. OFFICE OF FISK & HATCH,
No. 5 NASSAU-ST., NEW YORK, Sept. 1, 1873.

☞ The CHESAPEAKE AND OHIO RAILROAD, is now completed and in regular operation. To increase its Equipment, and perfect its Terminal facilities, and Deep-water connections with European Steam-ship Lines, and to accommodate the heavy **Coal and Mineral Traffic** together with the growing **Iron and Miscellaneous Local and Through Business** now pressing upon the Line, we are selling, on behalf of the Company, a limited amount of their **SEVEN PER CENT. GOLD BONDS,** secured by mortgage liens on the whole valuable property at 90 and accrued interest; $1,000 each, either coupon or registered, payable in gold coin, in New York City, principal and interest; interest Jan. 1 and July 1.

We also have a small amount of the **OLD SIX PER CENT. GOLD BONDS OF THE CHESAPEAKE AND OHIO;** the price of these is 88½ and accrued interest. They are issued in denominations of $100, $500, and $1,000, interest payable May and November.

The property has cost already upward of $38,000,000, and is constantly increasing in value. We can recommend both classes of the Bonds, which are selling rapidly, with great confidence.

We also continue to deal in **Government, and Central Pacific, and Western Pacific Bonds,** execute orders at the Stock Exchange for investment Stocks and Bonds, receive Deposits, on which we allow interest at the rate of 4 per cent. per annum, and conduct a general Banking business.

FISK & HATCH.

☞ The Poughkeepsie *News* says: "We learn that several European capitalists (engaged in the manufacture of iron in England), associated with some of our citizens, have about completed their arrangements for the establishing in this city one of the largest iron manufacturing establishments in the United States. The capital employed will be several millions of dollars. It is proposed by the company to enter largely into the manufacturing of steel rails and other iron work for railroad and bridge purposes."

☞ The earnings of the Erie Railway Company for the week ending Aug. 23, 1873, were $479,287, and since July 1, $3,018,373—an increase over the corresponding period of the previous year of $228,514.

Prevention of Cruelty to Animals.

The following is a copy of an act passed by Congress to prevent cruelty to animals while in transit by railroad or other means of transportation within the United States.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That no railroad company within the United States whose road forms any part of a line of road over which cattle, sheep, swine, or other animals shall be conveyed from one State to another, or the owners or masters of steam, sailing, or other vessels carrying or transporting cattle, sheep, swine, or other animals from one State to another, shall confine the same in cars, boats, or vessels of any description, for a longer period than twenty-eight consecutive hours, without unloading the same for rest, water, and feeding, for a period of at least five consecutive hours, unless prevented from so unloading by storm or other accidental causes. In estimating such confinement the time during which the animals have been confined without such rest on connecting roads from which they are received shall be included, it being the intent of this act to prohibit their continuous confinement beyond the period of twenty-eight hours, except upon contingencies hereinbefore stated. Animals so unloaded shall be properly fed and watered during such rest by the owner or person having the custody thereof, or in case of his default in so doing then by the railroad company or owners or masters of boats or vessels transporting the same at the expense of said owner or person in custody thereof; and said company, owners or masters shall in such cases have a lien upon such animals for food, care, and custody furnished, and shall not be liable for any detention of such animals authorized by this act. Any company, owner or custodian of such animals who shall knowingly and wilfully fail to comply with the provisions of this act shall, for each and every such failure to comply with the provisions of this act, be liable for and forfeit and pay a penalty of not less than one hundred nor more than five hundred dollars: *Provided, however,* That when animals shall be carried in cars, boats, or other vessels in which they can and do have proper food, water, space, and opportunity for rest, the foregoing provisions in regard to their being unloaded shall not apply.

Section 2. That the penalty created by the first section of this act shall be recovered by civil action in the name of the United States, in the circuit or district court of the United States, holden within the district where the violation of this act may have been committed, or the person or corporation resides or carries on its business; and it shall be the duty of all United States marshals, their deputies and subordinates, to prosecute all violations of this act which shall come to their notice or knowledge.

Section 3. That any person or corporation entitled to lien under the first section of this act may enforce the same by petition filed in the district court of the United States holden within the district where the food, care, and custody shall have been furnished, or the owner or custodian of the property resides; and said court shall have power to issues all suitable process for the enforcement of such lien by sale or otherwise, and to compel the payment of all costs, penalties, charges, and expenses of proceedings under this act.

Section 4. That this act shall not go into effect until the first day of October, eighteen hundred and seventy-two.

Approved, March 3, 1873.

☞ The Pittsburg *Commercial*, of the 22d ult., says: "We learn, incidently, of two lots of Lake Superior pig iron, one of 2,000 tons, and one of 3,000, ordered at the furnaces for shipment to England. One of the lots is ordered nominally for Montreal, but it is understood to be for English consumption. Our information is so nearly direct that we entertain no doubt of the facts as stated."

☞ We have been requested by Mr. Isaac Hinckley, President of the Philadelphia, Wilmington and Baltimore Railroad Company, to contradict the following statement which appeared on the first page of our last issue:

"A committee of the directors of the Philadelphia, Wilmington and Baltimore Railroad have awarded to the Baltimore Bridge Company the contract to replace the present wooden bridge now spanning the Susquehanna river at Havre de Grace by an iron structure. In all there are twelve spans in the bridge, each two hundred feet in length."

In a postscript to his letter Mr Hinckley says:

"You may have heard that I authorized our Engineer to contract for one span of 250 feet in length to replace a span injured by a tornado—but how it should grow into twelve spans of 200 feet contracted for by a Committee of Directors I cannot conceive."

☞ Direct railroad communication between Hagerstown and Martinsburg is being rapidly consummated. The Hagerstown *Daily* says that the advance gang of workmen engaged in laying the track of the extension of the Cumberland Valley Railroad are now within four miles of Martinsburg, and are progressing at the rate of about one half mile per day. Other gangs engaged in ballasting the road are following closely, and it is the intention of the company to open the road to trade and travel on the 8th of September.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending August 23, at 456,357 tons, and for the coal year 12,829,253 tons, against 12,024,801 tons to corresponding time last year, being an increase of 294,452 tons. The bituminous tonnage for the week is 57,133 tons, and for the year 1,998,266 tons, giving a total of all kinds for the week of 513,490 tons, and for the year of 14,827,674 tons, against 13,803,479 to same time last year, being an increase of 524,195 tons.

☞ There are now constructed on the Northern Pacific Railroad five hundred and seventeen miles, including four hundred and fifty-two miles from Duluth to Bismarck at the eastern end, and sixty five miles from Kalama to Tenino at the Pacific end. Another portion of the road two hundred and five miles in length is to be placed under construction immediately.

☞ The Erie Railway Company has declared a dividend of 3½ per cent on the preferred stock and one per cent on the common stock, payable on the 1st of October. The books will be closed from the 13th of this month to the 2nd of October.

☞ The estimated earnings of the Kansas Pacific Railway for the week ending Aug. 22, are: freight, $49,848 74; passengers, $30,113 38—total, $79,462 12.

☞ The estimated earnings of the Denver and Rio Grande Railway for the week ending August 7th 1873, were: freight, $4,050 42; passengers, $4,802 97—total, $8,853 39.

☞ The Portland Company, besides repairing the shops injured by the late fire, is building a car-shop of brick 170 by 60 feet, with an addition 50 by 20 feet, to be finished in a month or two.

Journal of Railroad Law.

RAILROAD COMPANIES—THEIR DUTIES AS TO MANNER OF LAYING TRACKS—PRESUMPTION OF NEGLIGENCE.

The recent case of Worster *vs.* The Forty Second Street and Grand Street Ferry Railroad Company (50 N. Y., 203), was an action brought to recover damages for injuries sustained by a horse of plaintiffs, occasioned by an alleged defect in defendant's track.

Defendant owns and operates a railroad running through and over Houston Street in the City of New York. On the 12th of April, 1864, plaintiff was driving a pair of horses, belonging to him over the track, one horse stepped into a hole, was thrown down and injured, and in consequence died.

The court dismissed the complaint upon the ground that there was no evidence showing defendant was aware of the bad condition of its track, or that the same was in such a condition for a length of time that would imply knowledge.

The General Term reversed this decision.

The following is the opinion of the court delivered by—

CHURCH, CH. J.—We are to assume that the defendants had a lawful right to lay their tracks in the street, where the injury occurred, but this right carries with it the obligation to lay the tracks in a proper manner, and keep them in repair, and if an injury occurs by reason of neglect in either of these respects the defendants are liable in damages. (Flash *vs.* The Third Ave. R. R., Co., 1 Daly, 148., 11 Penn., 141). The defect was immediately connected with the track and was plainly visible to the employees of the defendants who were constantly operating the road. The duty of remedying the defect was affirmative and absolute. Notice to the defendants of the defect was not necessary. (35 N. Y., 58). It was their duty to know it. It was patent and an omission to know that such a defect existed was *prima facie* negligence as much as an omission to repair after notice. The facts tended to prove that the deect had existed for some days. The learned judge who presided non suited the plaintiff because the defendants had no notice of the defects, and because they had not existed for such a length of time as to create the presumption of knowledge. The ruling was erroneous. The presumption of knowledge arises from the existence of the defects themselves. The plaintiff was only required to show that the injury resulted from the road being out of repair, and if circumstances existed showing absence of negligence it was for the defendant to prove them. The presumption of negligence was complete when it appeared that the defects existed and an inquiry was caused thereby. In some cases notice to municipal corporations, express or implied, of defects or obstructions in the streets, is requisite to create a liability for an injury produced by reason of them, but the authority of these cases has no application here, (Hudson *vs.* Mayor, &c., 9 N. Y., 163).

udgment of reversal must be affirmed.

Judgment affirmed.

☞ The Harsimus branch of the Pennsylvania Railroad, extending from the railroad cut in Bergen Hill to the new depot in course of erection in Harsimus Cove, is completed. It will be used exclusively for freight trains.

Railways in India.

The annual report of Mr. Juland Danvers, Government Director of Indian Railway Companies, has been presented to Parliament. The report contains the following information on the condition and prospects of Indian Railways:—

A length of 805 miles was added during the year 1872 to the 5,089 miles of line which were open for traffic at its commencement, and during the present year 127 miles more have been completed, so that the railway system now open in India extends over 5,512 miles. Fair progress has been made with the works on the State lines, and during this year between 200 and 300 miles will probably be opened. An additional length of 150 miles on the Oude and Rohilkund line will also be finished and opened before November next. The works on this line which give most trouble are the bridges, especially those over the Ganges at Cawnpore and at Rajghat. The importance of obtaining good foundations below where the scour can possibly reach them has been demonstrated by dearly bought experience. Hardly a season passes without bridges breaking down and embankments being cut through by the streams they were respectively constructed to cross over and to check. During the floods of last year the Sutlej bridge, on the Punjab Railway, gave way, and on the Northern State line the unfinished works on the Jhelum and Ravee bridges were damaged. Several bridges on the Bombay, Baroda, and Central India Railway were also carried away in September last. "The fact is," says Mr. Danvers, "that when railways were first proposed for India, although a great many difficulties were started which on near approach disappeared, the great difficulty of crossing the rivers and of withstanding the force of the floods was not apparently sufficiently considered or estimated. The rivers of India, which rise in the various mountain ranges some thousands of miles from the sea, cut their way through soils of so soft and shifting a character that in many places a new channel, sometimes miles away from its original course, is frequently formed, and the old bed is left dry." A curious instance of a change of channel occured last year, when a notification appeared in the Calcutta *Gazette*, transferring thirteen villages from one district to another, in consequence of the Ganges having so changed its course as to leave them on the south instead of the north bank. The process of erosion is thus described by the late Captain Wood in his *Journey to the Source of the Oxus*:—"When the waters of the Indus are low, the noise caused by the tumbling in of its banks occurs so frequently as to become a characteristic of the river. During the silence of night the ear is assailed by what at first might be mistaken for the continued discharge of artillery; two, three, and even four reports are often heard within the minute, and even thirteen have been counted in that short space of time." "The seasons in India," Mr. Danvers reminds us, "have a very different effect upon the water-courses to that which we generally see in Europe. The rainfall is confined to certain months, and, in some places, to certain weeks and days, while the rest of the year is dry and hot. In many cases river beds which may be easily forded and even waded at one season become channels for wide and impetuous streams in another. It was, of course, a part of the engineer's duty to study this characteristic and to provide against the danger. His investigations were, however, thwarted by imperfect data, and what, from recorded information observation, was considered to be the maximum volume of water that ever passed through a certain channel in the height of the floods has been frequently exceeded." Major-General Beadle, R. E., writing very recently concerning the works on the Oude and Rohilkund Railway, points out that in 1870 and 1871 the floods were so excessive and so entirely unforeseen that the estimates submitted and the project prepared had to be re-considered and altogether superseded; the bank had to be raised and the designs of bridges to be revised, increasing largely the waterway. These floods fortunately occurred before the works were much advanced. This, however, has not been the case in other places. Disasters have accordingly occurred, and much damage has been inflicted on several railway bridges. Now that more is known more will be done to avert the mischief, but, after taking every precaution, there will always be considerable difficulty where shifting streams have to be encountered, and where foundations have to be laid in soil subject to a scour of 50 and 60 feet in depth. The only approach in Europe to this condition of things is in the northern plains of Italy, and last year we had an example of how human ingenuity and skill have been unable to cope with the streams which rush down from the Alps in the autumn and early winter. With regard to future extensions we are informed that no new undertakings were sanctioned during the past year. In the present circumstances of railway enterprise in India it is not surprising that the policy of Government in regard to future extensions should be marked by caution. So long as industrial works in India must be undertaken by Government, or, what amounts to the same thing, so far as financial risk is concerned, by guaranteed companies, and so long as the result of the working of existing lines involves a contribution from the revenue of the country to make up the amount due for interest on the outlay, the Government is right in requiring proof, or the strongest evidence in support of the belief, that future railways, whether undertaken by government or companies, will turn out to be remunerative in one shape or another. Indirect as well as direct gains, of course, enter into the calculation. The improvement of the material prosperity of the country is the end aimed at through all such works. But if the revenue of the country will not be increased, directly, by remunerative profits from the new lines themselves, or indirectly, by augmented receipts from existing lines, by saving the national expenditure or by improving the national resources, the Government naturally pauses before encouraging fresh works." As regards capital outlay, we find that the total amount of capital which, on the 31st of March last had been advanced for expenditure on the guaranteed railways was £91,686,025, of which £1,556,440 was expended during the past official year. The outlay in England for stores and materials was £822,994; in India, for construction purposes, £679,446. The expenditure on the State lines is brought down only to the 31st of December, 1872. It had then amounted to £3,492,323, of which £708,827 had been expended in England. A sum of £3,371,213 had been advanced or appropriated to the various undertakings, leaving £121,105 out of the amount expended in this country on stores, &c., to be appropriated in India. The amount appropriated to the State lines during the year 1872 was £1,558,836. The whole capital expenditure on railways in India thus accounted for (which is exclusive of the land for the guaranteed lines and the loss of exchange borne by Government) is in round numbers £94,500,000. Attention is drawn to the allegation, the truth of which is not denied, that railways in India have cost a great deal more than was expected and more than they will cost in future. The guarantee system, which should only be applied in exceptional circumstances on grounds of necessity, is not admitted to be the cause, and after investing the capital expenditure of the East Indian Railway, the most important and costly of the lines, the following conclusions are arrived at:—"An analysis of the cost of the East Indian Railway main line, the average of which was £21,100 per mile, shows that a great part of the outlay arose from causes which were unavoidable and of an extraordinary character, such as the mutiny (which, directly and indirectly, is estimated to have added £3,000,000 to the capital outlay), the Southal rebellion, the plan of commencing operations at various parts of the line simultaneously, and the great difficulty consequent thereon of transporting materials by the road or river. The stupendous bridges and the large extent of flood openings, the length of double way constructed, as well as the general firm

and substantial character of the works and the heavy rails and materials used, account also for the rest of the outlay upon what is often erroneously regarded as a single line. Deducting the exceptional expense above described, which cannot be taken at less than £4,000,000, the cost per mile of single line would amount to $12,250. A comparison between the circumstances of India now and 20 years ago, the greater knowledge and experience which have been gained in the interval, and the practice at present in vogue of carrying out railway works on a light system, will help to explain the difference between the cost of the lines originally undertaken and those now being executed. The recent examples of the Wudwan and Patree branches in Western India encourage the expectation that in districts tolerably easy for railway operations, even with the 5ft. 6in. gauge, single lines may be constructed at a cost of from £6,000 to £3,500 a mile." The revenue derived from the railways during the past year was slightly in excess of the previous year, but the increase is not sufficient to reduce by any appreciable amount the difference between the net earnings and the sum paid for guaranteed interest, which is this year of course, greater than last year. In 1872 the revenue was £2,869,223. In 1871 it was $2,686,250. In 1872 the gross receipts were £6,351,617, and the expenditure amounted to £3,482,394. In the previous year the gross receipts were £6,146,130, and the expenditure £3,459,870. The passenger and miscellaneous receipts in 1872 were $2,387,003, compared with £2,120,821 in 1871. The goods receipts were £3,964,614 in 1872, and £4,025,809 in 1871. The guaranteed interest advanced by the Government during the year 1872 amounted to £4,600,883, so that a sum of £1,734,030 had to be charged upon the revenues of the country. Last year there was a similar charge of £1,740,720. "Although," says Mr. Danvers, "such a result was expected at the commencement of the year, it is no less to be deplored. But it should be borne in mind that some of the guaranteed capital has been raised for and expended upon lines which are not completed or open for traffic. A sum of £6,000,000 may in this way be regarded as unremunerative, so that about £300,000 may be properly deducted from the deficit when it is referred to as illustrating the deficiencies of the present railway system. The last few years are not, it is hoped, a fair criterion of the future. The fluctuations of trade will, no doubt, always produce corresponding effects upon the traffic, but a gradual development is taking place, which will become more rapid as new roads and feeders are made to the existing lines, and new districts are thus opened to the advantages of railway communication." The passenger traffic last year produced £2,085,940, as compared with £1,941,571 in the previous year. The difference of £144,369 was principally made up by the increase in the receipts from third and fourth class passengers which amounted to £91,385. These classes contributed £1,496,610, or 77 per cent of the whole. The number of passengers increased from 18,940,585 to 20,332,823. The first and second classes declined. The third class rose from 14,113,426 to 15,126,824, and the fourth, or coolie class, from 3,516,549 to 3,911,429. The increase in numbers, which took place chiefly on the East Indian, the Madras, and the Bombay, Baroda, and Central India Railways, has partly been produced by a reduction in fares, which has not yet had time to yield a corresponding increase in the receipts. The third and fourth classes constituted 93.63 per cent of the whole number. The receipts per mile in 1872 were £400, compared with £394 of the previous year. The receipts from the goods and mineral traffic were last year £3,964,614, compared with £4,022,615 in 1871, showing a decline of £58,000. A large amount of tonnage was, however, carried, 2,929,687 tons having been conveyed in 1872, compared with 2,615,966 in 1871. The falling off in receipts occurred on the Great Indian Peninsula Railway, which shows a decline of £156,000 in receipts and 82,148 tons in weight. In cotton and grain alone there was a falling off of 35,500 and 24,000 tons respectively. The number of trains run was 155,594, compared with 131,360 of the previous year. The train mileage was 14,543,862, compared with 14,080,064. The train mileage receipts averaged 8.63s, being just about the same as last year. The highest receipts per train mile were on the Bombay, Baroda, and Central India Railway, where they amounted to 12.51s. The mileage receipts on the Eastern Bengal were 99.0s., and on the East India, 9.33s. The lowest were on the Calcutta and South-Eastern, being 4.9s. Turning to the expenses it will be seen that the total expenditure for maintaining and working the railways was £3,328,644 in 1872, compared with £3,251,725 in 1871. On the Indus Flotilla it was £53,034 in 1872, compared with £50,325 in the previous year. The expenses per train mile were the same in both years—viz, 4.50s The proportion of working expenses to gross receipts was on the average 52 per cent. This varied, however, considerably on the different lines. On the East Indian Main Line the expenses were only 41 per cent of the gross receipts; on the Great Indian Peninsula 60, on the Scinde, Punjab, and Delhi, 86. After alluding to the effect upon the traffic of certain reductions which had been made in the rates, and to the probability of the immediate loss being soon converted into a gain, Mr. Danvers explains the principle upon which he thinks a tariff should be settled. "A suitable scale of railway charges depends," he says, "upon various circumstances, but principally upon the cost of production—*i. e.*, of conveyance. There must necessarily be a margin between such cost and the sum paid by the customer, but it by no means follows that the greater the difference the more will be the aggregate profit. In a country like India, especially, where the population is large and poor, it would be unwise to attempt to impose such rates for the conveyance of passengers as would remove the power of traveling from the great majority of the people. The true policy would seem to be to fix a rate, which, while leaving a margin for profit on the cost of conveyance, would tempt the largest number to travel. If this is the correct view, it can well be understood how, as is often asserted, the interests of railways and of the community coincide. The same remarks will apply to charges for goods, and often with greater force, as, for example, in those cases where water carriage can compete with the railway, and where large tracts of land are kept out of cultivation, or mineral districts are unworked, in consequence of the cost of conveyance to a market raising the price of commodities beyond the consumer's means. Allowance must, of course, be made for variableness of trade, as the average cost of conveyance will in some measure be regulated by the amount carried; but this may be covered in the long run by a moderate margin. The first point to be ascertained, therefore, is what is the cost of conveyance; and this can be arrived at only after a careful examination of the working expenses of a line for a sufficient period to cover different seasons and to include those influences on traffic which would enable a fair average to be taken. A suitable tariff," he adds, "however important, is by no means all that is required to insure success in railway enterprise. There is no commercial undertaking which requires more careful study and more intelligent and energetic management than a railway.

☞ General B. H. Bristow, of Kentucky, has resigned the presidency of the California and Texas Railroad Construction Company, which is now building the Texas Pacific Railway, and is succeeded in that position by John McManus, of Reading Pa.

☞ The track is laid on about sixteen miles of the Ware River Railroad extension, and two gangs of track layers are speeding the work, which is to be done, if possible, by the first of December.

☞ The Indianapolis Belt Railway company are constructing a double track road entirely around the city of Indianapolis, for transferring through freight between roads terminating there. The *Telegrapher* says that all the railroads centering at Indianapolis, are fully committed to the enterprise, and the project is very heartily endorsed by the citizens generally, and will, no doubt, prove a success.

☞ It is stated that the Central Vermont Railroad Company have accepted the resignation of Gyles Merrill as General Superintendent of the Central and connecting roads, and that John W. Hobart, General Freight Agent and Master of Transportation, has been appointed in his place.

FOR SALE.

One New Four-Ton

LOCOMOTIVE,

NARROW GAUGE,

WILL BE SOLD $500

UNDER VALUE.

WASHINGTON IRON WORKS,
60 Vesey St., New York.

LETTING
NORTHERN PACIFIC RAILROAD.

SEALED PROPOSALS will be received at the office of the Chief Engineer, No. 23 Fifth avenue, in the city of New York, until noon of Wednesday, September 10, for Grading and Bridging all that portion of this Company's Road, between the Missouri and Yellowstone rivers, 205 miles.

Proposals will be received for the whole distance, or for sections of about 25 miles each.

For further information apply at the office of the Chief Engineer in New York, or to General T. L. Rosser, Division Engineer, Minneapolis, Minn.

W. MILNOR ROBERTS, Chief Engineer.

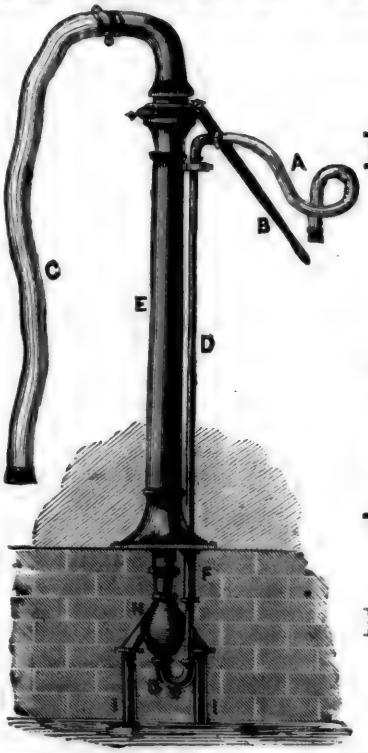
WM. H. PETIT & PIKE,
72 Wall-st., New York.

FOR SALE.

Four new passenger Coaches for sale; two 60 passenger each, price $5,250; two 78 passenger-price $7,000 each, now ready for lettering. Also a 30 ton new Locomotive ready for use.



Apply to

A. W. LADD

35tf 5 and 7 DEY STREET NEW YORK.

LANSDELL'S
Patent Steam Railroad Water Station.

DISPENSES WITH Tanks, Tank Houses, Stationary Power, AND Attendance.

CAN NOT FREEZE IN ANY CLIMATE, UNDER ANY CIRCUMSTANCES.

COSTS LESS Than One Half the Price of a FROST PROOF TANK.

The Engineer in charge of the Locomotive attaches the Hose A to a steam valve in the boiler. Steam passed through the pipe D and slip joint F into the globe H, producing a vacuum; the water is then lifted through the pipes I I and forced through the column E and hose C into the tender, filling any ordinary tender in about three minutes. When steam is shut off all the water in the pipes returns into the well, and any condensed steam passes off through the drip valve G, leaving nothing to freeze. The handle B serves to turn the discharge pipe and hose in any direction. The water delivered into the tender is warm, thus utilizing the steam used. The discharge tubes, represented above made of iron if preferred.

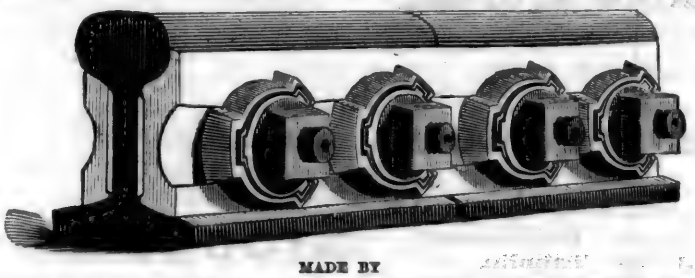
THE LOCK-NUT & BOLT COMPANY OF NEW YORK,

No. 61 Broadway, New York.

Manufacturers of all kinds of **BOLTS** for FISH-BARS, BRIDGES, CARS, MACHINERY, &c., with the "CUMMING NUT-LOCK," the only method of locking a nut to the bolt.

PATENTED June 16, 1868.

IMPROVED August 23, 1870.



Unequalled for Cheapness, Simplicity and Effectiveness.

DESCRIPTION.—A pointed copper key is placed in a groove cut in the threaded part of the bolt, *over which* the nut is screwed to its position, cutting its own thread in the copper, thereby taking up all the slack between the bolt and the nut. By riveting up against the face of the nut the projecting portion of the copper key, the nut is firmly locked in its position, but can be readily adjusted or removed with a wrench without injury to either bolt or nut.

Severely tested for over *four years*, they have *never failed*, and are *now in use on over fifty Railroads*, giving perfect satisfaction. We solicit a trial *anywhere*.

Licenses Granted to R. R. Companies, Car Builders and others.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

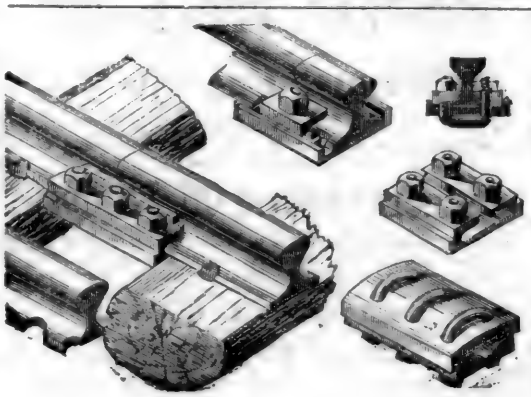
The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.



That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

FISHER'S PATENT

Wrought Iron

RAIL JOINTS,

MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

Railroad Safety Devices.

A device for decreasing danger is mentioned by a Des Moines correspondent of the *New York Tribune*, in discussing the late horrible slaughter on the Chicago and Alton Railroad, in Illinois. This writer claims that there are some important lessons to be learned from that catastrophe. He particularly notices that although both trains seem to have been running at full speed at the time the collision occurred, and neither discovered the other in time to check its momentum in the least, it is a remarkable fact that very few passengers were injured in any way but by scalding, and that the regular passenger coaches and sleeping cars of the express train remained on the track uninjured. He believes that the fact that there was no "telescoping" and consequent destruction of life is due to two precautions which he noticed recently when riding over the Alton Railroad. The first of these is that every passenger coach and sleeping car on the train was supplied with improved safety platforms, some kind of which ought to be used on every passenger car on every railroad, and the other is that the coaches are fastened together by means of bolts, which make the train one solid mass, so that the shock of the collision was distributed evenly through all the cars. The Pullman car conductor says that the ends of the car rose up a short distance, but fell quietly back to the track, when the passengers walked out upon the platforms. The correspondent therefore suggests that this incident shows that one of the terrors of railroad accidents, namely, "telescoping," may be prevented by safety platforms and the proper coupling of cars. Whatever may be the force of this suggestion, it is the duty of railroad companies to take advantage of all modern improvements which tend to lessen the dangers of railroad travel and mitigate calamities when they occur.

NOTICE TO INVESTORS.

The attention of the investing public is called to the limited remainder of the NORTHERN PACIFIC RAILROAD SEVEN-THIRTY LOAN. The unsold balance will be soon absorbed by current sales, after which the Company has resolved to issue only six per cent. bonds.

There are now more than 500 miles of the road in regular operation, with a growing traffic; surveys and construction are progressing satisfactorily; the survey prosecuted the present season, in connection with the Stanley military expedition, has resulted in the location of an excellent line through Western Dakota and Eastern Montana, and the company has advertised for proposals for grading and bridging the Yellowstone Division, extending 205 miles from Bismarck, at the crossing of the Missouri River to the crossing of the Yellowstone, in Montana. The Company's lands (amounting to more than 20,000 acres per mile of road) are selling to settlers at an average price of nearly $6 per acre, and the proceeds of land sales constitute a Sinking Fund for the repurchase and cancellation of first mortgage bonds.

The Company's seven and three-tenths per cent. gold bonds, the last of which are now offered, yield nearly 8½ per cent. per annum at the present price of gold.

All marketable securities are received in exchange at current rates, and full information furnished on inquiry.

JAY COOKE & CO.,
No. 20 Wall-st., New York.

☞ Charles Shaw has been elected President and George Hamilton Treasurer of the Newport and Dexter Railroad Company.

English and American Iron Production.

"The British Iron and Steel Institute, an association of iron makers, furnacemen and inventors, of which Mr. Bessemer is an officer and ex-president, and which is now presided over by Mr. J. Lothian Bell, held its last annual meeting at Liege, in Belgium, and the detailed reports of its proceedings show that there is an unusual interest in the iron industry at this time. It is an innovation for so influential and dignified a body to convene in a foreign territory; but it is even more significant to find in the proceedings that an invitation from the American Iron and Steel Institute, through its president, to hold its next annual session (1874) in Philadelphia has been accepted. It must be obvious to the dullest that, by some cause or other, America is becoming one of the great iron making powers of the world.

Dear fuel and dear iron in England give America an opportunity we never yet have had. In New York State, Pennsylvania, Virginia, West Virginia, Kentucky, Missouri Michigan, and New Jersey are vast deposits of iron ores. In most of these States coal is also to be found near the ore. In Virginia and West Virginia, in particular, there is trustworthy evidence that there are on one flank of the Alleghanies deposits of iron ore rising into cliffs 75 feet high, easily loaded into cars; while on the other flank, in the Kanawha Valley, are the richest coal seams in the world, embracing varieties of fuel, one of which can be used in the furnace in its raw state, while the others are serviceable for steam generation, gas, and general purposes. The ore beds are now connected by the Chesapeake and Ohio Railroad, a line of low grades, and admirably fitted for a large mineral traffic, commanding as it does both Eastern and Western markets. A thousand furnaces might safely be erected along the westernmost 300 miles of this road without fear of successful competition by either foreign or domestic makers."—*N. Y. Tribune.*

☞ The Union Pacific Railroad Company sold during the month of August, 1873, 22,873 65-100 acres, of land, at an average price of $6 90.7 per acre, amounting to $157,994 24. The sales averaged 89 7-10 acres to each purchaser. Total sales to Sept. 1, 1873, 779,518 22-100 acres at an average price of $4 45 per acre, amounting to $3,468,480 77.

☞ The earnings of the Erie Railway Company for the week ending Aug. 31, 1873, were $441,581, and since July 1, $3,459,964—an increase over the corresponding period of the previous year of $287,751.

Chicago, Burlington and Quincy R. R.

The earnings of this road for the twelve months ending April 30, 1872, and the eight months ending December 31, 1872, were as follows:

	Twelve months ending April 30, 1872.	Eight months ending Dec. 31, 1872.
From passengers	$1,724,543 72	$1,243,321 67

Interest on bonds	616,715 52	
State and county taxes	109,287 61	
United States taxes	495 31	
Dividend Sep. 16, 1872	932,645 00	
		1,715,190 65
Leaving balance to credit of income account, December 31, 1872		$2,803,271 79

It will be seen that the gross earnings of the company for the eight months ending December 31, 1872, were $5,524,730 85; and that the operating expenses, including taxes were, $3,208,786 43; leaving net earnings $2,315,944 42; from which deduct amount of interest paid on bonds, $616,715 52, leaving a balance of $1,699,228 90; out of which have been paid: dividend No. 24, $932,645; rent of track, $10,418 06; interest and exchange, $45,629 10—leaving of net earnings for the eight months to the credit of income account $710,536 74. To which add surplus at the commencement of the year, $2,092,735 01—making the surplus to credit of this account $2,803,271 75. The amount to the credit of sinking fund, taken from earnings of previous years, is $1,179,744 88, which added to income credits, makes the amount of surplus $3,983,016 63. The gross earnings exceed those of the corresponding eight months of last year $75,833 72, and the net earnings exceed those of the corresponding period of last year, $121,718 12. The president in his report says:

In consequence of the large amount of statistical information required for the State authorities, and for other purposes, on the first day of January in each year, your directors thought it an economy of time and expense to change the time of closing the fiscal year to the 31st of December, which—in pursuance of their recommendation to that effect—was accordingly done at your last meeting. This report, therefore, of the transactions of the company, and of its affairs, will cover a period of eight months, ending with the calendar year.

The average number of miles of road operated from May to December, inclusive, was 787—an increase over the average of the previous year of 26 miles.

There has been an increase in the number and mileage of passengers carried during the last eight months, over the corresponding period of the previous year, and a part of the increase of gross earnings has been made upon the passenger traffic; and the amount of freight transported during the same period is also in excess of the amount transported during the like period of the previous year.

From the above statement of operating accounts it will be seen that the gross earnings for the last eight months were $5,524,730 85, and that the operating expenses, exclusive of taxes, were $3,099,003 51. During the like period of the preceding year, the gross earnings were $5,448,897 13, and the operating expenses $3,226,519 19, showing an increase in the gross earnings over the corresponding months of last year of $75,833 72, and a decrease in operating expenses of $127,515 68. Indeed, the actual net earnings are in excess of those for the same period of the previous year by $203,349 40; but, while the taxes of the year have not been greater, the amount paid during this part of the year was $81,631 28 more than for the like period of the previous year; so that, including taxes paid each year, the increase of net earnings over those of the corresponding period of the previous year are $121,718 12.

The percentage of operating expenses to gross earnings, during the last eight months, has been 56.09 exclusive of taxes, and with taxes included, 58.08 per cent; while for a like period of the previous year, the percentage was 59.21 without taxes, and including taxes, 59.73. The excess of taxes paid over those of the same period of the previous year, was 1.48 per cent, and the decrease of the operating expenses over the like period of the previous year, exclusive of taxes, was 3.12 per cent of the gross earnings.

The capital stock of the company remains about the same as at the date of the last report; and from the foregoing exhibit of the operating accounts, it appears that the net earnings of the road for the last eight months, above operating expenses, taxes, and interest on the bonds of the company—not including interest on bonds of branch roads—have been equal to $10 41; and including interest on bonds of branch roads, to $8 80 per share of capital stock. The entire gross earnings for the whole road have been at the rate of $7,019 99 per mile for the eight months. It will be seen that there has been a very considerable increase of earnings, per share and per mile, over those of the preceding year.

It will be recollected that these eight months, from May to December, inclusive, cover the season of navigation upon the lakes, and during a period when all the thoroughfares by rail and water, from Chicago to the seaboard, are open to receive the business brought into Chicago by your road. These are also the months when it is expected that the traffic of the road will be greater, and the cost of transportation comparatively less, than during the remaining months of the year, when both the track and the traffic of the road are more or less affected by the frosts and snows of winter.

The month of May opened with an immense grain freight upon the line, with every prospect that it would find its way to market before the close of the year; but the low price, the lack of transportation, both by rail and the lakes, and the impossibility of getting grain through the elevators at Chicago, which were closed much of the time by the holders of grain who found it for their interests neither to sell nor ship—thus preventing the receipt of grain in Chicago, and the frequent corners in oats, wheat and corn in Chicago during the Summer—have all had their effect upon the business of the road, and to a large extent prevented the movement of grain. The result is, that a large part of the crop of 1871 in the country along and tributary to your line, has yet to be moved; and this, added to the late harvest—equally abundant with that of the previous year, tax to the utmost the freight equipment of the road.

The amount of stock transported during the last year has been unusually large, and will continue to be, especially for the remaining winter months. There have been brought into Chicago by the various railroads, during the last year, 684,075 head of cattle, of which your road carried 243,458. Out of 3,252,623 hogs brought into Chicago during the year, your road brought 985,145.

The amount of business to and from the Western connections has been in about the same proportions to the whole business of the company as during the previous year. While with some of those connections there has been a very considerable decrease in the amount of business, in others there has been a large increase.

The diminution of business from the Missouri connections has been, perhaps, more than made good by the Iowa and Northwestern connections.

The earnings of the road on the business to and from the Hannibal and St. Joe Railroad, for the last eight months, have been:

Freight	$368,602 96
Passenger	153,996 02
	$522,598 98

During the same period, the earnings on the traffic to and from the Burlington and Missouri River Railroad have been:

Freight	$637,284 55
Passengers	218,155 36
	$855,439 91

an increase on the latter road, and diminution on the former.

A reference to the detailed statement of the business results and condition of the branch roads, contained in the last report, will furnish all requisite information in reference to those branches, It may be stated, however, that there has been a steady increase in the business on these several branches.

Attention is called to the Chicago and Iowa Railroad, extending from Aurora to Forreston—eighty miles.

The stock of that company is $1,328,000, of which your company owns one-half.

Its bonded indebtedness is $1,750,000, bearing eight per cent interest, making the annual interest thereon $140,000.

The track was completed, and the road partially opened for business, early in the year; but the business of the Illinois Central Railroad, and through trains from Chicago to Dubuque, via the Illinois Central, were not put upon it until about the first of July. From July to December, both inclusive, the gross earnings of the road have been $269,073, while the interest on its bonded debt for the same period amounts to $70,000, showing that the company has in this road a valuable property.

The Chicago and Rock River Branch is now completed, and, although not opened for business until the middle of October, and notwithstanding the fact that there has been but little movement in grain, it has furnished a very considerable business for the Main Line.

Since the first of May last the double track between Riverside and Aurora has been completed including the iron bridge across Aux Plaines river at Riverside, the track ballasted and put in a first-class condition.

The length of double track—all of which is between Chicago and Mendota—is 61¼ miles; 6¼ miles of new side-track have also been constructed at various points on the line. In the renewals of track on the Main Line, steel has been substituted for iron; and the excess of the cost of steel over

iron used during the eight months, constitutes the largest item of expenditure on account of construction, 79.22 miles of steel rail have been laid in the track during the eight months, making the whole number of miles of steel rails now in the track 134.15.

The Illinois Grand Trunk Extension was completed to Clinton and opened for business in July. Surveys have been completed, and every preparation made to proceed with the erection of a bridge across the Mississippi River at that point, so as to bring your road into connection with the Chicago, Clinton and Dubuque and the Chicago, Dubuque and Minnesota roads. This bridge will be constructed by a Bridge Company, and it is expected that the work will progress as fast as may be with economy.

The Chicago and Rock River Road has been well constructed. The station buildings are completed, and the road fenced throughout its entire length, and only ordinary expenditures will be required for the future.

There has been a considerable expenditure in the purchase and improvement of additional depot grounds, at Burlington. Some additional ground may be required at this place to accommodate the business of the company, but not in a large amount.

During the eight months 17 engines have been purchased, making the total number 209 now upon the road.

The equipment of the road has been added to by the construction of 4 passenger and 166 freight cars; 32 platform and coal cars; 7 drovers' and caboose cars; 14 hand and 16 rubble cars, making the total equipment of the road at the close of the year:

Engines 209; passenger cars 88, inspection car 1, pay car 1, baggage, mail and express cars 44, freight cars 2,716, coal and flat cars 1,002, drovers' and conductor's cars 89, dump cars 40, tool cars 3, pile driver 1, hand cars 282, rubble cars 244.

While your road is as well, and perhaps better equipped, than other Western Roads, having 4.64 freight cars per mile; yet the Freight Equipment is not adequate to the business which offers, and especially during the season of navigation.

It is the purpose of the company to add about 500 freight cars to its present equipment before the first of May. The acquisition of the Burlington and Missouri River Road may necessitate some additions to be made to the passenger equipment, but not to any considerable extent. The principal expenditure that will be required for the ensuing year, will, of course, be upon the track, and in the substitution of steel for iron. It is expected that about 70 miles of iron on the Chicago, Burlington and Quincy Railroad proper will be replaced with steel during the ensuing year, aside from the amount that may be required on the Burlington and Missouri River Road elsewhere mentioned.

The entire road is now under fence.

The usual amount of ballasting has been done during the Summer and Fall, and both the road and equipment, notwithstanding the large amount of traffic, are now in good condition—better than at any former period. The substitution of steel for iron is permanently improving the track and diminishing the cost of the annual maintenance. With the exception of some possible expenditures on account of the construction of a passenger house for the accommodation of the company's business at Chicago, and the items we have already named, it is not thought that there will be any considerable amount required on account of construction during the year. It has been the policy of this company hitherto to keep its track and equipment in the best practicable condition. Economy and the convenience and safety of the public require this; and such expenditures as are necessary in this regard are to be expected, though it is hoped they may be less for the ensuing than for the past year.

In the consolidation of the railroad and property of the Burlington and Missouri River Railroad Company with your own (subsequently mentioned) in order to equalize the share values of the Stocks of the two Companies, instead of adding to the Capital Stock for that purpose, the company issued its seven per cent bonds to the amount of $4,668,225, which were distributed among the Stockholders *pro rata* as of the 31st of December, 1872.

In order to meet the expenditures previously incurred in the extension of the Prophetstown Branch to Clinton, and in completing the construction of the various other Branches, your company sold its seven per cent. Bonds to the amount of $1,600,000, and the bonded debt of the company has been accordingly increased by these amounts since the last report.

The Capital Stock has been increased by the issue of thirty shares to a foreign Stockholder, which was a part of the issue of stock authorized by the Board, August 19th, 1871, and which, in consequence of his absence from the country, had not previously been issued.

By reference to the Treasurer's Report, General Account A, it will be seen that the permanent investment of the company, on the 31st of December, 1872, on account of—

Construction, equipment, cost of Branch Roads, Railroad Bonds, Stock and Materials for future use, was		$41,568,699 99
Capital stock	$18,652,910 00	
Bonded debt, bearing interest	11,346,225 00	
Scrip issued to pay for Northern Cross Road from Galesb'rg to Quincy, not bearing interest	152,250 00	
Amount due Bondholders Northern Cross Road, as per settlement with them	256,206 95	
Amount of bills and accounts payable over bills and accounts receivable, and cash	162,644 18	
Amount contingent liabilities for b'ds on Branch Roads, upon which liability primarily rests	6,756,000 00	
		37,826,236 13
Leaving a surplus of		$4,262,463 86

In the above statement, taken from the treasurers report, there is included that part of the original cost of the property which has not hitherto been represented in the accounts by either stock or bonds.

It is known to the Stockholders that the purpose of uniting the Burlington and Missouri River Railroad with your own, so long in contemplation, has been accomplished. The Roads and properties of the two companies are now substantially one by nearly the unanimous consent of the Stockholders of the two corporations. Conveyances necessary to vest the title of the property of the Burlington and Missouri River Railroad Company in your company, aside from the railroad, have been executed and delivered. The railroad and appurtenances have been transferred, and are now held under the form of a lease in perpetuity, which it is expected will, at an early day, be superseded by an absolute consolidation, when the stock certificates, now held by the Stockholders of the Burlington and Missouri River Railroad Company, will be called in, and those of the Chicago, Burlington and Quincy Railroad Company substituted therefor.

On the last day of the year your company took possession of the railroad and property of the Burlington and Missouri River Railroad Company, and assumed its liabilities and obligations. From and after that date the railroads and properties of the two companies are to be operated and treated as one.

The Stockholders, doubtless, are already aware that the Burlington and Missouri River Railroad, with its Main Line and Branches, throughout their entire length, traverse a section of country in every agricultural resource equal to the best in the State of Iowa. The soil is rich and productive, and adapted to the raising of corn, wheat and oats—the main productions of the West. It is well watered, and suited to the growth and feeding of stock, which has already become one of the leading interests of that State. Stone and coal are in abundance on the line of the road. The east one-third of the State is quite thickly populated, and the land well under cultivation. The balance of the country along and tributary to the line, and upon the branches, is comparatively new, sparsely settled, and not more than one-fifth of the land presently producing. The lands of the company, however, are being sold; the population is increasing, and the time is not distant when the traffic to and from this immense tract of country tributary to this road will be large and of much value.

The acquisition of this road, extending as it does from Burlington to the Missouri River, connecting with the Union Pacific at Omaha—and at Omaha, Plattsmouth, and Nebraska City, brought into connection with the Railroad system of Nebraska, and by its branches and connections reaching the eastern terminus of the Kansas Pacific, the Atchison, Topeka and Santa Fe, and the system of Kansas roads, thereby, with your road, forming channels of commerce and highways to the country west of the Missouri and to the Pacific, not likely to be broken or interrupted—cannot fail to add largely to the permanent value of the combined property of the two companies.

By the union of these two interests an eastern terminus is made at Peoria, where your road is brought into connection with the system of railroads under the management of the Pennsylvania Central Railroad Company, and other roads, thence to the Atlantic seaboard, avoiding delays and expense of handling, and giving a haul between Peoria and the Missouri River of four hundred miles. While, with the other arm, it terminates at Chicago, where it makes connections with the great roads reaching to the seaboard by the more northerly routes, giving an outlet to your traffic, and affording transportation between Chicago and the Missouri River over a distance of five hundred miles. This great Through Line, under one management, it is believed, can be effectively and economically operated, and afford facilities and accommodations to the general public equal to any other leading into the West.

The road is well constructed, but like all new roads has in it a large number of wooden bridges and culverts, which will need to be renewed from time to time with masonry and iron. They are generally short and inexpensive, but the large number of them will aggregate a considerable amount to be included in the cost of the annual maintenance of this part of the road. The iron on the greater portion of the road is in good condition; some renewals, however, during the coming year, will be needed. It is estimated that about thirty miles of iron should be replaced with steel during the ensuing year.

An abstract of a statement by the assistant treasurer of the Burlington and Missouri River Railroad Company, of the property and assets of that company, transferred on the 31st of December, and of the amount and character of the liabilities assumed by this company is herewith printed:

ASSETS.

Construction of 443.99 miles of road and appurtenances, including sixteen miles of leased roads	$14,042,188 57
Equipment	2,108 137 54
Materials	109,118 91
Bills receivable for land sold	1,787,409 02
Value of land unsold, estimated	1,588,597 04
Total	$19,635,451 08

LIABILITIES.

Capital stock, including stock of Branch Roads		$7,397,672 76
Road bonds, 7 p. ct.	$2,600 00	
Land Grant and road mortgage bonds, 7 per cent	5,058,350 00	
Con. bonds, 2d series 7 per cent	600,000 00	
Con. bonds, 3d series 8 per cent	693,000 00	
Con. b'ds, 1879 series 8 per cent	438,000 00	
Con. b'ds, 1894 series 8 per cent	412,500 00	
Con. b'ds, 1889 series 8 per cent	506,500 00	
		7,710,950 00
Bills and accounts payable and receivable		439,821 85
Balance represented by surplus to credit of income account		711,000 41
Land Grant including lands unsold and balances due on account of sales, valued at		3,376,000 00
Total		$19,635,451 08

Among the items of indebtedness assumed by this company, as shown by the above statement, are included what are termed Land Grant and Road Mortgage Bonds, amounting to $5,058,350 bearing seven per cent interest. These bonds are secured by a mortgage upon the railroad and property of the company, and in addition thereto upon the Land which the company received from the Government to aid in the construction of their road amounting in all to 859,708.45 acres. Of these lands 183,243.23 acres have been sold at an average of $11.79 per acre, aggregating $2,234,913 86, of which $1,787,409 02 still remain unpaid, and draw interest at six per cent. Should the balance of these lands sell at the same rate per acre, the total amount which will be received will be $4,335,848 86.

The entire net proceeds from the sale of these lands, by the terms of the mortgage, go to establish a sinking fund with which to retire what are called in the above statement "Land Grant and Road Mortgage Bonds." With this explanation, and by an examination of the above statement, you will understand the amount and character of the property acquired with the Burlington and Missouri River Railroad, and the extent of its liabilities.

The following statement exhibits a summary of the combined assets and liabilities of the two companies as consolidated at the date of this report, in reference to the management and conduct of which future reports will treat.

SUMMARY STATEMENT.

Permanent investment		$61,204,151 07
Capital stock	$26,050,582 76	
Bonded debt (including branches)	25 813,185 00	
Scrip	152,250 00	
Due Northern Cross bondholders	256,206 95	
Bills and accounts payable and receivable balance their accounts	602,466 03	
		52,874,680 74
Surplus		$8,329,470 33

SURPLUS ACCOUNTS.

Sinking fund	$1,179,744 88
Income account	3,514,272 16
Suplus fund	259,447 23
Land Grant, etc	3,376,006 06
	$8,329,470 33

A statement of the operating results of the Burlington and Missouri River Railroad for the last year, will not be expected in this report.

In conclusion, we may state, in reference to the business of the Chicago, Burlington and Quincy Railroad proper, that for the period covered by this report, it has been large and reasonably remunerative; and had it not been for the low price of grain, and the impossibility of finding an adequate outlet for traffic to the Eastward, its magnitude and results would have met the most sanguine expectation.

The business for the ensuing year will be larger on the respective divisions of the consolidated road, both East and West of the Mississippi, than it has been in any previous year; and provided an eastern outlet can be had for the traffic, it will be measured only by the facilities at the command of the company to handle it.

The company have 209 locomotives, 25 twelve-wheel and 62 eight wheel passenger coaches; 15 twelve-wheel and 29 eight-wheel baggage, mail and express, 1 pay, 1 inspection, 2,716 house freight and cattle, 1,002 platform and coal, 89 drovers' and conductors', 40 dump, 3 tool, 1 pile driving, 244 rubble, and 282 hand cars.

Number of miles run by locomotives on passenger trains, 1,027,620; on freight trains, 1,517,271; on miscellaneous trains, 959,074—total, 3,503,965. Cost per mile run for repairs, 8.42; for oil and waste, 0.74; for fuel, 10.80; for engineers, etc., 7.87—total, 27.33. Miles run to pint of oil, 14.01; to ton of coal, 40.83.

GENERAL ACCOUNT, December 31, 1872.

Capital stock		$18,652,910 00
Funded debt, ($11,498,475) viz:		
Trust mortgage convertible sinking fund 8 per cent bonds, payable January 1, 1883		150,000 00
Trust mortgage inconvertible sinking fund 8 per cent bonds, payable January 1, 1883		2,592,000 00
Trust mortgage 7 per cent bonds, payable October 1, 1890		680,000 00
Seven per cent bonds, payable January 1, 1896		6,983,225 00
Second mortgage bonds issued on account of Northern Cross road, payable at Frankfort-on-the-Main, interest at 4½ per cent to July 1, 1875, and at 4 per cent from July 1, 1875, to July 1, 1890		941,000 00
C., B. & Q. scrip of 7 semi-annual installments of $21,750 each payable July and January at Frankfort-on-the-Main, issued on account of Northern Cross R. R.		152,250 00
Amount due under decree of Court forclosing the mort. on the N. C. R. R., not yet called for by the bondholders, and therefore retained by order of the Court		256,206 95
Contingent liabilities viz:		
American Central Railroad bonds.		736,000 00
Peoria and Hannibal R. R. bonds.		600,000 00
Keokuk and St. Paul R. R. bonds.		100,000 00
Dixon, Peoria and Hannibal Railroad bonds		800 000 00
Carthage & Burlington R.R. bonds		600,000 00
Quincy & Warsaw Railroad bonds.		800,000 00
Ottawa, Oswego and Fox River Valley Railrond bonds		1,260 000 00
Illinois Grand Trunk R. R. bonds.		960,000 00
Unclaimed dividends	$2,073 00	
Unpaid accounts and pay rolls	419,387 22	
Due agents and connecting roads	56,706 92	
Bills payable	1,203,657 46	
Sundry accounts	46,325 14

The extension of the road from Prophetstown to East Clinton, 17½ miles, was opened for business July 23, 1872. The Chicago and Rock River Road was opened for business from Shabbonas to Rock Falls, 46½ miles, October 16, 1872. The total number of miles operated by the company April 30, 1872, was 761½; and on the 31st of December, 1872, 825 miles—an increase of 64 miles. The average number of miles operated during the eight months ending December 31, 1872, was 787.

The whole tonnage moved over the entire line exclusive of company, I., C. & C., D. & M. freight was 1,342,210 tons. Number of tons hauled one mile, 183,695,032. Average earnings per ton per mile, .218 cents.

The number of passengers carried (exclusive of mileage and season) was 1,087,029; of these 532,469 went west, and 554,560 east. Total mileage of passengers, 40,961,855; average do., 37.68.

President.—JAMES M. WALKER.

Directors.—Erastus Corning, James F. Joy, Chauncey S. Colton, John C. Green, Nathaniel Thayer, John M. Forbes, Sidney Bartlett, John W. Brooks, Robert S. Watson, John N. Denison, John A. Burnham, and James M. Walker.

Chairman of Board.—JOHN N. DENISON.

General Superintendent.—ROBERT HARRIS.

Secretary and Treasurer.—AMOS T. HALL.

☞ The Milwaukee and Northern Railroad Co., having completed its line from Milwaukee to Green Bay, has surveyors at work running a line to Lake Michigammi, to connect thence with the Marquette, Houghton and Oconomee road.

Anthracite Burning Locomotive.

The Boston *Traveller* says two anthracite coal burning locomotives are now in daily use on the Eastern Railroad, and that they possess greater power and speed than engines of the old pattern, and are also in their action more economical. As an illustration of their good qualities it says that a long passenger train arrived at Portsmouth from Portland, on Monday, nineteen minutes behind time, but although the grades between Portsmouth and Boston are unusually heavy, a hard coal locomotive made up the lost time, and brought the train into Boston according to the schedule. The distance from Portsmouth to Somerville (fifty-four miles) was made in one hour and forty minutes. Reckoning two minutes for each of the six stops, this would make the mean time one hour and twenty-eight minutes, over heavy grades, with a very heavy train.

Statement of the Public Debt of the United States September 1, 1873.

DEBT BEARING COIN INTEREST.

	Amount Outstanding.	Accrued Interest.

Interest paid by United States, $20,447,986 26; interest repaid by transportation of mails, &c., $4,422,111 38; balance of interest paid by United States, $16,025,874 88.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, August 31, 1873.

WILLIAM A. RICHARDSON,
Secretary of the Treasury.

☞ The Manchester and Camden Railroad Company, and the Medford and Camden Railroad Company, both created by special acts and supplements from 1868 to 1873, filled articles in the Secretary of State's offi at Tr enton, N. J., on the 9th inst., uniting as one company under the general law, with the same directors as the Camden and Amboy Company, and with $200,000 capital. This makes a consolidated road from Manchester, in Ocean county, to Camden, and makes a through road from Manchester to New York, via Camden.

☞ The Committee on Securities of the New York Stock Exchange has revoked the notice of July 25 suspending bonds of the State of North Carolina bearing date of April 1, 1861, Nos. 3,001 to 3,250, of $1,000 each and signed "Henry T. Clark, Gov." These bonds are now restored to their former status, and are a good delivery as old bonds.

☞ The coal tonnage of the Scioto and Hocking Valley Railroad for the month of August was 90,000 tons, or 2,455,300 bushels. Total earnings for same time, $111,388 62. This showing is at the rate of 30 000,000 bushels per year, of which Columbus consumes about one-fifth.

Poughkeepsie Bridge Company.

At a meeting of the Stockholders of the Poughkeepsie Bridge Company, held in Poughkeepsie on the 5th inst., the following gentlemen were unanimously elected directors for the ensuing year: J. Edgar Thomson, Philadelphia, President of the Pennsylvania Railroad Co.; Thomas A. Scott, Philadelphia, Vice President Pennsylvania Railroad Co.; A. L. Dennis, Newark, President of the New Jersey Railroad and Transportation Company; Hon. H. G. Eastman, Mayor of Poughkeepsie; Andrew Carnegie, New York, of the Keystone Bridge Works and Union Iron-mills of Pittsburg; Charles G. Francklyn of the Cunard Steamship Company; David Saloman, New York, Financial Agent Pennsylvania Railroad Company; Andrew J. Cassatt, Philadelphia, General Manager Pennsylvania Railroad Company; Geo. P. Pelton, President Poughkeepsie and Eastern Railroad Company; P. P. Dickinson, Chief Engineer Poughkeepsie and Eastern Railroad Company; Strickland Kneass, Philadelphia, Vice President Pennsylvania Railroad Company; Gardiner F. McCandless, of New York, and Geo. Innis.

Mr. A. L. Dennis offered the following resolution:

Resolved, That a bridge across the Hudson River is imperatively required in the interests of commerce and the railroad traffic of the country; that the charter of the Poughkeepsie Bridge Company is ample for the purposes of a successful construction of such a bridge, and that it is the sentiment of this meeting of Directors and stockholders of that company that the work of building the bridge in conformity with the charter be prosecuted at once with energy and vigor.

This was seconded by Oliver W. Barnes, Esq., and unanimously adopted.

A meeting of the newly-elected Directors was afterwards held, when the following officers were elected: President A. L. Dennis; Vice President, H. G. Eastman; Treasurer, G. F. McCandless; Secretary, Charles B. Thurston; Assistant Secretary and Attorney, Robert F. Wilkinson,

The work of boring for a foundation for the piers for the bridge is being pushed forward with all dispatch.

☞ At the annual meeting of the stockholders of the Connecticut and Passumpsic Rivers Railroad Company, held at Newport, Vt., on the 2d inst. the following board of directors was chosen; Emmons Raymond, Boston; Josiah Stickney, Boston; Elijah Cleveland, Coventry, Vt.; B. P. Cheney, Boston; Albert Knight, Stanstead, P. Q.; Henry Chase, Lyndon, Vt.; Gardner C. Brown, Boston; T. P. Redfield, Montpelier, Vt.; F. M. Weld, Boston; Horace Fairbanks, St. Johnsbury, Vt.; Amos Barnes, Boston; S. S. Thompson, Lyndon, Vt.; Daniel R. Sortwell, Cambridge, Mass.

☞ The Newark (Ohio) *Advocate* says the result of the survey of the line from Shawnee, down Snow Fork, has decided the Baltimore and Ohio Railroad authorities to build an extension that will connect the Newark and Straitsville road with the Marietta and Cincinnati road.

☞ William Mason, of Taunton, Mass., has turned over his immense manufacturing business to the Mason Machine Company, a corporation organized under the general law of that State, of which he is President. The works are to be enarged and 1,000 men employed.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A dash (—) across the column signifies "nil," and running dots (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, September 13, 1873.

Stock Exchange and Money Market.

Money has been much brisker, especially for speculative use, through the enlarged requirements of the business at the Stock and Gold Boards. The rate on call loans has been up to 7 per cent gold to the Stock Exchange firms, with 6@7 per cent currency as the quoted figures for advances to the Government houses, whose wants were quite moderate, and readily met. The mercantile demand for aid was more urgent, and commercial paper was of less free currency, with the rates on strictly choice to very good grades quoted at from 7@10 per cent per annum. The reported financial troubles of the New York Ware house and Security Co., and o f a few old merchants, prominent in its direction, tended to seriously disturb the discount movement. The later Washington advices reported on Tuesday, the Alabama Indemnity of $15,500,000, gold, was paid to the State Department by Her Britannic Majesty's Representatives—Sir Edward Thornton, Minister Plenipotentiary, and Mr. Archibald, Consul General—in full satisfaction of the Treaty of Washington of May, 1871, and of the General Award of September, 1872. The Gold, and its equivalent in United States 5-20 Bonds of 1862, called in for redemption on Sept. 6, (last Saturday,) were already in the Treasury, the whole being represented by a single Certificate of Deposit executed on Monday in favor of the three Bankers of the British Chancellor of the Exchequer. As this Certificate soon passes into the Treasury in exchange for a corresponding Certificate of 5 per cent Stock, to be held subject to the further order of Congress, it virtually adds $15,500,000 to the Gold resources of the Treasury. The whole sum is in the ownership of the Government of the United States, until that portion which may be voted by Congress to private claimants on the Alabama Indemnity is duly appropriated and withdrawn. The U. S. Sub Treasury, last week, reduced its currency reserve nearly a million and added largely to its coin hoard. The city banks last week reported a further loss of 7⅝ millions in their deposit line with a decrease of over six million in their legal tender, and of nearly 1⅜ millions in their specie reserves. They reduced their loan and discount averages more than half a million, and again enlarged their circulation slightly.

The city banks have shown a further materal loss on their obligatory reserve, the last statement showing that they had only $414,850 more than the 25 per cent reserve which the national banks are required by law to keep on hand. The U. S. Sub-Treasury, last week, enlarged its coin balance about $3,710,817, and reduced its currency reserve $909,888. Its currency reserves at the close of the week were $31,310,448; and its coin hoard, $54,522,418.

The clearances of the city banks averaged through the week about 92⅜ millions a day, and amounted in the aggregate, for the whole week, to $553,727,902, as against $447,799,948 the preceding week.

The specie reserve of the city banks according to the latest return is $21,767,000, against $13,451,200 same time last year. The city bank deposits are now $212,772,700 against $213,616,200, week ending Sep. 7, 1872. The legal tender reserve amounts to $38,679,900, against $49,068,500 same time last year. The circulation now stands at $27,355,500 against $27,532 900 same time last year. The loans are now $288,374 200 against $287,640,000 at this date last year.

The coin reserve of the city banks is now about 21¾ millions, as against about 15 millions Feb. 21, and about 34⅝ millions on the 12th of July 1873; the legal tender reserve is a little over 38⅝ millions against about 34⅞ millions April 5th, 1873, and 50⅛ millions on the statement of Aug. 2, 1873; and the deposits are now about 212¾ millions, against 186⅞ on the 12th of April, 1873, and 240¼ millions on the 12th of July, 1873.

Government revenues have been yielding moderately since our last. The excises yielded within the week about 2¼ millions, and thus far in the current fiscal year commencing with July 1, 1873, $19,512,112. The customs at the port of New York, for the week, were $2,790,531, and at the outports, about $925,000 more, in coin or coin certificates.

Under the Treasury programme for September, Government proposes to sell Gold, as follows: Thursday, September 18, $1,500,000; Thursday, September 25, $1,500,000. And to buy in, on Wednesday, Sept. 17, at least $500,000 Five-Twenties.

The cash balances of the Treasury Department on Tuesday were: Currency, $13,398,985; special deposits of legal tenders for the redemption of certificates of deposit, $33,025,000; coin, $88,793,347. Coin certificates, outstanding, $47,756,200; outstanding legal tenders, $356,000,000.

The U. S. Sub-Treasury office last week received $4,075,156 of currency, and $7,359,738 of gold, the latter including $2,849 000 from customs; and disbursed $4,985,045 of currency and $3,648,921 of gold, the latter embracing $497,157 of coin interest.

There has been a very marked depression noted in the Gold line, the speculation throughout having been decidedly bearish in temper, and the price having declined very rapidly, the fall having been full 5 per cent from the highest point. The operators for a rise, who had been so long in apparent control of the market, were said to have been completely worsted, and to have been forced to realize on their holdings. The very free disbursements of the Treasury Department, on coin interest account, and in redemption of the Five-Twenties called in, and on which the notice had legally matured, tended to weaken the confidence of the bull clique. The later dealings indicated a somewhat steadier, and much less excited market. The customs call was up to a fair average; while the export drain was light. The range of the price during the week has been from 110⅞@115⅞, and the quotation on Wednesday was 111¼ against 115⅞ on Wednesday of the preceding week. The specie outflow last week, was only $690,104. The Gold Exchange Bank clearances have averaged a trifle over 126 millions per day during the week, reflecting the unusual activity in the speculative dealings.

The customs demand for Gold last week, averaged $465,100 a day. The arrivals of specie from Europe, Havana and other foreign ports thus far in 1873 have been $2,176,151, against $2,797,422 in 1872. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1873, has been $90,682,049 against $107,581,542 during the same time in 1872.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1873, $54,194,529, against $58,328,410 during the same time in 1872.

The export drain of specie was $690,104 last week, against $374,433 same week preceding year. The shipments since January 1, 1873, have been $40,479,302 against $57,709,239 during the same portion of 1872.

With the breaking up of the bull movement in Gold, the foreign exchanges were restored to something like their wonted activity, and the prices of prime drafts were quoted firmer. Bankers' sixty day bills on London closed on Wednesday at 108½@108¾; sight bills on London, at 109¼@109½. The week's exports of Domestic Produce have been to the currency value of $5,556,354.

Government bonds yielded in price, as Gold declined; but at the modified figures, the offerings

of all issues were on a limited scale, and found a ready market at the current rates.

U. S. sixes of 1881 closed on Wednesday of this week at 117¼@117½; U. S. Five-Twenties of 1862, 113@114; U. S. Five-Twenties of 1864 at 114¼@115; U. S. Five-Twenties of 1865 115½@115⅞; U. S. Five-Twenties of 1865 consolidated 115¼@115½; U. S. Five-Twenties of 1867, 116¼@116½; U. S. Five-Twenties of 1868, 116¼@116½; U. S. Ten-forties at 111¾@112⅛; U. S. Fives of 1881 (Funding Loan) 111¾@112; Six per cent. currency Sixes from 113@113¼.

On Saturday the interest on the twenty millions Five-twenty Bonds of 1862, called on the sixth day of June, ceased, and the bonds were to be presented for payment. The registered issues belonging here amounted to $4,000,000, and the coupons to $16,000,000. Of the latter, $7,308,580 46 have been entered into the settlement of Alabama indemnity, and of the remainder a goodly sum will likely be settled through the Syndicate. The remaining portion of the $15,500,000 Geneva award was settled in gold, which amounted to $8,191,419 54.

Railway Mortgage Loans have been in moderate request and quoted firm. Central Pacific Sixes have been selling more freely, closing firmly at from 99⅛@99¾. The earnings of the Central Pacific R. R. in August were $1,258,500, and thus far in 1873, $8,791,053 as against $8,052,755 the corresponding eight months of 1872. The Chesapeake and Ohio Seven per cent gold bonds have in fair demand at 90, and interest. Chesapeake and Ohio Sixes have been moderately inquired for at 88½ and interest. Western Pacific Sixes at 92½@92¾. The Northern Pacific 7-30 Loan has been salable and firm at par and interest.

The Railway and Miscellaneous share speculation has been more active, but generally at a much lower range of prices, the market for a short time having presented quite a panickly appearance, influenced, in part, by the reports of commercial and mercantile failures and embarrassments. The later transactions were on a steadier basis.

State bonds have been less active at irregular prices closing tamely.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Aug. 27.	Sept. 3.	Sept. 10.
Consols	92⅞	92½	92⅝
U. S. 5-20s, 1865	95⅛	95⅜	93½
" 1867	95¼	95¼	95½
" 10-40s	90¼	90¼	90½
New Fives of 1881	91⅛	91⅜	91⅝
Erie	48⅛	48⅛	48⅛
Ill. Central	86	—	—

General business has been moderately active. The leadings kinds of domestic produce have been in good demand, with Flour, Wheat, Corn, Oats, Cotton and Wool quoted firmer; Provisions and Petroleum, weaker in price. Middling upland Cotton left off firmly at 20⅝c. per lb. The receipts at all the ports, since Sept. 1 were 16,095 bales, against 29,084 bales the preceding year. Metals, generally dull but firm. Ingot Copper exceptionally active.

Foreign goods has been quite freely dealt in, and quoted stronger as to values. The week's imports of foreign goods and merchandise amounted to $7,797,237 including $3,276,470 of dry goods.

Ocean freights have been moderately active, with rates quoted firm; the main inquiry has been for room and tonnage suited to the Grain and Petroleum trades.

At the Live Stock Markets, Beeves have been in more demand at from 6½@12¾ cts. the better grades showing firmness. Veals at 5@9½ cts.; Sheep at from 4¼@6½ cts.; Spring Lambs 5@9 cts.; Swine at 4⅞@5¼ cts. per lb., all live weight. The week's receipts were 10,060 Beeves, 2,816 Veal Calves, 28,996 Sheep and Lambs, and 39,358 Swine.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

R., 16½@18½; George's Creek Coal, 120⅛@140.

The New Line of the Erie Railway.

The engineers have finished the survey of the new route for the Erie Railway between Jersey City and Port Jervis. The line runs from Port Jervis to Beemerville, and thence around a mountain to Unionville, thus forming a long curve to avoid expensive rock cutting, grading, or tunnel. From Uniontown the line runs direct to Greenwood Lake, and thence across Bergen county to the present road. This line is twenty miles shorter than the route at present used, which is ninety-six miles, and the grades far superior, the steepest grade being at Beemerville, where it will be fifty feet to the mile. The rest of the road will not at any time exceed thirty feet. This new road will be narrow guage.

☞ Messrs. GLENDINNING, DAVIS & AMORY, of New York and Philadelphia, have caused to be prepared, in the form of a chart, an admirable compendium of the quotations of the New York Stock Exchange for the last ten years. In other words, it is a monthly history of the principal railroad, steamship, express and telegraph shares and their various fluctuations. The reasons therefor are given in the shape of memoranda of the remarkable events which have attended stock speculations during the period named. The compilation has evidently been made with great care and constitutes probably the most complete map indicative of the course of speculation that has ever been prepared.

☞ At a meeting of the Board of Directors of the Northern Pacific Railroad, held on the 10th inst., the following resolution was adopted: "*Resolved*—That the Northern Pacific Railroad locate and construct its Main Road to a point on Puget Sound on the Southern side of Commencement Bay, in Township 21, Range 3, east of the Wallemeth Meridien, and within the limits of the City of Tacoma, which point in said City of Tacoma is declared to be the Western terminus of the Northern Pacific Railroad."

☞ Ground was broken on the 4th inst. for the South Mountain and Boston Railroad at Blairstown, Warren County, N. J. This road will be a continuous line from Harrisburgh, Pa., to Boston. Speeches were made by ex-Governor Price, John I. Blair and a number of distinguished Jerseymen. The work of tunneling the embankment of the Pennsylvania Railroad at Metuchin, N. J. for the Easton and Amboy Railroad has been commenced.

☞ The estimated earnings of the Kansas Pacific Railway for the week ending Aug. 31, are: freight, $61,471 87; passengers, $37,331 02—total, $98,802 89.

Illinois Central Railroad.

The statement of this Company for the month of August, 1873, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	2,007.20	for	$15,641 60
Acres Interest Fund Lands Sold	.....	for	.....
Acres Free Lands Sold	120.00	for	1,080 00
Total sales during the m'th of August, 1873	2,127.20	for	$16,721 60
To which add Town Lot Sales	.....	for	....
Total of all	2,127.20	for	$16,721 60
Cash collected in August, 1873			$40,718 76

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois. 707 Miles.	In Iowa. 402 Miles.	Total. 1,109 Miles.
Freight	$403,000 00	$87,350 00	$490 350 00
Passengers	112,760 82	40.207 90	152.968 72
Mails	6,375 00	3,059 24	9,434 24
Other sources	93,325 00	2,555 76	95,880 76
Tot'l Aug. '73.	$615,460 82	$133,172 90	$748,633 72
Total actual earn'gs, Aug., 1872	$653,768 14	$129,487 01	$783,255 15

☞ The following is the progress of the Hoosac tunnel for the month of August: From central shaft westward, 158 feet; west shaft eastward, 93 feet; total advance of headings, 251 feet; total length opened to September 1, 24,168 feet; rock remaining to be excavated, 868 feet—208 feet more than an eighth of a mile.

☞ The management and control of the St Joseph and Denver City Railroad has passed to a new Board of Directors, composed of large bondholders, and controlling a majority of the bonds. They are Jose F. Navarro, George D. Forrest, Laurence Mills, Thomas M. Smith, Edward W. Mealey, August T. Miller and Henry H. Butterworth.

☞ The President having accepted the recent surveys of the Southern Pacific Railroad, the issuing of land grants along the line of the route will soon begin. The company has forwarded a map of the road to the Interior department as a certificate of right of way and a basis for issuing patents.

☞ The Morrisania Railroad Company have commenced putting down a second track between the village of West Farms and the junction of Fordham avenue and Boston avenue, so as to make a double-track road between West Farms and Harlem Bridge.

☞ The Cumberland Valley Railroad Company having completed the "extension" between Hagerstown and Martinsburg, Va., regular passenger and freight trains will be run between Harrisburg and Martinsburg.

☞ The Lake Erie and Louisville Railway has just been formally opened from Lima to St. Mary's, making an entire line from Fremont of eighty-eight miles.

☞ The survey of the proposed line of the Grand Junction Railway has been completed from Quincy to Beardstown, Ill., and an effort will be made to commence operations at once.

OFFICE OF FISK & HATCH,
No. 5 NASSAU-ST., NEW YORK, Sept. 8, 1873.

☞ The CHESAPEAKE AND OHIO RAILROAD is now completed and in regular operation. To increase its Equipment, and perfect its Terminal facilities, and Deep-water connections with European Steam-ship Lines, and to accommodate the heavy **Coal and Mineral Traffic** together with the growing **Iron and Miscellaneous Local and Through Business** now pressing upon the Line, we are selling, on behalf of the Company, a limited amount of their **SEVEN PER CENT. GOLD BONDS,** secured by mortgage liens on the whole valuable property at 90 and accrued interest; $1,000 each, either coupon or registered, payable in gold coin, in New York City, principal and interest; interest January and July.

We also have a small amount of the **OLD SIX PER CENT. GOLD BONDS OF THE CHESAPEAKE AND OHIO;** price 88¼ and accrued interest; denominations $100, $500, and $1,000, interest payable in New York May and November.

The property has cost already upward of $38,000,000; it is worth to-day a much larger sum, and is constantly increasing in value. We can recommend both classes of Bonds, which are selling rapidly, with great confidence.

We also continue to deal in **Government, and Central Pacific, and Western Pacific Bonds,** execute orders at the Stock Exchange for investment Stocks and Bonds, receive Deposits, on which we allow interest at the rate of 4 per cent. per annum, and conduct a general Banking business.

FISK & HATCH.

☞ The Bucksport and Bangor (Me.) Railroad is from three-fourths to four-fifths completed. The culvert masonry, with the exception of two or three small culverts, is all finished. About ten miles are now ready for the ties, and four to five miles additional are nearly ready. It is expected that the entire road will be graded this month. The iron has been purchased and the first cargo will be shipped this week, and all is to be delivered by the 15th of October. It is American iron, from the Allentown Mills, Penn. The work of laying the rails will be begun as soon as the first cargo arrives.

☞ Work is progressing on the military telegraph from San Diego, Cal., to Prescott and Tucson, in Arizonia. Twenty miles of the line south of San Diego were completed last week. Work will be commenced south of Prescott this week. Materials and equipment for 630 miles of telegraph are on the ground.

☞ The Camden and Manchester (N. J.) Railroad Company have obtained a controlling interest in the Kaighn's Point and Philadelphia Ferry, and the transfer will be made in a short time. The right of way is now being secured along the route of the road, and work will be commenced on the Camden end in a few weeks.

☞ Mr. H. W. Phelps has resigned the superintendency of the Springfield and Athol (Mass.) road, to take the contract, with G. W. Lobdell, for the tunneling of Chesnut Hill in Brighton. His successor will be George W. Phelps of Rochester.

Journal of Railroad Law.

RAILROAD COMPANIES—LAW OF CONTRIBUTORY NEGLIGENCE.

The facts in the recent case of Illinois Central Railroad Company *vs.* Slatton, (54 Ill., 133), are fully and clearly stated in the following opinion by—

BREESE J.—This was an action on the case brought to the Perry Circuit Court by Susan Slatton, administratrix on the estate of John W. Slatton, against the Illinois Central Railroad Company to recover damages for having caused the death of the intestate, by the negligent management of a train.

There were two counts in the declaration, one alleging that while deceased was using due care when alighting from the train at Tamaroa, the train was suddenly and violently started forward, by means of which deceased was thrown under the wheels, and injured so that he died.

In the other count it is alleged, that as deceased was about to alight from the train, using due care, he was violently pushed off by the servants of the company in charge of the train, whereby he was thrown under the wheels, receiving a fatal injury.

The general issue was pleaded and the case tried by a Jury, who found for the plaintiff, and assessed the damages for eleven hundred and sixty-six dollars.

A motion for a new trial was overruled, and judgment rendered on the verdict, to reverse which the defendants appeal.

There was much testimony heard, and, as usual in such cases, not entirely harmonious.

The rule of law need not be repeated, that to justify a recovery in this action the allegations of the plaintiff must be sustained by the evidence; and when the evidence in conflicting, the verdict must stand, unless it shall appear that, although it is conflicting, the weight is decidedly in favor of the defendent.

The first count charges as negligence on the part of the defendents, that while deceased was leaving the car, using due care, the train was suddenly and violently started forward, by means whereof he was thrown under the wheels, and so injured as to cause his death.

It cannot be claimed that the evidence tends, in the slightest, to substantiate this charge, no witness has spoken to that point, consequently, these allegations are not sustained.

The second count charges that the deceased was violently pushed off the train—by the servants of the defendants in charge of the train, whereby he was thrown under the wheels, and was injured fatally.

This case was put to the jury mainly on this count. The theory of the plaintiff evidently was that some employee of the company used force in putting the deceased off the train while it was in motion, and it was so put to the jury by the first instruction asked by the plaintiff.

If there existed reasonable grounds for the hypothesis of the second count, the civil authorities, indeed, the whole people of Tamaroa, were greatly remiss in their duty, in not pursuing the offender in order to his prompt punishment, for it was murder, most foul and terrible. It can not be possible that such a fiend was employed by this company in their service.

John W. Parlier in his testimony gives some color to this theory, and so does Robert Murray, a lad about sixteen years of age when the accident occurred, in a slight degree, when he says there was some man on the car platform behind deceased; thought it was some man belonging to the train—the brakeman or conductor; did not see him after deceased fell; when he first saw deceased, he was standing with one foot on the car steps and one foot on the station platform, with one hand on the railing; the man had on a cap, did not see any badge on it, thought he was a brakeman or conductor, had seen him pass through on the train before, several times; he (the man) was standing on the car platform; did not say or do anything to the deceased; saw deceased get off; thought he had one foot on the platform of the station; the train had moved sixteen or twenty feet. On his cross examination, he says the man was a low, heavy set man; he also says there were two cars behind the one he (meaning, evidently, the deceased) was on, and another, which would make three cars, when the proof is overwhelming, deceased came out of the car next forward of the last car.

It is fully proved that no employee on the train could have interfered with the deceased in any particular, unless, possibly Glassford, who states he did leave his station, which was on the front end of the last car, and got out on the station platform at Tamaroa, and passed through one or two cars to regain his position, and he testifies he did not see or touch any soldier getting off, or say anything to any one of them who got off at Tamaroa, and knew nothing of the occurrence until he was told of it by a soldier.

The second witness for plaintiff, Mr. Cogan, gives a very full and clear account of the occurrence, of which he was an eye witness. He says he saw deceased when he was injured; was within fifteen feet of him; was on the platform opposite to him, about six feet from him; when he fell he was in the car with the solders; saw him when he came out of the car, seemed to be feeble and held on to the railing of the car; as he came out of the car door a man took hold of his arm, apparently for the purpose of helping him off; he seemed to be aiding the deceased, and helping him to get off, saw no badge by which to distinguish him, as belonging to the railroad, saw him open the door and assist deceased to get off; deceased was holding on to the railing, and was holding on to it when he fell, the train was moving slowing when he came out of the car, seemed to be just starting when he came out; it was about noon. On his cross examination, he says there was nothing unusual about the conduct of the train, except that there was a large crowd of people on the platform; saw James, the brother of deceased, same day; when he first saw deceased, he was inside of the car; saw some men helping him, who appeared to be friendly, deceased stepped down the steps, holding on to the railing with his hands, and got both feet on the station platform; he would not have get hurt if he had not held on to the railing after he got off the steps; held on to the railing with both hands, was pulled along twelve or fifteen feet when he fell down, think both feet were on the station platform.

It was agreed by the parties that Nelson Holt, the station agent, who was absent, would testify, if present, that he had a fair opportunity of seeing all that happened; that he knew the employees of defendants as were at that time running on the passenger trains passing Tamaroa; that the train in question stopped at the station more than the usual length of time, and not thrown or pushed off, or negligently jostled of by any brakeman or other persons employed on that train; or if done, witness did not see it.

We think this testimony overthrows the theory on which this case is based, and is so overwhelmingly in favor of the defense, as to demand from the jury a favorable verdict.

The evidence recited satisfies us that the deceased had got on to the station platform and still clung to the railing of the car steps, and by so doing was dragged to his death. This was no fault of the company. No negligence can be imputed to them unless it be shown that by bad management of the train, or careless conduct of their employees deceased was placed in a perilous situation. The proof is abundant that the train stopped an unusual time—for a time sufficient to enable the passengers to leave it safely. If the deceased did not avail of this opportunity, but chose to attempt to get off when the train was again in motion, and this without the direction or knowledge of any employee on the train, it was his folly, and the consequences of it must rest on him alone.

The testimony so greatly prepondering in favor of appellants, the verdict should have been in their favor. The court should have set it aside on the motion for a new trial. It was an error to refuse the motion.

For this error the judgment is reversed and the cause remanded.

Judgment reversed.

☞ The earnings of the Union Pacific Railroad for July, 1873, were $876,833 39, the expenses $437,182 02, and the net earnings $439,651 37. In July, 1872, the earnings were $743,382 43, the expenses, $357,840 17, and the net earnings $385,-542 26—showing an increase in earnings of $133,-450 96 with an increase in expenses of $79,341 85, making the increase in net earnings $44,109 11. From January 1 to July 31, 1873, the earnings were $5,459,809 66, the expenses $2,790,096 85, and the net earnings $2,669,712 81—showing an increase in gross earnings compared with 1872 of $874,810 52, and an increase in net earnings of $829,691 25.

☞ The commission appointed to examine and test plans for the introduction of steam upon the canals of this State will meet at Syracuse on Tuesday, October 14. Competitors for the award of $100,000 offered by the State are requested to have their respective boats at that point, loaded with two hundred tons and prepared for the final trial, which will be had between Syracuse and Utica.

☞ The Ohio and Mississippi Railroad Co., which is now operating four hundred and seventy miles of railroad west and southwest of Cincinnati, have closed negotiations by which they will open a route from that city to Chicago the first of next November. They are building a line from North Bend to White Water Valley, a railroad which is to form a part of the new route.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of August, were :

☞ The New York and Oswego Midland Railway Company are about to issue bonds to the amount of $35,000,000, a consolidated mortgage for this amount having been made to the Mercantile Trust Company, and filed September 1.

☞ The contract has been let for grading fifty miles of the Iowa Pacific road, east from Sac City toward Fort Dodge, to Ingersoll & Phelps.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley left at tide-water from the commencement of navigation to the 31st August inclusive, during the years 1872 and 1873, was as follows :

	Flour, bbls.	Wheat, bushels.	Corn, bushels.	Barley, bushels.
1872 ...	66,000	3,500,500	16,013,600	401,500
1873....	66,900	8,901,100	8,419,800	27,000
Inc...	900	5,400,600	*7,593,800	*374,500

* Decrease.

By reducing the wheat to flour the quantity of the latter left at tide water this year, compared with the corresponding period last year, shows a deficiency equal to 1,080,020 bbls. of flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 30th of August, in the years indicated :

	1871.	1872.	1873.
Canal opened—	April 24.	May 13.	May 15.
Flour, bbls.	142,900	66,000	66,900
Wheat, bushels...	8,143,600	3,500,500	8,901,100
Corn, bushels ..	13,292,400	16,013,500	8,419,800
Barley, bushels.	71,500	401,500	27,000
Oats, bushels...	183,200	319,400	67,800
Rye, bushels....	1,637,800	4,369,500	2,105,400
Malt, bushels...	726,000	654,700	551,100
Feed, lbs.....	4,231,600	4,218,000	4,966,700

Heberlein Brakes.

The London *Railway Times* says it appears from official reports of trials of these brakes upon various continental railways that on the Imperial Austrian Empress Elizabeth West a passenger train engine, with tender and train of six carriages, four of which were fitted with the common screw brakes, had been converted on the Heberlein system. The engine used on all the trials had four coupled wheels, and weighed, with tender, 50 tons, the train of carriages weighed 43 tons. Trial No. 1.—Speed, 30 miles an hour. The common brakes were applied by six experienced men, and the train stopped in 35 seconds, at a distance of 320 yards. Trial No. 2.—The engine driver applied the brakes, and the train stopped in 15 seconds, at a distance of 180 yards. On an incline of 1 in 100, speed 30 miles, it stopped in 22 seconds, in a distance of 194 yards, and at a speed of 35 miles in 22 seconds, in a distance of 224 yards On the Imperial German Alsace an engine, with tender, was fitted with Heberlein brakes, a guard's brake was also fitted, with a passenger carriage without any brakes; speed 35 miles an hour, on an incline of 1 in 666, stopped in 148 yards; second trial, on a level, speed 55 miles per hour, stopped in 200 yards after brakes were applied; third trial, on 1 in 100, speed 53 miles an hour, ran after the brakes were applied 250 yards. On the Swiss North Eastern the results of trials were that the train, at a speed of between 50 and 60 miles an hour, was on each occasion stopped within a distance of from 700 to 800 feet, and in between 16 and 20 seconds. On the Hesse Ludwigs, at all the trials, it was found that the momentum of the train was almost entirely overcome in from 6 to 8 seconds, and the train was brought slowly and gradually to standstill.

☞ The Keystone Bridge Company, of Pittsburg, Pa., has the contract for the iron superstructure of the bridge which the Pennsylvania Railroad Company is building across the Monongahela at Port Perry. This bridge will cost about $500,000.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending August 30, at 515,590 tons, and for the coal year 12,848,336 tons, against 12,481,245 tons to corresponding time last year, being an increase of 365,091 tons. The bituminous tonnage for the week is 70,002 tons, and for the year 2,059,223 tons, giving a total of all kinds for the week of 585,592 tons, and for the year of 14,905,559 tons, against 14,322,736 to same time last year, being an increase of 582,823 tons.

☞ The earnings of the Central Pacific Railroad for the month of August, 1873, were $1,258,500, against $1,271,629 in August, 1872, and $1,006,373 in August, 1871. For the first eight month of 1873 the earnings have been $8,791,053 against $8,052,755 for the first eight months of 1872, and $5,920,555 for the first eight months of 1871—an increase this year over 1872 of $738,298, and over 1871 of $2,870,501.

The gross earnings of the Denver and Rio Grande Railway for the month of July, 1873, were $39,300 53, the expenses $19,364 15, and the net proceeds $19,936 38—an increase in gross earnings over July, 1872, of $10,635 79, and in net earnings of $9,673 15.

FOR SALE.

One New Four-Ton

LOCOMOTIVE,

NARROW GAUGE,

WILL BE SOLD $500

UNDER VALUE.

WASHINGTON IRON WORKS,
60 Vesey St., New York.

DREDGING MACHINES AND SCOWS

FOR SALE.

One (Osgood Pattern) Second Hand. Price $10,000.

One, Almost New. Price $22,000.

Two Large Dumping Scows, $3,500 Each.

A. W. LADD,
5 and 7 Dey Street.

Second Hand Locomotive For Sale.

ONE SECOND HAND ANTHRACITE COAL BURNING LOCOMOTIVE for Sale, weighing 28 tons, eight-wheel connected with cylinders 16 inches by 20 inches. Engine can be seen on application to A. WILHELM, President of Cornwall Railroad, at Lebanon, Pa. 3m2d

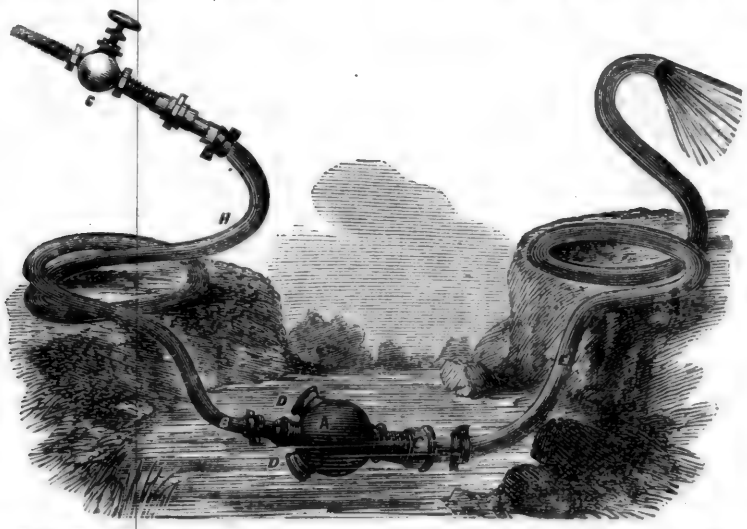
RAILROAD IRON.

ENGLISH and AMERICAN RAILROAD IRON for delivery in New York and other markets in the United States. For sale by

WM. H. PETIT & PIKE,
72 Wall-st., New York.

FOR SALE.

Four new passenger Coaches for sale; two 60 passenger each, price $5,250; two 76 passenger-price $7,000 each, now ready for lettering. Also a 30 ton new Locomotive ready for use.



Apply to

A. W. LADD

35tf 5 and 7 DEY STREET NEW YORK.

LANSDELL'S

Patent Portable Railway Syphon.

The Portable is invaluable on a freight or construction train, being used to take water at points where there are no water stations. With it water can be taken from any point within one hundred feet of the track where there is water six inches or more in depth. The valve C is tapped into the locomotive boiler; steam is let on through the hose B; water is drawn through the orifices D D, and forced through the hose E into the tender, filling any tender with warm water in from six to twelve minutes.

Lansdell's Patent Steam Syphons, Double Suction, adopted by the United States Board of Supervisors, and approved by the Secretary of the Treasury for use on Steamboats.

For Price and particulars, apply to the General Agents of the Steam Water Station Company,

LENG & OGDEN,

IRON AND STEEL DEALERS & IMPORTERS,

No. 4 FLETCHER STREET, NEW YORK.

Sole Agents for Credenda Steel Gun Barrels and Moulds, and the Cold Drawn Patent Weldless Steel Tubes.

NEW JERSEY STEEL AND IRON COMPANY,

TRENTON, N. J.,

Represented by COOPER, HEWITT & CO., No. 17 Burling Slip, New York,

MAKERS OF

ROLLED IRON BEAMS,

CHANNEL BARS, TRENTON STEEL TOP RAILS, &C. ALSO,

THE MARTIN STEEL!

The best and cheapest material for FIREBOX PLATES, and all Machinery uses.

A. W. LADD,

NO. 5 DEY STREET, NEW YORK,

Will cut to order for Bridge and Railroad Builders, WHITE PINE, GEORGIA and FLORIDA PINE, HEMLOCK and OAK TIMBER.

Agent for ROBERT BROWN, Telegraph Contractor.

Telegraph Lines of any length built with Brooks' Patent Paraffine or Glass Insulation and American Compound or English Galvanized Wire at the lowest rates and shortest notice. Also, Wire Fence for Railroads.

Important to Railroad Companies.

True indeed is the saying that while some men achieve renown others have it thrust upon them. Equally true is it, that while some men toil all their lives to obtain a fortune, others there are, born perhaps under a more lucky star, who have wealth tumbled right into their laps, nolens volens.

Some half dozen years ago, an acquaintance of the writer invented and patented an improved Railway Car Truck, applicable alike to platform, passenger and palace cars. By dint of wonderfully persuasive power he succeeded in getting his invention adopted on two or three lines of Railway. Just then some new idea seized his brain, and like many another inventor, he forthwith drops his old love, and flips off to something new, and thus allows the truck patent to sleep.

Not really so, however, for within two or three weeks past, it has been discovered that this style of truck, which is really a most valuable improvement, has been applied on nearly a hundred lines of Railroad throughout the country; and from all attainable data it is supposed to be in use already on not less than one hundred thousand cars in the United States alone.

The price or Royalty as previously established, is five dollar per car. Here, then, is a fortune of a half million dollars simply awaiting the owner's call.

It is not supposed, however, that those now dormant greenbacks will long have to wait that call; besides, arrangements are being made, we are informed, to permit the use of the invention on all the remaining lines in the country.

Safety Car Wheel.

Among other useful improvements for the avoidance of accidents upon Railways, we notice a new car wheel has been recently patented.

As it is not the business of this JOURNAL to puff any man's goods or inventions, we simply refer briefly to those which seem to possess real value, for the purpose of adding our mite towards the prevention of those frightful Railroad slaughters, so fearfully prevalent now-a-days.

It is believed fully one-half of all those accidents occur from the breakage of wheels. Seemingly the new wheel referred to, cannot break; and it would require almost unheard of power, to fracture or tear it to pieces. Hence all the terror and danger to passengers occurring in case of such accident, from flying fragments, would be wholly obviated wherever this new wheel might be employed. All those casualties, too, especially in frosty weather, arising from concussion, sharp curves, uneven, or slightly misplaced rails, will be avoided; and people will be enabled to travel with a far greater sense of security.

It is not generally known, but is a fact nevertheless, that the average of wheels broken while running, on some roads, are from 20 to 30 every week through the year.

Undoubtedly then, this is a most prolific source of fatal accidents; and as we have frequently urged in these columns, it is the rigid duty of Railroad Companies to avail themselves at whatever cost of every possible preventive of disaster.

The wheel here spoken of is lighter, stronger and more shapely than any other, and can be furnished some $75 less per car of eight wheels, than any now running.

As soon as the Patentee can avail himself of capital, or manufacturing facilities, we shall hope to see his Safety Wheel come into general use.

Chesapeake and Ohio Railroad.

The development of the coal and iron mines on the line of the Chesapeake and Ohio Railroad is progressing with great rapidity. Each day brings intelligence of some new company commencing to erect a furnace or open a mine for the shipment of ore or coal.

The Chesapeake and Ohio Railroad Company, making arrangements to meet the increased demands that these new enterprises will make upon their motive power and roadway, have, within the last few days, contracted with some of the first makers in the United States for fifty-four new freight engines of the best class, and are just receiving one thousand tons of steel rails, to be followed up rapidly by other large supplies.

These steel rails are designed to replace so much iron rail as yet remains in the main track, and thus release the latter, so that it may be used in the construction of branches to some of the iron and coal mines which are a little away from the main line.

Some of these branches are already completed and others are in process of construction. Their length varies from one to seven miles.

The management of the company is exhibiting great wisdom in the means it is adopting to develope the mineral wealth on its line, and will speedily be rewarded by a rich harvest of business.—*Richmond Dispatch.*

Alarms at Railway Crossings.

Mr. Z. M. Chapman of Sterling, Ill., has invented an alarm which is designed to give timely warning of the approach of a train to a street or road crossing, and is equally adapted to city and country use. The apparatus is so constructed that when a train passes a given point, eighty or less rods away, it will set simple machinery in motion and cause a bell to be struck with hammers thirty-two times in rapid succession, thus giving ample warning to drivers of vehicles and pedestrians who might otherwise endanger themselves by crossing the track. Mr. Chapman's invention has been thoroughly tested at the grounds of the Northwestern Railway at Sterling, and has fulfilled every expectation, signaling without failure the twelve to seventeen trains which daily pass the station. If what is claimed for the alarm can be realized it will be of great value at road crossings in the country, where, by reason of cuts or other obstructions to view, the approach of a train is hidden, and it can be applied with even greater advantage in towns and cities, where by

reason of the immense traffic on some streets an effective warning is urgently needed.

Camden and Atlantic Railroad.

The receipts from operations of this road for the year ending December 31, 1872, were as follows:

From passengers	$288,029 22
" freight	112,454 17
" express	23,212 06
" ferry	36,771 75
" May's Landing Branch	2,329 46
" U. S. Mail	3,000 00
" miscellaneous	1,239 87
	$467,036 03

Expenditures, viz:

Running account	$64,649 05	
Workshop	5,304 43	
Repairs to engines	14,439 69	
Repairs to cars	15,465 16	
Superintendence	34,090 85	
Station	14,234 44	
Repairs to real estate	528 50	
Road repairs	47,755 93	
Stations repairs	2,315 30	
Telegraph	861 18	
Ferry	51,528 10	
May's Landing Branch	6,288 47	
	$257,451 60	
Cr: By renewal of roadway	2,534 92	
		254,916 68
Earnings less expenses		$212,119 35

Against which is charged—

Balance from December 31, 1871	$62,039 99
Interest on bonds	76,359 61
Dividend 3½ per cent on preferred stock	29,309 00
Interest, insurance and legal expenses	25,598 43
Taxes, car hire, etc	9,428 11
Balance December 31, 1872	9,384 21
Total, as above	$212,119 35

Compared with the previous year the gross earnings show an increase of $63,454 39; with an increase in expenses of operating, excluding renewals of roadway, of $14,985 71. Including renewals of roadway, the expenses show a decrease of $31,015 31. The President in his report says:

The above statements exhibit an improvement which cannot but be highly gratifying to the stockholders, and particularly so, as the increase is not confined to any one locality, nor to any one description of traffic; each station on the line and each branch of trade having contributed its due proportion.

Nor is the increase confined to any particular period of the year; every month in 1872 showing a larger receipt than the corresponding month of 1871, giving promise of a prosperous future by its uniformity and regularity.

The development of the local traffic is particularly encouraging, as owing to the peculiar character of the business of this road, which requires the maintenance of a heavy equipment to meet the summer demands; any accession to the local trade distributed, as from its nature it must be, throughout the year, is sensibly felt, as well in the economical working of the line, as in the receipts of the company.

The receipts from the May's Landing Branch have not been large, but it was not anticipated that they would, for several years to come, equal the expenses, and sufficient time has not yet elapsed to judge fairly of what they may be in the future.

There is little doubt that the traffic to and from May's Landing has increased since the opening of the Branch Road, but to what extent it is impossible to determine, there being no standard with which to compare last year's business, and as this increase, whatever it may be, passes over the greater portion of the main line, the actual loss to the company may not have been so great as the returns would seem to indicate. The rent and working expenses amounted to $6,288 47, the receipts to but $2,829 46.

On the other hand, the acquisition of the ferry has proved a wise and judicious act, not only in a pecuniary point of view, but as enabling the company to transact its business in a much more satisfactory manner than was possible, while it remained under a separate management.

On taking possession of the property, it was found that the boats and slips required immediate and extensive repairs. $30,638 88 were expended on the former, and $1,656 06 on the latter, which placed them in such condition, that, it is believed, they will require nothing for five or six years, beyond ordinary repairs. As this expenditure was incurred to enable the company to enter upon the business, it should be placed to the first cost rather than to the working expenses for the year.

Deducting these repairs from the working expenses, the following is the result of the year's operations:

Receipts from the ferry	$36,771 75
Working expenses of ferry	19,283 16
Net earnings	$17,538 59

Two new locomotive engines have been ordered deliverable in May.

The First Mortgage Bonds, which were payable January 1, 1873, have been extended for twenty years, the future interest made payable in gold, or its equivalent.

The company have 10 locomotives, 19 first-class and 26 second-class passenger, 5 baggage, 2 mail, 1 smoking, and 108 freight cars. Number of miles run by locomotives, 204,790. Number of through passengers, 78,526; do. way do., 271,569; do. excursion, 67,091. Tons of freight carried, 69,324.

General Balance Sheet, December 31, 1872.

President.—Robert Frazer.

Directors.—Robert Frazer, Anthony J. Antelo, Andred K. Hay, Samuel Richards, Walter D. Bell, Samuel R. Colwell, John Lucas, John F. Starr, James B. Dayton, Charles Cambios, Jr., Enoch A. Doughty, John S. Newbold, Charles F. Davenport.

Secretary and Treasurer.—D. M. Zimmerman.

☞ The Cairo and Fulton Railroad was completed on the 31st ult. to Fulton, in the extreme southwestern corner of Arkansas, four hundred and seventy miles from St. Louis. The road will be pushed on immediately to Texarkana, twenty miles beyond, where it will connect with the International Texas Pacific and the whole system of Texan roads.

Baltimore and Potomac Railroad.

At a meeting of the stockholders of this company held in Baltimore on the 3d inst., the following gentlemen were elected directors: B. F. Newcomer, George Small, George B. Roberts, J. N. Du Barry, Colonel Samuel Cox, Dr. Eli J. Henkle and Wm. T. Walters. At a subsequent meeting of the directors the following officers were chosen: Hon. Oden Bowie, President; J. N. Du Barry, Vice President and General Manager; S. Little, Secretary and Auditor; and J. S. Leib, Treasurer.

The president submitted the report of the president and directors for the last year, which, on being read, was, on motion, accepted and ordered to be published as part of the proceedings of the meeting.

REPORT OF THE PRESIDENT.

To the stockholders of the Baltimore and Potomac Railroad Company:

In compliance with their charter, the president and directors submit their annual report. At the last annual meeting the road from Baltimore to Washington, having been completed and opened on the second day of July, 1872, had been in successful operation two months. On the first day of January of the present year the main stem from Bowie to Pope's Creek, on the Potomac river, was opened to travel, and two trains are run daily over it each way, one being a passenger train, and the other a mixed passenger and freight, thus affording ample facilities to a productive country heretofore dependant upon water transportation, after long hauls and over bad roads.

On the 29th day of June, 1873, our passenger trains, which had previously been compelled to stop beyond the city limits, commenced to run regularly through the tunnel to the depot in Calvert street. The tunnel, which far exceeds in its extent and cost any yet completed in this country, has been found to be perfect in its construction, and to give admirable satisfaction to passengers, who find not the slightest inconvenience from smoke, but experience sensations of surprise and pleasure in passing through its subterranean depths under the centre of a great city. The double track through it has been laid and ballasted.

The depot and station houses at Pennsylvania avenue and Charles street have been sufficiently completed for use by passengers; and arrangements having been made with the Northern Central Railway Company for the use of its Calvert Station as the starting point for our trains, the Baltimore travel over the road has the unrivalled advantage of being able to take our cars at either of these three stations, or at Lafayette Station, or at the stock yard, as may be most convenient.

Satisfactory progress is still being made upon the grand depot building in Washington. When completed, its arrangements and conveniences will be perfect, and it is intended that it shall be an ornament to the National Capital, which, if ever the projected park there is completed, and near the proposed ground of which is it located, will be one of its most strikingly ornamental features.

There are few points on the main stem from Bowie to Pope's Creek where sidings are intended to be placed and proper freight and station houses erected, which have not yet been done, but which will be very shortly, as the materials, having been in temporary use elsewhere, are now available for these permanent locations.

Thus we have the road completed, and its buildings nearly all erected. The last report detailed the character of the bridging, iron and other material used in construction, all of which have been the very best.

The unprecedented freshets of last month, never known by the residents of the sections in which they prevailed to have been equalled in force or volume, did considerable temporary damage to the road, and caused an entire cessation of travel for several days. The earnest zeal and energy of

the proper officers soon, however, restored the road and resumed the regular travel, including the through to New York, which had just been opened by our tunnel and Union Railroad; and by our late experience we hope to convert the annoyance and temporary loss into great permanent good.

Having seen where the road might be improved and perfected, our efforts are already directed to that end; the banks in many places will be widened, numerous culverts enlarged, and in several cases bridges substituted for culverts; and thus the danger from freshets averted. The completion of the tunnel now brings all our mileage into operation, and we believe that the next twelve months will demonstrate the value of the road in its handsome earnings. Its operations prior to its final completion was intended only to settle and strengthen its bed, and on the main steam from Bowie to Pope's Creek mainly as a public convenience to gratify the universal desires of the section of the State through which it passed, and with no expectation of profitable results.

Of course, so long as our passengers and freight had to be landed beyond the city limits, several miles from the commercial and resident sections of the city, and to be carried over unpaved roads and sideways before reaching the streets of Baltimore, we could not hope to draw largely from old established and well managed lines of travel. But an examination of the treasurer's report, herewith submitted, shows a much more favorable exhibit than could have been expected, and that, under all its disadvantages, the road has been operated at a small profit.

Now that we are finally ready for travel and freight, with our main depots in the centres of Baltimore and Washington, and the choice of stations in different localities in both cities, that the tunnel gives us greatly the best advantages for through connections North, South, East and West; that arrangements for these have been made, and others for both local freight and travel are being perfected; that our equipment of engines, of passenger, palace and freight cars of all kinds is ample, new, and of the most approved character, we feel assured that the faith of the friends of the road is about to be realized, and their confidence rewarded.

For the successful results of the past year, much is due to the different officers of this road, who have never seemed to weary in the proper efforts to bring our new candidate for popular favor and patronage fitly before the public.

The board of directors have recently had the misfortune to lose two of their most useful and valued members. One of them, Hon. James C. Clarke, has been chosen Vice President of the Great Erie Railroad at a salary commensurate with his eminent abilities, and it is with much regret that we shall lose his services to our board and to the State of Maryland.

The other, Colonel Wm. D. Bowie, who had been a director from the earliest organization of the company in 1858, and who in that long time scarcely ever failed to attend a meeting of the board; whose deliberations, his sound, mature, and always unprejudiced judgment greatly influenced, has been called hence after a long, pure and well spent life.

These vacancies having so recently occured, the board did not think it proper to fill them, in view of the present approaching meeting of the stockholders.

ODEN BOWIE, President.

☞ The Pennsylvania Railroad Company gives notice to the stockholders that the fourth instalment of 25 per cent on the allotment of new stock of 1872 will be payable between November 1st and 28th, 1873, and an instalment of 25 per cent on the allotment of new stock for 1873 will be due at the same time. The remaining instalment of 25 per cent, it is also stated, will be received from such stockholders as may desire to pay in full for their shares.

Railways of Great Britain.

The railway statistics of the United Kingdom for 1872 have just been published by the Board of Trade. The total length of line opened for traffic at the close of last year was 15,814 miles, an increase of 438 miles as compared with 1871, and more than double the mileage of 1853. Of the present lines England and Wales have 11,136 miles, Scotland has 2,587, and Ireland 2,091. The total authorized capital is £644,589,000, and the total paid up £569,000,000. Of this latter sum £239,000,000 is ordinary capital, £63,000,000 is guaranteed, £115,000,000 preferential, more than £56,000,000 consists of loans, and very nearly £86,000,000 is debenture stock. Of the authorized capital more than £532,000,000 appertains to English Railways. The Scotch lines account for more than $76,000,000, and the Irish for something less than £36,000,000. Of the paid-up capital, England has rather less than £474,000,000, Scotland under £67,000,000, and Ireland under £29,000,000. It will be seen that the paid-up stock and share capital of all the railways is rather less than £47,000,000, in addition to a total of rather more than £152,000,000, raised by loans and debentures. In 1853 the total authorized capital was under £367,000,000, and the capital paid-up was rather more than £273,000,000. In that year the ordinary stock was less than £165,000,000. We have no account of debenture stock until 1859, when it amounted to $5,620,000. In that year the ordinary stock was £184,560,000, the guaranteed and preferential £63,555,000, and the loans £80,628,000, thus making a total exceeding £334,000,000. The amount of paid up capital was then £33,430 per mile. In 1853 it was £35,561 per mile. It has now risen again to £35,984, or just about £20 per yard.

Such being the cost, we proceed to look at the year's work on these 15,814 miles of railway. The passengers carried were 422,875,000, in addition to more than 270,000 season ticket holders. England and Wales account for 372,450,000 passengers and nearly 218,000 season ticket holders. In 1853 the passengers carried on all the railways amounted to less than one-fourth the number in 1872, the total being 102,266,000. Of the passengers carried last year 37,678,000 were first class; 72,460,000 second class, and the enormous proportion of nearly 313,000,000 third class. The gross receipts from the passenger traffic were £22,288,000. In 1853 the amount was £9,100,000, or less than half. The increase compared with 1871 is considerable, the amount in that year being £20,628,000. The total receipts from the goods traffic last year exceeded £29,000,000. In 1871 the amount was under £26,500,000, and in 1853 it was under £9,000,000. It was not until after 1854 that the receipts from the goods traffic exceeded the proceeds of the passenger traffic, and the excess was of small proportion until 1860, when for the first time there was a difference of a million and more. The goods traffic produced fifty-four and one-half per cent of the gross receipts of last year. The proportion was rather higher in 1867, but with that exception it has always been less. The total gross receipts from the traffic (passengers and goods) in 1872 were £51,304,000, to which may be added rents, tolls, and the revenue from steam-boats, making altogether £53,235,510, or more than £1,000,000 per week. This shows a material advance on the previous year, the amount then being £48,892,780. In 1853 the total traffic receipts were a little over £18,000,000. The traffic receipts in 1872 were at the rate of 5s. 4½d. per train mile. In 1871 the rate was 5s. 3d., and the year before 5s. 1½d., which is the lowest on record. In 1853 the receipts were 5s. 5d. per train mile, and in 1856 they were as high as 5s. 11½d.

In analyzing the receipts from the passenger traffic it is important to observe that more than half—that is to say, as much as £10,319,000—is from the third-class. The revenue from first-class passengers is £4,319,000; from the second-class, £4,198,000; and from season-ticket holders, £892,000. Excess luggage, parcels, carriages, horses, dogs, &c., account for £1,930,000, and mails £623,000. Of the £29,000,000 from goods traffic, merchandise yields £16,688,000; live stock, £1,078,000; and minerals, £11,226,000. The passenger trains traveled 93,000,000 miles, and the goods and mineral trains nearly 95,000,000. Adding the journeys of the mixed trains, we get a total of more than 190,000,000 miles, a distance exceeding the diameter of the earth's orbit. The weight of the goods traffic comprised 100,495,000 tons of minerals, 49,194,000 tons of general merchandise, and 23,618,000 tons unclassified. To carry on this traffic there were nearly 11,000 locomotives, nearly 24,000 passenger carriages, and more than 300,000 wagons. Other vehicles attached to passenger trains amount to 8,500, and miscellaneous vehicles used on the lines 5,000, making a total of nearly 349,000 under the head of rolling stock. It would be a curious piece of information to know how far all these vehicles would extend in a single line.

Against the gross receipts of more than £53,000,000, we have to put a working expenditure of £26,293,000, leaving the net receipts slightly under £27,000,000, the proportion of working expenditure to the gross receipts being 49 per cent. In 1871 this proportion was 47 per cent. In 1867 it was 50 per cent. In 1860 and 1864 it was as in 1871. In 1872, the proportion was 49 per cent on the English railways, 51 per cent on the Scotch, and 53 per cent on the Irish. The working expenditure of all the lines taken together includes £4,870,000 for maintenance of the permanent way, £7,146,000 for engine power, £2,150,000 for repairs and renewals of carriages and wagons, £7,574,000 for traffic charges, (coaching and merchandise,) more than £1,000,000 for rates and taxes, a little over half a million for Government duty, £300,000 "compensation for personal injury," &c., £186,600 compensation for damage and loss of goods, and £299,000 for legal and Parliamentary expenses. General charges, steamboat, canal, and harbor expenses, and miscellaneous matters, make up the total working expenditure. The compensation for personal injury amounts to £246,700 on the English lines, the Scotch lines paying £41,300, and the Welsh £6,700.

☞ The Illinois Central Railroad Company and the Southern Railroad Association are building a link of about 85 miles between Cairo, Ill., and Jackson, Tenn., which will make a close connection with the entire Southern Railroad system, avoiding the water transfer of twenty miles between Cairo and Columbus, Ky. The work is progressing rapidly, and is expected to be finished about next October. On the completion of this road Chicago will have an uninterrupted railway line to Mobile and New Orleans by the Illinois Central Railroad, over which passenger trains will run the entire distance without change of cars.

☞ The proposed Brownsville and Youghiogheny, (Penn.) Railroad, of which A. L. McFarland is President, is to extend from Brownsville, Fayette county, to Greensburg, Westmoreland county, by such route as may be deemed most practicable and important. Three routes have been suggested, but as yet the question has not come up for consideration. The Redstone Coal Company is taking an interest in the projected work, and will give it aid.
